# Executive Summary

The Executive Summary covers major steps and milestones of the ORIS project for the Rio 2016 Olympic Games.

## 1 Introduction to the ORIS Project

Information management is a key component in the efficient operation of sporting events. Accurately documented requirements are essential to ensure reliable, cost efficient results management, and facilitate the transfer of knowledge from one Games to the next.

In 1993, recognising the high costs and risks incurred in the continual redefinition of requirements, the IOC initiated a pilot project "INFOTECH" whose aim was the definition of minimum requirements for Information Technology support at the Olympic Games. Rowing was chosen for this pilot project.

Information requirements were analysed in detail by the International Rowing Federation (FISA) together with representatives of the major World News Press Agencies (WNPA), several large sports newspapers and representatives from the IOC. In the course of this process, the needs of the written press and news press agencies and potential areas for improvement were highlighted. At the same time, information users gained a better understanding of the procedures involved in running a major sporting event. This collaboration brought about a greater mutual understanding and commitment to working together for the benefit of athletes, sports officials, viewers, readers and subscribers and therefore, ultimately, the sport.

Experience gained during this pilot project encouraged the IOC, the International Federations, and participating media representatives to extend the process to all other sports in the Olympic Programme for future Games, starting with the Nagano 1998 Olympic Winter Games.

The experience gained from the pilot project helped to set the objectives for all subsequent versions of the project. These project objectives are to:

- Form a Working Group for each discipline made up of experts from the various fields related to information technology and information usage for the sport
- Establish and consolidate the IT requirements that an Organising Committee (OC) will be required to fulfil in order to meet the needs of the International Federations (IFs) and media during the Games through a process of consultation among the Working Group
- Set consistency in the level of IT support across the different disciplines at the Games, whilst respecting each sport's traditions
- Analyse and propose changes to current working practices in order to ensure that information delivery is up to date
- Document procedures in a readable and user friendly format, focusing on a description of the required information from a user's perspective
- Ensure that the experience gained at each Game's edition is transferred forward to subsequent Games

During the winter of 1995-1996, the International Olympic Committee (IOC), the Organising Committee for the XVIII Olympic Winter Games, Nagano 1998 (NAOC), 35 representatives of the International Winter Sports Federations and 42 media personnel from 16 countries completed the requirements documents for the 14 Winter Olympic sports.

In February 1997, while the Winter Games documents were being finalised for Nagano, the IOC launched the Summer Games project in parallel. The project was renamed ORIS (Olympic Results and Information Services). Over the next two years, documents for the 37 disciplines on the Sydney programme were completed by the ORIS team, working with sports, media and technology personnel from the Sydney Organising Committee for the XXVII Olympic Games (SOCOG). More than 130 representatives of the 28 International Summer Sports Federations and over 120 journalists from 31 countries were involved in the project.

As a result of the success of the Nagano and Sydney Games, the ORIS project has been leading the results delivery at every Summer and Winter Games organised since.

In parallel, requirements for a data feed to serve the press agencies were defined and documented together with the main news agencies in the so called World News Press Agencies working group (WNPA). The first version of the "Requirements for the Results Data Feed" for summer sports was released in 1995. Subsequent documents were improved, extended to the winter and implemented from the Nagano Winter Games onwards. These requirements have been replaced by a new universal data feed named the Olympic Data Feed (ODF) which was first implemented at the Vancouver 2010 Games.

The development of the ORIS document has combined the expertise and experience of many diverse users who together have thousands of hours of first-hand experience at Olympic Games and other major competitions. The legacy of the lessons learned and the experience gained has been brought to the present version, and the experience gained at the Sochi 2014 Games will be used to further improve future versions.

The ORIS development process (ORIS document production, Change Management, Test Event, Homologation Test, TAO observation, Questionnaires) ensures that the ORIS document remains stable during the development cycle. This also ensures that the document continues to be developed to include valuable feedback received from the Games, and from actual end users of the outputs and feeds produced.

### **2.1 Terminology**

Some terminology used in this document is generic and each OC may use its own terminology. For example, the "Venue Press Centre" may be called "Venue Media Centre", "Sport Presentation" may be called "Sport Production", a "Competition Manager" may be called a "Sport Manager", "ONS" may be called "OPNS", etc.

In this document, the masculine gender used in relation to any physical person (for example, names such as Technical Delegate, official, athlete, judge, referee, score verifier, member of a jury or pronouns such as he, they or them) shall, unless there is a specific provision to the contrary, be understood as including the feminine gender.

### **2.2 Document Structure**

The ORIS document is laid out as follows:

#### **2.2.1 Executive Summary**

This part of the document provides an overview of the ORIS project and the ORIS document for Volleyball. It includes information on the following topics: introduction, document content, cycle and participants.

#### **2.2.2 Volleyball References**

This part of the document describes the references on which the ORIS document is based. It includes the list of events, competition format, competition phases, participation references and source documents.

#### **2.2.3 Procedures**

This part of the document describes procedures to be followed by the OC and its partners, the FIVB and the IOC. It covers procedures for results services and news services, for both the preparation period and the Games.

##### **2.2.3.1 Results Service and Competition Management Support**

The roles and responsibilities of the FIVB, the OC Competition Management and OC Technology during all stages of the results delivery process for the competition are defined here. This includes "end to end" information technology support beginning with the athlete entry process up until the completion of the event, including the handling of exceptional situations. Special attention is given to the results verification process and the initiation of results distribution. Procedures are designed to ensure maximum data accuracy in the most efficient manner.

##### **2.2.3.2 News Service and Background Information**

Procedures regarding the collection, acquisition and transfer of historical data, biographies and similar background information prepared before the Games are defined here. The roles and responsibilities of the FIVB, the IOC and the OC in this process and the data exchanged between these parties before and after the Games are also outlined.

Procedures on the preparation of news (e.g. previews, reviews, flash quotes, press conference highlights, etc.) by the Olympic News Service (ONS) are defined. The expected responsibilities of the FIVB and the OC Competition Management in order to support these processes are outlined. The role of OC Technology in the collection and distribution of this information is described.

#### **2.2.4 Section 1: Printable Outputs**

All outputs which should be produced are listed in section 1. In addition to technical information linked to the outputs (description of the data items, sorting rules, legend definition, etc.), samples are

provided in order to help the organisers and users understand the type of information required. The format and content of some outputs have become traditional and standard in some sports. ORIS support the policy that such standards should be followed. Details of information content are shown independently of the delivery method, which defines whether information presented in the sample of each output will be printed or be available in INFO.

The "Look" of printed outputs is defined by the OC while ORIS defines the content and structure of information to be displayed or printed in the output body. Printed outputs must include the same data in the same order as defined in ORIS. While text should be formatted as described in ORIS, minor layout adjustments are acceptable (e.g. a column position, height of a cell...). In sport specific outputs, column headings may also be adjusted to display the full title where an abbreviation is presented in the ORIS document, if space allows (e.g. "Rank" could be shown instead of "Rk"). For outputs that are common across all sports (e.g. tables in medal outputs) column headings should be shown as presented in the ORIS document for consistency across sports. For INFO, developers should include the ORIS proposal for the content, though the layout may need to be adjusted because of technical constraints, subject to approval by the ORIS Volleyball Working Group.

This document does not impose any particular technical solution and therefore many different possible solutions could be used to achieve the production and distribution of the outputs defined in ORIS (e.g. outputs related to news, training schedules, etc. could be produced by using a standard word processor).

## **2.2.5 Section 2: Distribution Rules**

This section defines the distribution of all outputs produced, whether printed or published in INFO.

It is divided into three chapters:

- Event related requirements
  - Process description and distribution rules for event related printed outputs and INFO grouped by type of event in chronological order (e.g. results of a competition phase)
- Other outputs
  - Process description and distribution rules of non-event related printed outputs and INFO grouped in chronological order (e.g. competition schedule, three (3) months before the Games)
  - Process description and distribution rules of event related printed outputs and INFO that have no defined production time (e.g. Official Communications)
- Distribution rules and availability of all outputs
  - These outputs are ordered by ORIS output code, and all delivery time variations are grouped under the same output code. These rules are documented in tabular format, showing which outputs the users require, when and where the outputs are needed.

The checking/approval process during output production and distribution is essential. Underestimation of this critical area could result in outputs not being delivered at the right place at the right time.

## **2.2.6 Section 3: Real Time Information**

This section defines the requirements for the presentation of real time information for scoreboards as well as a reference to on screen results presentation.

### **2.2.6.1 Scoreboards**

The provision of information to the public at the venues is an important part of the success of an event, keeping those who know the sport informed; and those who are new to the sport enlightened and entertained.

Public scoreboards are defined here.

It is not the intention to describe all that can be done in this area, but to suggest what is possible, as well as to define what information is mandatory or minimally required. In all cases, the FIVB should approve the proposed solution.

## **2.2.6.2 On screen results presentation**

This part contains references required for the development of on screen results presentation.

## **2.2.7 Appendix A: Glossary**

Since some terminology may be used differently across sports, the glossary helps the reader to understand exactly the intended definition in the ORIS document (e.g. the term "event" as defined in the Olympic Charter may have a different meaning than commonly used in a sport specific context).

## **2.2.8 Appendix B: Abbreviations**

Common abbreviations used in this document are defined in this appendix. Invalid results marks and other results marks are described in Appendix C - Rules for Data Formats and Presentation.

## **2.2.9 Appendix C: Rules for Data Formats and Presentation**

This appendix describes data formats as they should be used in all outputs, unless other formats are specified in the description table or data matrix.

## **2.2.10 Appendix D: Supporting Documents**

This appendix includes templates for the output "Official Communication" (C67), information for results, medals and diplomas allocation as well as data to be captured.

## **2.2.11 Document Control**

This part describes all changes made in this document through its life cycle.

### **3 ORIS Project Cycle**

Together with well-defined requirements, one of the key factors for success in the area of information delivery is proper expectation management. With the ORIS process, the key information users (representatives of International Federations and media) can communicate their information requirements for the Games. These requirements are assessed in the context of the available resources (time, budget, risks, etc.).

#### **3.1 Production of the Updated Version of the ORIS Document**

The process for updating the ORIS documentation will be as follows:

- The ORIS team will prepare the ORIS Volleyball draft document, based on:
  - The last version of the ORIS Volleyball document of the previous Games
  - International Federation sport rules, competition format and requirements for these Games
  - Previous Games experience (including Questionnaires and Homologation Test issues logged)
- A few weeks before the ORIS Volleyball meeting, the draft will be made available to the ORIS Volleyball Working Group, allowing them to prepare for the meeting
- During the ORIS meeting the draft will be analysed and ideas for improvements discussed and agreed upon through consensus of the ORIS Volleyball Working Group
- Based on agreements reached during the ORIS meeting, the ORIS Volleyball document version 1.0 will be produced and published on the IOC ORIS extranet for review. The ORIS Volleyball Working Group members can make comments directly on the IOC ORIS extranet regarding implementation of these agreements.
- The ORIS team will analyse the feedback and publish version 1.1 of the ORIS Volleyball document submitted for sign-off
- Once the document is signed-off (status approved), all modifications will be brought through a Change Management process
- After the last ORIS meeting for Rio 2016, a consolidation meeting may be held between the ORIS team and the OC (Sports, ONS, Results and partners)

Attending the ORIS meetings and working together on ORIS document updates will help all parties build and maintain good working relationships and improve understanding of their individual needs and responsibilities. The ORIS meeting is the best opportunity for all of the Working Group members to provide their input to the ORIS team and to help with the development of the ORIS document. It is emphasised that the development of the ORIS document is a collaborative effort and the goal is to develop a consensus among the Working Group members. The ORIS team will make every effort to facilitate this process.

As the process of updating the ORIS document is organised at an early stage in the Games preparations, OC Technology can issue early warnings whenever ORIS might request deliverables or availability of requirements which are difficult or impossible to satisfy with the resources available (budget, time, etc.). Because of this, some topics may remain highlighted in yellow, pending decisions by the International Federation, the IOC or the OC. Deadlines for resolution of these topics will be set during the ORIS meeting. Most of these deadlines will occur after sign-off of the ORIS document. Therefore any change regarding yellow highlighted text is automatically exempt from the Change Management process.

The procedure for updating the ORIS document also allows the OC's Technology providers to present the functionality and performance of existing solutions, in order to minimise changes and to raise any points for clarification required by their development teams.

The entire ORIS process (ORIS meeting, Test Event and Homologation Test) provides excellent opportunities for team building. The Test Event (if any) provides an opportunity to test production and distribution of outputs under high pressure and stressful conditions, similar to those experienced at the Games.

## **3.2 ORIS Document Sign-off**

The FIVB and the Organising Committee will sign-off the ORIS Volleyball document after all agreed changes have been implemented.

For the FIVB, the sign-off will represent a commitment that requirements are well defined and consistent with current sport rules, that they will be adequate for the smooth running of the Volleyball competition and that the procedures as described in the document will be followed.

For the Organising Committee, the sign-off will represent its commitment to deliver the ORIS requirements. The sign-off letter will be signed by the representative of Sports, Media and Technology.

Some issues, such as anticipated rule changes, could remain open and will be highlighted in yellow in the document. Updates of these topics will be made under the Change Management Process, however, implementation of these changes is mandatory.

## **3.3 Change Management**

A Change Request should be logged if the FIVB or the OC requests any change which has an impact on the ORIS Volleyball document.

The most common reasons for International Federations requesting changes are changes to the competition format or to the implementation of new rules. For Organising Committees the most common reason for requesting changes is because commitments made in the ORIS document no longer match the organisation of the discipline at the Games.

It is also possible that experience from the OC's Test Event (or other event), or the findings of the Homologation Test, will show that some requirements or procedures are no longer valid or require further improvements.

Change Requests will be registered and reported as per the ORIS Change Management procedures as defined in a separate document, as agreed between the IOC and the OC.

Once a Change Request has been approved, the ORIS team will publish an updated version of the ORIS Volleyball document.

## **3.4 Test Event**

The OC, in conjunction with the International Federation, will conduct a Test Event (sometimes also called Sport Event) which is the best (and only) chance for OC Technology to test its systems and operational procedures in real conditions. A successful Test Event should preferably be run under conditions which are as close as possible to the competition format that will be used at the Games.

### **3.4.1 ORIS Team Participation**

IOC Technology will appoint ORIS observer(s) for each Test Event. The main tasks of these observers are:

- To help OC Technology evaluate the performance of the implemented systems
- To monitor if procedures described in ORIS are followed and applicable
- To collect feedback from all users (the FIVB, media, teams, etc.)
- To prepare required changes to the ORIS Volleyball document
- To provide support to key users and act as moderators

### **3.4.2 Test Event Review Meeting**

A Test Event review meeting will be held before the end of the Test Event with the ORIS Volleyball Working Group in order to evaluate the findings and discuss solutions and improvements for the Games.

It is recommended that the Venue Results Manager organises and chairs this meeting and takes the meeting minutes.

Following the Test Event, the ORIS Sport Analyst will prepare the Change Request if required.

### **3.5 Homologation Test**

The Homologation Test will be carried out in the OC lab, led by the FIVB and supported by OC Technology and partners. The lab set-up must simulate all the major functions of the Games (venues, central system and their interfaces).

It must be organised early enough (six to nine (6-9) months before the Games) to allow sufficient time for the OC's Technology providers to solve any issue detected.

The Homologation Test covers the complete "end to end" process for the system's functions defined in the ORIS Volleyball document. The test begins with entry data for athletes and officials, continues with start lists creation, followed by results activities and production of the results outputs and medals. The test also evaluates the ability of the system to fulfil the key ORIS requirements including (but not limited to):

- Outputs produced by On Venue Results system (OVR)
- Olympic Data Feed (ODF) messages
- INFO presentation of competition and news outputs, direct print from INFO, live screens, medals, etc.
- Scoreboards

The FIVB, with the help of the ORIS team, will prepare all possible test cases and scenarios (from normal progression to exceptional situations) at a reasonable time before the Homologation Test. All the important variations of results should be tested and all the affected outputs should be checked with such test cases.

All issues identified during a Homologation Test are immediately entered into the OC's issue tracker. The issues are discussed and agreed upon, and action plans are proposed by the participants during the daily issue management meetings. If a consensus is not reached, the issue will be escalated to the IOC and the OC Technology management.

All parties affected by any of the issues identified should be kept fully updated of the progress.

The results of the Homologation Test are summarised in the FIVB and WNPA reports. Those documents are then sent to the OC, the FIVB, the IOC, and the news press agencies. Any problem areas identified will be the subject of future testing.

The success of the Homologation Test largely depends on the level of preparation of the OC Technology team, and on the quality of the testing software. This process has been used at every Games since Nagano 1998. It was one of the key factors which contributed to the success of these Games.

### **3.6 IOC Technology Assistance and Observation**

For each Olympic Games the IOC Technology department will establish an IOC Technology Assistance and Observation programme (TAO).

The principal tasks of the TAO team during the Games are to help OC Technology ensure the success of the Games through efficient and accurate Information Technology support to the key users, as well as to evaluate lessons learned in order to contribute to improving the processes and deliverables for future Games (outputs and procedures).

The ORIS team will attend as many of the key phases as possible (draw, change of competition phase, etc.).

All problems will be reported using the regular OC Technology reporting lines. The ORIS team will be a part of the problems escalation process and, if required, be a link with the International Federation representatives.

The ORIS team should also report any feedback to the OC concerning the IT services that they have received from International Federations and Media.

### **3.7 Transfer of Knowledge**

In order to contribute to the process of technology transfer to future organisers and to prepare the basis for the ORIS document update for the next Games, the ORIS TAO team will use the Games Questionnaires to document the FIVB, OC and media findings, comments and suggestions for improvement.

## **3.8 Support**

The IOC ORIS extranet is the platform used to share all documents related to ORIS (current version of the ORIS Volleyball document, Homologation Test documentation, ORIS meeting documentation and reports, etc.). The IOC ORIS extranet is also used to record and share feedback within the ORIS Volleyball Working Group.

Access to the IOC ORIS extranet will be granted by the IOC ORIS extranet Manager.

## 1 Specifications

- Events: progression and competition format types

- The events are presented in traditional FIVB order
- A full overview of Progression and Competition Format types is included in Appendix A - Glossary

## 2 Competition

- Competition format

- Teams are divided into two pools (A and B) of six teams each. Each team plays every other team in its pool (preliminary round). The first four teams in each pool progress to the quarterfinals. The winners of the quarterfinals will advance to the semifinals. The winners of the semifinals will play for the gold and silver medals (gold medal match). The losers of the semifinals will play for the bronze medal (bronze medal match).

The teams ranked sixth in each pool will be tied as eleventh. The teams ranked fifth in each pool will be tied as ninth. The losers of the quarterfinal matches will be tied as fifth.

- Tie Break Rules

- At the completion of each match during pool play, the following ranking points will be awarded per match to each team:

|                       |                                   |
|-----------------------|-----------------------------------|
| Match won 3-0 or 3-1  | 3 ranking points                  |
| Match won 3-2         | 2 ranking points                  |
| Match lost 2-3        | 1 ranking point                   |
| Match lost 0-3 or 1-3 | 0 ranking points                  |
| Match forfeited       | 0 ranking points (25-0;25-0;25-0) |

Ranking in pools will be determined by the total number of ranking points. If a tie occurs during the team ranking process, the tie will be broken as follows:

- If two or more teams are tied by ranking points, ties will be broken by the number of matches won in the pool
- If they remain tied, ties will be broken by set ratio (sets won divided by sets lost in the pool matches)
- If they remain tied, ties will be broken by points ratio (points scored divided by points lost during all sets of the pool matches)
- If they remain tied, the team which won the last match between them will be ranked higher

When the tie in the points ratio is between three or more teams, a new classification of these teams will be made taking into consideration only the matches between the tied teams.

During the preliminary round (before the last match of the pool) only the first three pool ranking criteria will be used to establish the temporary rank.

- **Venue type**
  - Indoor
  - Single venue
- **Participation references**

# **Procedures**

## **1      Introduction**

The aim is to document the procedures to be followed to ensure an efficient results delivery and to determine who should act (when, where and how) in order to satisfy user information expectations.

The proposed procedures are based on the experience gained at previous Games and other large Volleyball events and, in some cases, include proposals on how to improve existing practices.

The responsibilities of each party involved in the production and delivery of specified outputs are precisely defined including the time frame or deadlines in which the parties have to fulfil them.

## **2 Results Service and Competition Management Support**

Roles and responsibilities of the key participants are documented in chronological order, starting a few months before the Games and ending with the production and distribution of the Results Book.

### **2.1 Pre-Games Activities**

Some competition-related information must be available as soon as INFO goes live.

The final few weeks before the Games can be hectic and the OC should anticipate the workload as much as possible.

#### **2.1.1 Schedules**

Schedules are available from a number of different sources prior to the Games (OC communications, official website, ticketing, etc.).

OC Technology must develop appropriate procedures to ensure that any schedule updates are promptly and accurately published and distributed to the users.

The Games competition schedule will be developed between the OC Competition Management and the FIVB Volleyball Events Director well in advance of the Games. This process must be initiated sufficiently early so that there is adequate time to ensure that data are complete and accurate. This schedule data should be used to build the integrated Games schedule navigation page and the schedule screens for each discipline in INFO.

Four (4) weeks before the Opening Ceremony, the Venue Results Manager should produce the output:

- Competition Schedule (C08A)

for verification and approval by OC Competition Management

OC Technology (Venue Results Manager and Technical Operations Centre) will then upload this file in INFO. This output will be available in PDF format on the day INFO goes live. Once the FIVB and OC Competition Management arrive at the venue, the output should be distributed accordingly.

The output "Competition Schedule" (C08A) will normally be produced only once for the entire Volleyball competition. However if changes to the schedule do occur, the output "Competition Schedule" (C08A) will be updated by OVR once they become owner of the data. It will be redistributed (at the end of the day) and marked as "REVISED".

The final version of the schedule will be updated for both the women's and men's events after the draw of the qualified teams into the pools. The public draw will be held after the last qualifying match/tournament and will be organised by the FIVB.

The FIVB Volleyball Events Director will provide the OC Competition Management with results of the draw and the match order within forty-eight (48) hours following the draw.

OC Technology will, based on information provided by the OC Competition Management, also produce the outputs:

- Activity List (C06)
- Training Schedule (C07A)
- Training Schedule by Team (C07B)

These outputs will become available on the day that INFO goes live, and will be distributed according to the ORIS distribution rules.

#### **2.1.2 Entries and Participant Data**

The entry process is managed by the Sport Entries sub-function within the OC Sport Department. In order to fulfil the ORIS requirements, special attention should be paid to the information to be collected through the entry forms (data to be captured are included in Appendix D - Supporting Documents).

### **2.1.2.1 After the Sport Entry Deadline**

All eligible athletes for the Games must have been entered by their NOCs by the Sport Entry Deadline, in accordance with the Qualification System.

After the Sport Entry Deadline, OC Technology will produce and update the outputs:

- Team Entries (C31T)
- Facts and Figures - Birthdays during the Games (N86F)

and make them available in INFO.

These outputs will be updated after each Delegation Registration Meeting (DRM) in case of replacement or data correction.

### **2.1.2.2 Participant data verification**

Emphasis should be placed on data accuracy and correct spelling and/or transcription of athlete and team names.

Information users, in particular the media, are used to seeing names spelt in a certain manner at other FIVB events, and the Games should be no different. At Games time, the space available to display a name (e.g. in an output or on a scoreboard screen) may vary considerably. It is therefore extremely important that all different name lengths (the maximum number of character spaces available) are verified before any team rosters are produced.

As soon as OVR becomes the owner of the participant data, the outputs:

- Entry Data Checklist (C38)
- Entry Data Checklist - Competition Officials (C39)

will be produced, with all name lengths to be used during the Games, and given to the FIVB office secretary for checking and approval.

The FIVB is responsible for the verification of data for all participants and will return the approved/corrected outputs to OC Technology no later than one (1) day before the Preliminary inquiry.

In Volleyball, the team name corresponds with the NOC name. In order to ensure that the current NOC names in the OVR system are according to the requirements set by the IOC NOC naming policy, OVR should also produce the output:

- Entry Data Checklist - Teams (C38C)

for verification by the OC Venue Results Manager or any other party involved in the verification process.

It is essential that only a single copy of the checklists circulates at any time in order to avoid errors.

After validation by the FIVB, the output:

- Provisional Team Roster (C33)

will be produced and distributed according to the ORIS distribution rules.

### **2.1.2.3 Competition officials**

No later than one (1) month before the Opening Ceremony, the OC Competition Management will provide the Venue Results Manager with the names and functions of all persons who may be included in the output "Competition Officials" (C35).

Four (4) days before INFO goes live, the Venue Results Manager should produce the output:

- Competition Officials (C35)

for verification and approval by the OC Competition Management. Once approved, this output will be available in PDF format on the day INFO goes live. Once the FIVB and OC Competition Management arrive at the venue, the output should be distributed according to the ORIS distribution rules.

## **2.1.2.4 Replacement of an athlete**

### **2.1.2.4.1 Late athlete replacement**

Only those athletes who are eligible can be used as replacements and should be included in the initial data transfer to OVR.

Once the Late Athlete Replacement (LAR) procedure has been completed and Sport Entries has confirmed the change to the Venue Results Manager, the replacement athlete should be activated and the relevant output "Entry Data Checklist" (C38) should be produced for validation as defined in the participant data verification process. At the same time, the replaced athlete should be removed from the entries and the entry output(s) updated accordingly.

This procedure must be completed before the General Technical meeting.

If any output including the replaced athlete name has been released it should be reissued, marked as "REVISED", with a free text note explaining the replacement.

## **2.1.2.5 FIVB unique athlete identification**

The FIVB has implemented a unique athlete identification (player ID) with six digits.

## **2.2 Pre-Competition Activities**

After the FIVB officials arrive in the host city, they will work with the OC Competition Management on the final preparations for the Games. During the period before the Preliminary inquiry, a lot of time will be spent on final checking of the participant data and the preparation, checking and correction of other information if necessary.

### **2.2.1 Presenters at Victory Ceremonies**

No later than ten (10) days before the first day of competition the IOC and the FIVB will provide OC Technology and ONS with the list of potential presenters and persons accompanying them, that will include all data necessary for presenting this information for the Victory Ceremonies.

### **2.2.2 Preliminary inquiry**

The Preliminary inquiry will be held one day before the General Technical meeting. The FIVB Control Committee and OC Competition Management will present the outputs:

- Provisional Team Roster (C33)
- Entry Data Checklist (C38)

which are produced by OC Technology during the Preliminary inquiry to the team managers and coaches for checking and approval. Each team manager will confirm the final roster for his/her team to the FIVB Control Committee.

After the team managers have confirmed data and signed the "Entry Data Checklist" (C38), the FIVB Control Committee member will sign the "Entry Data Checklist" (C38) and "Provisional Team Roster" (C33). If corrections are required, OC Technology will immediately update and produce the outputs for approval by the team managers and coaches. The FIVB Control Committee member will check and approve the changes. This process will be fully supported by OC Technology.

The teams can change up to two players (only in the case of injury confirmed by the FIVB Medical Delegate) between the Preliminary inquiry and the General Technical meeting. OC Technology will update the roster after the Preliminary inquiry incorporating changes approved by the FIVB Technical Delegate. After the General Technical meeting the rosters are final.

Neither team composition nor shirt numbers may be changed once the FIVB Control Committee has certified the roster for each team. Once the final roster for each team has been received, within one (1) hour OC Technology will produce the output:

- Team Roster (C33)

for each team. This roster will be included in the Daily Bulletin #1 and distributed according to the ORIS distribution rules.

The FIVB Control Committee will assign the uniform colours for all preliminary round matches at the end of the Preliminary inquiry meeting. OC Technology will enter this information into the computer system and produce the output:

- Uniform Colours [O-1] (C08B) (for preliminary round)

The uniform colours for the preliminary round will be confirmed during the General Technical meeting. OC Technology will apply the changes and distribute the output according to the ORIS distribution rules.

The FIVB Control Committee will assign uniform colours for subsequent phases after each competition phase is completed. OC Technology will enter this information into the computer system and produce the output:

- Uniform Colours [O-1] (C08B)

for distribution according to the ORIS distribution rules.

### **2.2.3 General Technical meeting**

At the General Technical meeting, held two (2) days before the start of competition, the FIVB Control Committee will present the final composition of each team's roster.

The outputs:

- Team Roster (C33)
  - Uniform Colours [O-1] (C08B) (for preliminary round)
- will be included in the Daily Bulletin #1.

## **2.3 Results Processing**

### **2.3.1 Results processing for the Men's and Women's tournament**

#### **2.3.1.1 Before the first match of the day**

The FIVB will appoint officials (game jury, referees, line judges and scorers) for all matches on the following day no later than twenty-four (24) hours before the first scheduled match of that day.

The completed and signed Daily Refereeing Duty Roster [R-3] (including information about all assigned officials for all matches) will be given by the nominated FIVB Control Committee member, to the OG Refereeing Manager, who will pass the output on to OC Technology. This data should be immediately entered into the computer system by OC Technology in order to produce the output:

- Daily Competition Schedule - Nomination of Match Officials (C58)

for the following day's matches. The output will be distributed according to the ORIS distribution rules.

Should an appointment for a match be changed after it is entered into the computer system, OC Technology will be informed of the change, and will update the computer system. The changes to the output "Daily Competition Schedule - Nomination of Match Officials" (C58) must be updated electronically, but will not be redistributed after a change since this information is available in other outputs.

#### **2.3.1.2 Before, during and after all matches**

No later than one (1) hour prior to the scheduled time for each match, OVR will produce the output:

- Match Result Report [O-4] (C65A)

to be placed on the game jury table for the FIVB Control Committee member assigned as the Game Jury President, and the output:

- Start List [P1] (C51)

for distribution according to the ORIS distribution rules.

The OC Competition Management is responsible for the preparation of the following outputs and for placing them on the game jury table:

- The electronic scoresheet will be prepared by the FIVB
- Refereeing Evaluation [R-4]
- Line-Up Sheet [R-5]

If there are changes at any time to the start list after it has been distributed, the output:

- Start List [P1] (C51)

will be updated to show the changes, marked as "REVISED" and redistributed.

The Game Jury President or the FIVB designated person will sign the completed "Match Result Report [O-4]" (C65A) (provided one (1) hour before the match) immediately after the end of the match.

OVR will print "Match Results [P2]" (C73) immediately (within one (1) minute) after the match and give it to the Game Jury President or the FIVB designated person to be checked. He/she will compare the "Match Results [P2]" (C73) with the "Match Result Report [O-4]" (C65A).

If the output:

- Match Results [P2] (C73)

is correct the Game Jury President will sign it and give approval for distribution.

If the output "Match Results [P2]" (C73) is not correct, the Game Jury President will return it to OVR for correction. After correction, the process will be repeated. If any issue is identified in the statistics, distribution of all the statistics outputs should be held until the problem is corrected. It is recommended that this verification process is carried out after each set.

No later than two (2) minutes after verification, the outputs:

- Match Results [P2] (C73)
- Match Statistics [P3] (C83)
- Play by Play (C69)
- Cumulative Statistics by Skills (C84A)
- Results Table - Preliminary Round [P4] (C76A) during the preliminary round

or

- Results Table - Final Round [P4] (C76B), during the final round
- Final Standings [P4] (C76C), during the final round
- Team Ranking by Skill [P6] (C84B)
- Player Ranking by Skill [P5] - INFO (C85B)

will be available in INFO.

No later than five (5) minutes after verification, the outputs:

- Match Results [P2] (C73)
- Match Statistics [P3] (C83)

will be printed and distributed by OC Technology according to the ORIS distribution rules.

Should any correction be required to any previously distributed output, the output will be marked as "REVISED" and redistributed.

### **2.3.1.3 After the last match of the day**

No later than five (5) minutes after the end of the competition day (the end of the last match), the output:

- Results Table - Preliminary Round [P4] (C76A) during the preliminary round
- or
- Results Table - Final Round [P4] (C76B), during the final round

will be printed for verification and approval by the FIVB Technical Delegate or the designated person.

Immediately after approval, the output:

- Results Table - Preliminary Round [P4] (C76A) during the preliminary round
- or
- Results Table - Final Round [P4] (C76B), during the final round

will be printed and distributed according to the ORIS distribution rules.

No later than fifteen (15) minutes after the end of the competition day (the end of the last match), the following outputs:

- Team Ranking by Skill [P6] (C84B)
- Player Ranking by Skill [P5] (C85A)

will be printed and distributed by OC Technology according to the ORIS distribution rules.

### **2.3.1.4 After the end of each pool**

No later than two (2) minutes after the end of each pool, the output:

- Final Standings [P4] (C76C)

will be available in INFO.

### **2.3.1.5 After the end of the preliminary round**

After the end of the preliminary round, the FIVB will draw the matches A2/A3 vs B2/B3 and set the match times for the quarterfinal matches.

The FIVB Control Committee will assign the uniform colours for the quarterfinal matches after the end of the draw for the quarterfinal matches. OC Technology will enter this information into the computer system and will produce the following outputs:

- Uniform Colours [O-1] (C08B)
- Results Table - Final Round [P4] (C76B)

for distribution according to the ORIS distribution rules.

### **2.3.1.6 After the end of the quarterfinals**

After the end of the quarterfinals the FIVB will set the match times for the semifinal matches.

The FIVB Control Committee will assign the uniform colours for the semifinal matches after the end of the quarterfinals. OC Technology will enter this information into the computer system and will produce the following output:

- Uniform Colours [O-1] (C08B)

for distribution according to the ORIS distribution rules.

### **2.3.1.7 After the end of the semifinals**

The FIVB Control Committee will assign the uniform colours for the gold and bronze medal matches after the end of the semifinals. OC Technology will enter this information into the computer system and will produce the following output:

- Uniform Colours [O-1] (C08B)

for distribution according to the ORIS distribution rules.

### **2.3.1.8 Additional procedure after a bronze medal match**

No later than five (5) minutes after the results of the bronze medal match are approved, OC Technology should produce the outputs:

- Medallists (Team) (C92C)
- Medallists by Event (C93)
- Medal Standings (C95)
- FIVB Medal Standings (C97)

and distribute them according to the ORIS distribution rules.

### **2.3.1.9 Additional procedure before and after a gold medal match**

#### **2.3.1.9.1 Before a gold medal match**

No later than sixty (60) minutes before the gold medal match the OC Protocol should provide ONS and OC Technology with the names of potential presenter(s) and accompanying person(s).

As soon as the presenters are known by OC Protocol, the output:

- Medal Presenters (N91B)

should be produced and distributed according to the ORIS distribution rules.

Late changes frequently occur shortly before the Victory Ceremonies. Any such changes should be communicated immediately by the OC Venue Protocol Manager to OC Technology, Sport Production and ONS.

#### **2.3.1.9.2 After a gold medal match**

During the process of approval of the output "Match Results [P2]" (C73), the FIVB TD must provide OC Technology with the names of the **tournament Dream Team**.

OC Technology must manually update the output "Final Standings [P4]" (C76C) with the name of the MVP. The names of the best players by skills on the output "Final Standings [P4]" (C76C) will be

updated automatically. It should be possible to manually change the names of the **tournament Dream Team**. The Game Jury President or the designated person will check and approve the output "Final Standings [P4]" (C76C) before distribution.

No later than five (5) minutes after the results of the gold medal match are approved, OC Technology should produce the outputs:

- Final Standings [P4] (C76C)
- Medallists (Team) (C92C)
- Medallists by Event (C93)
- Medal Standings (C95)
- FIVB Medal Standings (C97)

and distribute them according to the ORIS distribution rules.

#### **2.3.1.9.3 Final classification**

A complete final ranking list of all teams who competed in an event is required by the Press Agencies. A complete ranking list may also be required to award the eighth Diploma in case of a possible disqualification among the first eight ranked teams.

Please see Appendix - C Rules for Data Formats and Presentation, topic "Final classification" for a full description of the ranking method.

## **2.4 Common Sport Functions**

### **2.4.1 Official Communications**

The FIVB or the designated person may issue the output:

- Official Communication (C67)

to inform all clients about key decisions (e.g. schedule and results changes) or to communicate significant information that media and broadcasters should know.

If any such decision is made, the FIVB Control Committee president or the designated person will, within the following five (5) minutes, complete the text of the decisions made on the appropriate form. The following information should be included:

- Who made the decision
- The event and/or player and/or team affected
- The date and time of the decision
- The text of the decision
- The affected area (results, schedule or other)

OC Technology will receive the form, enter it into the OC computer system and print a copy of the output "Official Communication" (C67) within two (2) minutes.

As soon as the FIVB Press Officer or the designated person has authorised the copy, it will be distributed immediately according to the ORIS distribution rules. All affected outputs should be updated and republished as "REVISED" as soon as possible. If the Results Book has already been produced, an updated version should be published.

An appropriate form is included in Appendix D of this document.

Note: If an "Official Communication" (C67) affects a Games stakeholder or partner, they should be consulted before releasing the output for distribution.

### **2.4.2 Sport Communications**

The output:

- Sport Communication (C68)

should be used to inform a sport specific audience about information or decisions from the FIVB, the IOC and/or the OC Competition Management (e.g. reminders, sport information, etc.).

The principles for the production of this output are similar to those described for the output "Official Communication" (C67). Paper distribution is limited to the venue, the Sport Information Desk at the athletes' village and in INFO.

## **2.5 Exceptional Situations Handling**

For any of the following exceptional situations, the FIVB may request production of the output:

- Official Communication (C67)

and will provide the appropriate text to be used.

### **2.5.1 Schedule Changes**

The following schedule status options are applicable to an event or event unit (match):

#### **2.5.1.1 Delayed**

A delay may occur if a match does not start as scheduled, but should start within the current ticketing session.

The new start time is unknown. If the delay exceeds the current ticketing session, the status will be changed to postponed, rescheduled or cancelled.

#### **2.5.1.2 Postponed**

A match did not start as scheduled and has been postponed to a later ticketing session. The new date and start time is unknown. The status will subsequently be changed to rescheduled or cancelled.

If an interrupted match cannot be resumed within the current ticketing session and the new date and start time is unknown, the status will be changed to postponed. The status will subsequently be changed to rescheduled or cancelled.

#### **2.5.1.3 Interrupted**

A match may be subject to an unplanned interruption after it has started.

The time of restart is unknown. If the match cannot be completed within the current ticketing session, the status will be changed to postponed, rescheduled or cancelled.

For additional actions see chapter 2.5.2.1 "Prolonged interruptions during a match".

#### **2.5.1.4 Rescheduled**

A match may be rescheduled if it cannot be held at the originally scheduled start date/time.

The new date and start time are known. If it is impossible to reschedule a session or phase of competition within a certain time frame, the status may be changed to cancelled. Start lists will be reissued as "REVISED".

The FIVB will be responsible for communicating changes to OC Technology in order to update the outputs:

- Competition Schedule (C08A)
- Uniform Colours [O-1] (C08B)
- Competition Schedule (Remaining Matches) (C08C)
- Daily Competition Schedule - Nomination of Match Officials (C58)
- Results Table - Preliminary Round [P4] (C76A) during the preliminary round  
or
- Results Table - Final Round [P4] (C76B), during the final round

#### **2.5.1.5 Cancelled**

A match which cannot be rescheduled prior to the Closing Ceremony of the Olympic Games is cancelled.

In such a case the IOC and the FIVB will decide what effect the situation would have on the tournament and what actions should be taken.

If one or more event(s) is cancelled, all affected outputs (e.g. medal outputs, etc.) must be adjusted and a free text note listing the cancelled event(s) should be added.

## **2.5.2 Competition Related**

### **2.5.2.1 Prolonged interruptions during a match**

Should play be stopped part of the way through a match (due to a power failure, etc.) any scores or statistics accumulated to that point in the match will not be included in the cumulative totals for the tournament until the match is completed.

If a match restarts from the point of interruption (including current set), the statistics accumulated to the point at which the match was suspended are retained and additional statistics resulting from the completion of the match are added to them.

If a match restarts from the point of interruption (not including the current set), the statistics accumulated for completed sets are retained, statistics for the set in progress at the time of the suspension are cancelled and additional statistics resulting from the subsequent completion of the match are added to them.

If a match restarts from the beginning of the match (rescheduled), no statistics are retained from the cancelled match. The FIVB will be responsible for communicating changes to OC Technology in order to update the outputs:

- Competition Schedule (C08A)
  - Uniform Colours [O-1] (C08B)
  - Competition Schedule (Remaining Matches) (C08C)
  - Daily Competition Schedule - Nomination of Match Officials (C58)
  - Results Table - Preliminary Round [P4] (C76A) during the preliminary round
- or
- Results Table - Final Round [P4] (C76B), during the final round

### **2.5.2.2 Disqualification or suspension of an individual player**

If a player is disqualified for one or more matches, or is suspended from the remainder of the tournament, the following actions should be taken:

- Player disqualified for one or more matches:
  - Start List [P1] (C51) - The player should not appear among the 12 players featured on the start list. An explanation (free text note) of the disqualification indicating the name of the player disqualified, his shirt number and the number of matches for which the player is disqualified should be displayed.
  - Cumulative Statistics by Skills (C84A) - The tournament statistics for the disqualified player should be maintained and reported appropriately for the duration of the tournament
- Player suspended from the tournament:
  - Team Roster (C33) - The player should be shown at the bottom of the list, with an "(S)" in place of the shirt number. A "REVISED" stamp should be displayed as well as an explanation (free text note) of the suspension.
  - Cumulative Statistics by Skills (C84A) - The tournament statistics for the suspended player should be maintained and reported appropriately for the duration of the tournament. The player should be shown at the bottom of the list with an "(S)" in place of the shirt number.
  - Team Ranking by Skill [P6] (C84B) - The tournament statistics for the team should be maintained and reported appropriately for the duration of the tournament
  - Player Ranking by Skill [P5] (C85A) and Player Ranking by Skill [P5] - INFO (C85B) - The player should not be listed on these outputs
  - Suspended players will not be listed on the Medallists (Team) (C92C) and Medallists by Event (C93) outputs

*Note that the FIVB Sports Regulations refers to "disqualification for one or more matches" and "suspension from the entire tournament", the above text uses this terminology.*

### **2.5.2.3 Redesignation of Libero**

The following cases should be handled:

- Team with two Liberos:
  - When a team uses two Liberos but one becomes unable to play (expelled, ill, injured, etc.), the team has the right to play with only one Libero and the second Libero becomes the Acting Libero. No redesignation will be allowed unless the Acting Libero is unable to play for the match and the remaining Libero has also been declared unable to continue.
- Team with only one Libero registered on the score sheet:
  - If the Libero is declared unable to play, the coach may redesignate as Libero for the remainder of the match, any other player (with exception of the replacement player) not on the court at the moment of the redesignation. The coach (or game captain, if no coach is present) must contact the second referee with the request for "redesignation".
  - Should the redesignated Libero be declared unable to play, further redesignations are possible but the original Libero(s) may not return to the match.
  - If the coach requests that the Team Captain be redesignated as the Libero, this will be permitted - but the Team Captain must in this case relinquish all leadership privileges.
  - In the case of a redesigned Libero, the shirt number of the player redesigned as Libero must be recorded on the score sheet remarks section and on the Libero Control sheet (or electronic score sheet, if one is used). The redesigned player will be allocated a jacket or bib to show that a new Libero is in play.
- Expulsion and disqualification:
  - If the Libero is expelled or disqualified he/she may be replaced directly by the team's other Libero. Should the team have only one Libero, then it must play without a Libero for the duration of the sanction.

### **2.5.2.4 Forfeit declared for a team**

A forfeit can be declared for a team:

- If a team cannot play a match due to breach of the FIVB rules (e.g. as per the FIVB Rules of the Game "if a team refuses to play after being summoned to do so", etc.), the team will lose the match by forfeit (0 ranking points, 0:25 for each set and 0:3 for the match). The team statistics and statistics for players for the tournament will be maintained.
- "A team that is declared INCOMPLETE (fewer than six available players on the court) for the set or for the match, loses the set or the match. The opponent team is given the points, or the points and the sets, needed to win the set or the match. The incomplete team keeps its points and sets." The team statistics and statistics for players for the match and the tournament will be maintained.
- "Players who refuse to undergo the anti-doping test will be automatically suspended from the tournament and the team concerned will lose the current match 0:3." The team statistics and statistics for players for the match will be cancelled but the statistics for the tournament will be maintained.

### **2.5.2.5 Elimination of a team**

A team can be eliminated from the tournament or can declare voluntary forfeit. The action that must be taken is different, depending at which point the elimination occurs in the progression of the tournament. There are three distinct cases to be handled by the computer system.

- The team is eliminated from the tournament during or after the preliminary round but before any matches have been played by any teams in the final round. There are three possible decisions of the FIVB Control Committee:
  - The team will either lose remaining matches of the preliminary round by 0:3 or all the matches of the disqualified team will be forfeited (0:3) (0 ranking points, 0:3 sets, 0:25 points for each set). If all the matches of the disqualified team are forfeited, the outputs "Match Results [P2]" (C73) of the already played matches must be updated. A "REVISED" stamp should be displayed as well as an explanation (free text note) of the disqualification.

- Discard all results of the disqualified team and consider the pool as five teams. The disqualified team will be shown at the bottom with no results and with "DSQ" as rank.
- The ranking in the pool will be adjusted (without recalculating results) by moving the disqualified team to the bottom with no results (marked as DSQ) and the remaining teams will be shifted up.
- In all the above cases, all the team and individual statistics for the matches of the disqualified team will be removed and recalculated
- The team is eliminated from the tournament after a match in the final round;
  - Results Table - Final Round [P4] (C76B) is reissued showing the last match played by the team as a forfeited (0:3) loss. The opposing team from that match will advance to the next round. If a team from a semifinal match is eliminated, the loser of the other semifinal match will win the bronze medal. An explanation (free text note) of the disqualification should be displayed.
  - The team statistics and statistics for players will be removed and recalculated
  - All the match results and team statistics must be updated. A "REVISED" stamp should be displayed as well as an explanation (free text note) of the disqualification.
  - Final Standings [P4] (C76C) - The team will be either placed at the bottom with "DSQ" as rank or will be ranked according to the decision of the FIVB Control Committee
- A team is eliminated from the tournament after the gold medal match is completed;
  - All rankings are adjusted, and appropriate medals are re-awarded
  - The team statistics and statistics for players on the team will be maintained

Note the FIVB General Regulations for International Volleyball Competitions:

- "Voluntary forfeit of a team before or during a match entails its exclusion from the competition with the following consequences: a) from that moment the team must cover its own expenses; b) damages and other sanctions may be decided by the FIVB Board of Administration; c) all matches previously played will be declared forfeited 0-3 (0:25,0:25,0:25)"

Software must be capable of handling this situation.

### **2.5.3 Disqualifications**

#### **2.5.3.1 Disqualification after an event and up to three days after the Closing Ceremony**

This three (3) day period corresponds to the time for which the Court of Arbitration for Sport remains in the host city after the Games, and is available to pronounce on a disqualification in case of appeal.

Up to this deadline, OC Technology will update all results as required. All updated outputs should be approved by the FIVB, or the designated person before distribution.

#### **2.5.3.2 Disqualification more than three days after the Closing Ceremony**

Starting from the 4<sup>th</sup> day after the Games Closing Ceremony, the FIVB will become responsible for updating the results if necessary. Disqualifications may come from either the IOC or the FIVB. The FIVB is responsible for providing the updated results to the IOC.

### **2.5.4 Communication in case of disqualification by the IOC Disciplinary Commission**

If an athlete or a team is disqualified by the IOC Disciplinary Commission after the results of an event have been made official and distributed and up to three (3) days (inclusive) after the Games Closing Ceremony, the IOC Disciplinary Commission will communicate its decision through the IOC official communication channels (press release and publication on [www.olympic.org](http://www.olympic.org)).

The athlete/team, the athlete's/team's NOC, the FIVB, OC Competition Management and OC Technology will be informed following the established IOC procedure.

The FIVB, or the designated person, should, together with OC Technology, produce an "Official Communication" (C67) explaining that results have been updated according to the IOC Disciplinary Commission decision.

The sample text to be used in this Official Communication (C67) is detailed in Appendix D of this document (For athlete: Subtitle: I, Summary: 10, Issued by: I, Further information: iv. For team: Subtitle: J, Summary: 11, Issued by: I, Further information: iv).

As soon as the decision for disqualification is made public by the IOC, the following procedures should be followed:

- ONS should copy the IOC press release and paste it without any modifications into the output "IOC News" (N90C) and publish it in INFO
- As soon as the FIVB, or the designated person, has authorised its release, the output "Official Communication" (C67) will be distributed according to the ORIS distribution rules
- OC Technology will update and republish all affected outputs with a "REVISED" stamp and a free text note explaining the disqualification

Since such a decision can occur at any time, and publication of accurate information is extremely time critical, it is vital that the FIVB or the designated person, is available and able to communicate with the OC Competition Management, OC Technology and the IOC Head of ORIS at all times. This includes the period before the Games start, the period after the Volleyball competition ends, and the period after the Games end (up to three (3) days after the Closing Ceremony). Travel by the FIVB during those periods before or after the Games may require that a designated person be available to cover this responsibility.

**Note: Authors of this ORIS document do not imply that this is a complete list of exceptional situations that could occur before, during or after the competition. The OC and their technology suppliers are responsible for researching any missing information in the relevant FIVB and/or IOC documents and for gaining and analysing experience from other competitions.**

## 2.6 Reissuing Outputs

There are two conditions for reissuing an output:

- A new version of a previously distributed output is produced as a regular case: no stamp is required. This applies to the following outputs:
  - Competition Schedule (Remaining Matches) (C08C)
  - Results Table - Preliminary Round [P4] (C76A)
  - Results Table - Final Round [P4] (C76B)
  - Final Standings [P4] (C76C)
  - Cumulative Statistics (C84A)
  - Team Ranking by Skill [P6] (C84B)
  - Player Ranking by Skill [P5] (C85A)
  - Medallists (Team) (C92C)
  - Medallists by Event (C93)
  - Medal Standings (C95)
  - FIVB Medal Standings (C97)
- A new version of a previously distributed output is produced due to a change of data: a "REVISED" stamp is required, including the date and time of output creation. The reason for the revision must be explained as a note (free text) at the bottom of the last page of the output.

For outputs which need to be reissued with a "REVISED" stamp and have an "at time" in the heading, the following rules will apply:

If an error needs to be corrected (e.g. data entry error), the same "at time" should be kept as used in the originally released version of this output

If an update needs to be made based on new information received (e.g. data change), the "at time" should be adjusted to the time at which this new information was provided

Note: The outputs "Official Communication" (C67) or "Sport Communication" (C68) will not be issued with a "REVISED" stamp. If a C67 or C68 needs to be corrected, a new output (with a new item number) should be produced.

## 2.7 Results Book

The Results Book should contain the documents below, in the following order:

- Volleyball cover page
- Version History (only if more than one version of the Results Book is produced)
- Competition Format and Rules (N02)
- FIVB Medal Standings (C97) (if Volleyball finishes last)

For each of the FIVB events (in traditional FIVB order):

- Medallists (Team) (C92C)
- Final Standings [P4] (C76C)
- Team Roster (C33) (in alphabetical order by NOC)
- Results Table - Final Round [P4] (C76B)
- Match Results [P2] (C73) (in the following order: gold medal match, bronze medal match, semifinal matches chronologically, quarterfinal matches chronologically)
- Results Table - Preliminary Round [P4] (C76A)
- Match Results [P2] (C73) (in the following order: matches grouped by pool (pool A first) chronologically)
- Player Ranking by Skill [P5] (C85A)
- Team Ranking by Skill [P6] (C84B)
- Competition Officials (C35)
- Official Communication (C67) (only those affecting the results, ordered by news item number)

All outputs to be included in the Results Book will be the last version produced. If any included output has been reissued as revised it will show the "REVISED" stamp.

Navigation within the Results Book should be facilitated by the use of bookmarks.

Results Books must be clearly identified with version number and date and time of production. If more than one version of the Results Book is produced, the changes should be described in the Version History.

The OC will produce the Results Book electronically, in PDF format, and make it available for download no later than one (1) day after the Volleyball competition has finished.

This Results Book will be made available to at least the following parties:

- The IOC
- The FIVB
- All NOCs
- Accredited media

## **2.8 Daily Bulletin Protocol**

The Daily Bulletin protocol should be provided during the Games beginning with distribution at the General Technical meeting. The Bulletin should be a collection of the most important outputs issued during a day of competition. Distributing the set of outputs to designated recipients would decrease the quantity of printed material. A Daily Bulletin should be distributed to all FIVB officials (control committee, referees) in hotels and teams (five copies per team) in the Olympic Village.

The Daily Bulletin will include:

### **3 News Service and Background Information**

Data for all Biographies and Historical Results will be supplied by the IOC to the OC.

The IOC has contracted this data collection, integration and delivery to a third party provider. However, the IOC retains full responsibility for this process.

The schedule for delivery of these data is defined by contract. Together with the third party provider, the OC will be responsible for the testing of the transfer mechanism prior to the Test Event and during the Homologation Test. Transfer mechanisms are subject to IOC approval.

The OC and the IOC, together or in parallel, will undertake data quality testing at certain key points in the build-up to the Games.

The FIVB agrees to supply all requested data, in accordance with a schedule agreed between the parties.

The FIVB cannot guarantee that all mandatory data items requested to produce the relevant outputs will be included in the data provided.

Checking and updating of data from the FIVB and adding missing data shall remain the provider's sole responsibility.

The delivery schedules will be agreed between the FIVB and the third party provider. Schedules may be different depending on the type of data.

The FIVB wishes to validate part or all of the final data delivered by the provider. In that case, the FIVB and the third party provider will agree on a schedule covering the validation process which will be finished before INFO goes live.

The provider will update data after final delivery as required (corrections, information updates, etc.). The IOC will act as a facilitator between the FIVB, the OC and the provider.

Before the Games, and within three (3) months following the Closing Ceremony, the IOC will make this data available to the FIVB and all NOCs, in an agreed format.

#### **3.1 Historical Results**

The following historical data outputs will be available in INFO when it goes live:

- Medallists from previous Olympic Games (N10)
- Medals by NOC (N11)
- Placing by NOC (N13)
- Multi-Medallists (N15)
- Results in Last Olympic Cycle (N17A)
- Current FIVB World Ranking (N17B)
- Head to Head (N62)

#### **3.2 Biographies and Profiles**

The following biography and profile outputs will be available in INFO when it goes live:

- Athlete Biography (N20)
- Coach Biography (N21)
- Team Profile (N22)
- Referee Biography (N23)
- NOC Profile (N24)

## **3.3 Facts and Figures**

### **3.3.1 Volleyball Background Information**

Data for the Volleyball background information will be developed by ONS, in cooperation with the OC Competition Management and the FIVB Volleyball Events Director well in advance of the Games. This process must be initiated sufficiently early so that there is adequate time to ensure that data are complete and accurate, and they will then be entered into the OC computer system. This procedure should be completed no later than one (1) month before the Games.

OC Technology will use these data to prepare the outputs:

- Facts and Figures - History (N86A)
- Facts and Figures - FIVB - Federation Facts (N86B)
- Facts and Figures - Qualification Criteria (N86C)

These outputs will first become available on the day that INFO goes live and will be distributed according to the ORIS distribution rules.

Should any of the data change, the FIVB Volleyball Events Director will immediately inform ONS who will update the information within one (1) working day.

### **3.3.2 Technical Background Information**

Technical background information will be developed by ONS, in cooperation with the OC Competition Management and the FIVB Volleyball Events Director well in advance of the Games. This process must be initiated sufficiently early so that there is adequate time to ensure that data are complete and accurate, and they will then be entered into the OC computer system. This procedure should be completed no later than one (1) month before the Games.

OC Technology will use these data to prepare the outputs:

- Competition Format and Rules (N02)
- Facts and Figures - Facility Description (N86D)
- Facts and Figures - Media Information (N86E)

and will send them to the FIVB Volleyball Events Director for verification.

These outputs will first become available on the day that INFO goes live and will be distributed according to the ORIS distribution rules.

Should any of the data change, ONS in consultation with the FIVB Volleyball Events Director will update the information within one (1) working day.

## **3.4 News**

There are potentially many different types of information produced under the category of "News". News items are generated during the Games by the Olympic News Service (ONS) at each venue and from the Main Press Centre.

To guarantee continuity news items must be assigned a sequential number.

### **3.4.1 Pre-competition News**

#### **3.4.1.1 Previews**

Since many journalists at the Games cover sports in which they may have limited experience, Sport Previews and Daily Previews can be extremely helpful for them.

No later than four (4) days before the first day of competition, the ORIS Volleyball Working Group recommends that ONS at the Volleyball venue produces the output:

- Sport Preview (N89)

and every evening for the following day, the output:

- Daily Preview (N89)

and the evening before the last day of the preliminary round, the output:

- Daily Preview - Progression (N89)

The daily previews should summarise the next day's activities for a discipline, focusing on the most newsworthy elements.

### **3.4.2 News During and After Competition**

Media covering Volleyball events remotely will need to receive information supplementing the results. ORIS recommends that ONS prepare the outputs described below.

#### **3.4.2.1 Flash quotes**

Throughout the Games ONS should produce quotes from athletes, coaches, medallists and any surprise performances in the output:

- Flash Quotes (N87A)

This output must be produced and distributed within fifteen (15) minutes after the quotes are taken.

A selection of the best quotes of each day of the Games should be produced by ONS in the output:

- Quotes of the Day (N87B)

and distributed according to the ORIS distribution rules.

Note: ONS should plan in advance to ensure easy access for interviewers and interpretation services, if required.

#### **3.4.2.2 Press conference highlights**

ONS should produce newsworthy press conference highlights in the output:

- Press Conference Highlights (N88)

This output must be produced and distributed no later than thirty (30) minutes after the press conference.

#### **3.4.2.3 Reviews**

ONS should produce competition highlights in the outputs:

- Match Review (N89)
- Daily Review (N89)
- Sport Review (N89)

## **3.5 Media Communications**

Useful information (concerning press conferences, announcements, changes in opening or closing times of the Venue Press Centre, etc.) should be communicated to the media in the output:

- Media Communication (N90A)

General information considered by ONS to be newsworthy (e.g. visitors to the venue, dignitaries, detailed description of equipment used, interesting statistics such as the number and names of world champions competing and missing, etc.) should be communicated to the media in the output:

- News Article (N90B)

ONS should use the output:

- IOC News (N90C)

to publish statements made by the IOC.

# Section 1 - Printable Outputs

## 1 Introduction

This section of the document presents samples for all printable outputs.

There are two groups of outputs:

- Competition related (C outputs)
- News and Background related (N outputs)

ORIS defined outputs are available as PDFs and/or in screen format.

Every output that is printed from a PDF or screen format should be formatted so that it meets the ORIS requirements, including the Look and Feel defined by the OC.

The basic objective has been to make user friendly samples which show the required information and how it should be presented in each output. Emphasis is placed on using data which is as realistic as possible. However, athletes' data may be modified to focus on the necessary types of data (e.g. actual results changed to show ties, IRMs, etc.), venue names used in the samples may differ from the actual Games venues, etc.

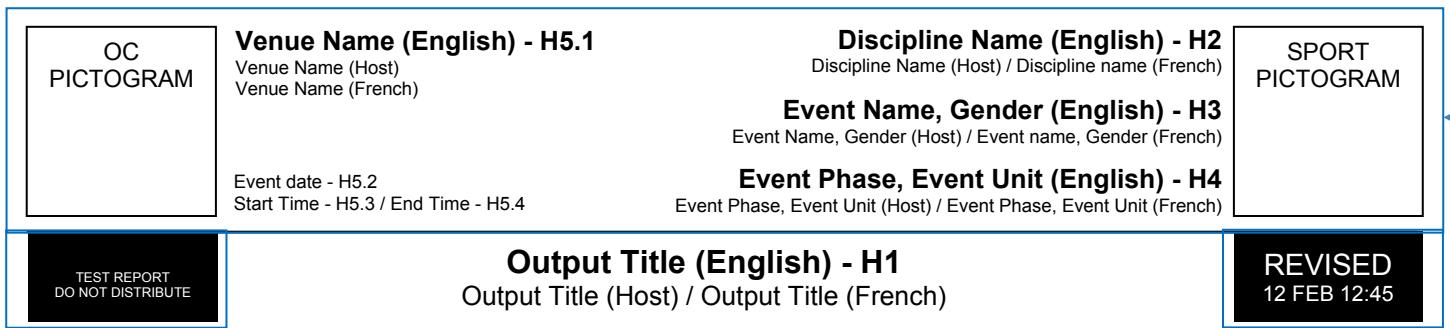

As it is impossible to find samples where all variations of data are used in the same output, in a number of samples some fields or data elements are missing. It should be **particularly noted** that schedule and quota data used in this document do **not** accurately reflect actual schedules and quotas.

Bearing this in mind, **samples should not be used as a reference for complete output definition**, including all possible data variations. All possible data elements and values are included in the data matrix. In all cases the **IF rules should be considered as the primary source** for data processing.

A detailed explanation of the structure of the output samples, description table and data matrix can be found in the "Look & Structure" output.

Rules for Data Formats and Presentation are described in the Appendix C.

*This page intentionally left blank.*

As of dd MMM yyyy at HH:MM - H6

This is a standard sample to illustrate possible positions of the output header data, stamps and footer.  
It is the responsibility of the OC to define the actual look of the printed outputs (separate document).

## Output body

### Content information:

The content for this part of the output is defined in each appropriate ORIS output.  
The requirements set in ORIS need to be met.

### Technical information:

All possible values for this part of the output are defined in the data matrix of each output.

Depending on the ORIS requirements for each output, an appropriate Note and/or a Legend may be included

The two free text lines are reserved for content related information e.g. explanations of IRMs, reason for a revised output, etc.

## L&S - Look and Structure of Outputs

### Description table

The description table gives an overview of output specific requirements and offers space for additional explanations.

|             |  |
|-------------|--|
| Description | A brief description of the purpose of this output  |
| Source      | Defines the source of the information for this output. Possible sources are: OC Competition Management , OC Technology, International Federation, etc.   |
| Sort by     | Defines the sort criteria by which the content of the output is sorted. The list of criteria will be as long as required to accurately define the sort order. The sort criteria are presented as follows: 1 - Criterion 1 2 - Criterion 2 3 - Criterion 3, etc.  |
| Page break  | Defines page breaks into logical groups (if the output does not fit onto a single page)  |
| Notes       | Note with static text: if a static Note is required for this output  |
|             | Note with predefined text: if a Note with predefined text is required for this output. All possible texts and conditions of predefined Notes will be listed here.  |
|             | Free text: refers to "Appendix C - Rules for Data Formats and Presentation"  |
| Legend      | Shows all possible abbreviations which could occur in this output. It also indicates if the Legend needs to be positioned on each page of the output or only on the last page of the output. Sports with a large number of possible results codes may state "See Appendix C - Rules for Data Formats and Presentation" rather than listing all results codes here. |
| IRM rules   | In most cases a reference to "See Appendix C - Rules for Data Formats and Presentation" is made here. If there are specific IRM rules for this output, they may be mentioned here.   |
| Comments    | Space for further explanations which cannot be included in the samples, in other rows of the description table above, or in the data matrix. These comments should support the users by giving extra information and explanations.   |

### Data matrix

The data matrix defines the required data items, and all possible values, needed in order to create the output. The data matrix follows the structure of the output in a logical order from the top to bottom and from the left to the right, wherever possible.

#### Columns

The column "Level" can be compared to the headings used for sections and subsections in a technical document:

"Levels" are ordered as follows:

- Whole integer levels (1, 2, 3, 4, etc.) represent a section heading. Each time a new section heading is required the next whole integer is used.
- Levels with two or more digits (1.1, 1.2.1, etc.) represent a subsection heading, or third level heading, etc., of the appropriate higher level heading (like a subsection heading in a technical document)
- The "(n)" in brackets after the level number indicates a "loop" for the values listed under that level or sublevel. Typically, data elements which are defined as "for each" have a level number containing an "(n)".

The column "Data Item" could be compared to the "section heading" (whole integer level numbers) with subsection headings (level numbers with decimal places).

The column "M/D" defines in general if that level is mandatory, desirable or not applicable/explanation only. The following main codes are used:

M      Mandatory

Ma     Mandatory - if applicable

Mc     Mandatory - required under conditions which are explained in the column for comments

D      Desirable - users found this information useful for their work and if an organiser can provide it, it would be appreciated but is not compulsory

Da     Desirable, but only if such data is available

Dc     Desirable under conditions which are explained in the column for comments

-- Not applicable / level explanation only

The column "Comments" includes all possible values of that level, additional conditions, explanations, etc.

## Organisation

The data matrix is basically divided into three parts:

- Header data
- Output body data
- Legend, Note and free text data

Note: some static elements (e.g. spelling "Start Time" in header or column titles) are not specifically listed in the data matrix. The data matrix only includes variable data fields.

## Header data levels

The header data elements are always defined in levels 1 to 6. These levels are always listed in each data matrix, regardless of the output requirements.

Output header example:

The corresponding data matrix levels are:

| Level | Data Item                                 | M/D | Comments   |
|-------|---|-----|--|
| 1     | Output title (H1)                         | M   | Text   |
| 2     | Sport discipline (H2)                     | M   | Text   |
| 3     | Event/Gender (H3)                         | M   | Standard FIS event name  |
| 4     | Phase & event unit (H4)                   | Mc  | Text - "Run 1" or "N Training" (N="1 <sup>st</sup> , 2 <sup>nd</sup> , 3 <sup>rd</sup> , etc.).<br>(Applicable for DH only if split in 2 runs.<br>N/A for SG). |
| 5     | Venue - date - start time - end time (H5) | --  |  |
| 5.1   | Venue name (H5.1)                         | M   | Text   |
| 5.2   | Event date (H5.2)                         | M   | Date - in the format defined in the OC Look and Feel standard  |
| 5.3   | Event start time (H5.3)                   | M   | Time - in the format defined in the OC Look and Feel standard  |
| 5.4   | Event end time (H5.4)                     | --  | NOT APPLICABLE   |
| 6     | As of date (H6)                           | --  | NOT APPLICABLE   |

Note: the levels 5.1, 5.2, 5.3 and 5.4 are sublevels of the main level 5 "Venue - date - start time - end time (H5)" since they define values which belong to the same main level (same "topic").

## Output body data levels

The output body data elements are defined in levels 7 and higher. In these levels only output specific requirements are listed.

Output body data example (extract 1):

| <b>Jury</b>    |                 | <b>Technical Data</b> |  |            |
|----------------|-----------------|-----------------------|--|------------|
| TD FIS         | KROGOLL Peter   | GER                   |  | Franz's GS |
| Referee        | SKAARDAL Atle   | FIS                   |  | 1177m      |
| Chief of Race  | HOLLIDAY Bruce  | CAN                   |  | 805m       |
| Start Referee  | KLAMMER Herbert | ITA                   |  | 372m       |
| Finish Referee | PALOVICOVA Jana | SVK                   |  | 8654/11/07 |

The corresponding data matrix levels are:

|       |                       |    |   |
|-------|-----------------------|----|---|
| 7 (n) | For each jury member  | -- |   |
| 7.1   | Function              | M  | Text - Assistant referee is only applicable for DH and SG |
| 7.2   | Family name           | M  | Text  |
| 7.3   | Given name            | M  | Text  |
| 7.4   | NOC code              | M  | Standard IOC NOC code or "FIS"                            |
| 8     | <b>Technical data</b> | -- |   |
| 8.1   | Course name           | M  | Text  |
| 8.2   | Start altitude        | M  | Numeric   |
| 8.3   | Finish altitude       | M  | Numeric   |
| 8.4   | Vertical drop         | M  | Numeric   |
| 8.5   | Course length         | Mc | Numeric<br>(N/A for GS and SL).                           |
| 8.6   | Homologation number   | M  | Text  |

Note: the levels 7.1, 7.2, 7.3 and 7.4 are sublevels of the main level 7 "For each Jury member" since they define values which belong to the same main level (topic). The "(n)" indicates that the following levels are a "loop", i.e. that levels 7.1 to 7.4 need to be repeated for each jury member. Level 8 represents a new topic and therefore is numbered as the next main level (8). Levels 8.1 to 8.6 are then sublevels of the main level 8. For level 8, no "(n)" is required since each data only appears once.

Output body data example (extract 2):

**Number of Competitors: 86, Number of NOCs: 47**

| Bib | FIS Code | Name                       | YB   | NOC Code | Time |
|-----|----------|----------------------------|------|----------|------|
| 1   | 205993   | <b>HOELZL Kathrin</b>      | 1984 | GER      |      |
| 2   | 205218   | <b>REBENSBURG Viktoria</b> | 1989 | GER      |      |
| 3   | 185140   | <b>POUTAINEN Tanja</b>     | 1980 | FIN      |      |
| 4   | 55838    | <b>ZETTEL Kathrin</b>      | 1986 | AUT      |      |

The corresponding data matrix levels are:

|        |                       |    |   |
|--------|-----------------------|----|---|
| 10     | Number of competitors | M  | Numeric   |
| 11     | Number of NOCs        | M  | Numeric   |
| 12 (n) | For each competitor   | -- |   |
| 12.1   | Bib number            | M  | Numeric   |
| 12.2   | FIS code              | M  | Numeric   |
| 12.3   | Family name           | M  | Text  |
| 12.4   | Given name            | M  | Text  |
| 12.5   | Year of birth         | M  | Year - in the format defined in the OC Look and Feel standard |
| 12.6   | NOC code              | M  | Standard IOC NOC code   |
| 12.7   | Time                  | M  | Space   |

Note: level 10 is a separate main level, only related to the "Number of competitors". Level 11 is the next main level, only related to the "Number of NOCs". Level 12 (n) is another main level, with the "(n)" indicating that the following levels 12.1 to 12.7 are a loop (data required for each competitor).

### Note, Legend, free text

The Note, Legend and free text elements are defined at the end of the data matrix. All these levels are always listed, regardless the output requirements.

Example:

|   |   |             |                |                |                |           |
|---|---|-------------|----------------|----------------|----------------|-----------|
| <b>Note:</b>                              | FIS points are from "Special OWG List". FIS WCSL points include all the FIS World Cup races before the Olympic Games. |             |                |                |                |           |

Note: level 8 is a separate main level, only related to the "Note with static text". Level 10 (n) is the main level for the Legend information. The "(n)" is used to indicate a loop since each abbreviation (10.1) and the appropriate description (10.2) need to appear.

Note 2: usually the level "Note with static text" starts as a main level (full number). In special cases, where the Note and Legend should be presented after each output body data, this could be numbered as a sublevel, as part of a level with a loop "(n)".

### Stamps

There are two types of stamps. The exact position of these stamps is defined in the separate OC document.

- "Test Report" stamp: this stamp should ensure that no test data is mistaken for real Games data
- "Revised" stamp: if a new version of a previously distributed output is produced (excluding those outputs which are regularly updated and reissued, e.g. outputs containing brackets, statistics, ranking, etc.), it must be stamped "REVISED" including the date and time of output creation. The reason for the revision must be explained as a free text note at the bottom of the last page of the output.

The revised date and time in the stamp is the same date and time as in the output footer data ("Report Creation").

For initial releases stamps are not required.

### Output footer data

Each output produced at the Games has clear and unique information in the footer data. These requirements are not listed in the ORIS data matrix, but defined and explained in a separate OC document. In order to have the full overview of an output layout, these data are briefly explained here:

- The "Report Identifier" consists of a nine characters Results System Code (RSC), the ORIS output number (without leading "C" or "N") and the version number
- The "Report Creation" shows the date and time and when the output was created
- The "Page x/y" indicates the current page number (x), and the total number of pages (y), of the output

# COMPETITION FORMAT AND RULES

## VOLLEYBALL

**As of 23 JUN 2016**

### **Olympic Competition Format**

There will be men's and women's Volleyball events at the Rio 2016 Olympic Games.

The competition for both men and women consists of the following rounds - preliminary round and final round (quarterfinals, semifinals and finals). There will be a total of 38 matches for men and 38 matches for women.

- Preliminary round: Two pools (A and B) composed of six teams each. Single round robin, where every team plays each of the five other teams in their pool.
- Quarterfinals: The first four teams in each preliminary pool will advance to the quarterfinals, eight teams in total. The format will be as follows: A1 vs B4, A4 vs B1 with the pairing for the remaining two matches being drawn (A2 vs B2 or B3, A3 vs B3 or B2).
- Semifinals: The four winners of the quarterfinals will advance to the semifinals. The format will be as follows: winner A1/B4 vs winner A3/B2 (B3), winner A2/B3 (B2) vs winner A4/B1.
- Finals: The winners of the two semifinals will play for the gold and silver medals (gold medal match). The losers of the two semifinals will play for the bronze medal (bronze medal match).

The teams ranked sixth in each pool will be tied as eleventh. The teams ranked fifth in each pool will be tied as ninth. The losers of the quarterfinal matches will be tied as fifth.

### **Differences between the FIVB World Championships and the Olympic Games**

The World Championships is an FIVB competition in which all the member nations have an opportunity to participate in several phases through which 24 teams advance to the final round. The final round of the World Championships is a tournament with 24 teams (men or women) organised by one of the FIVB member nations.

### **Changes since the London 2012 Olympic Games**

None

### **Sport Rules and Procedures**

#### **Scoring**

With the rally point system (sometimes referred to as RPS) the team winning a rally scores a point regardless of which team is serving. When a team wins a rally, it gains a point and the right to serve. The match format for international Volleyball competitions is the best of five sets to 25 points for sets one to four, and to 15 points for set five, with all sets requiring a two point advantage (unlimited).

At the completion of each match during pool play, the following ranking points will be awarded per match to each team:

|                       |                                   |
|-----------------------|-----------------------------------|
| Match won 3-0 or 3-1  | 3 ranking points                  |
| Match won 3-2         | 2 ranking points                  |
| Match lost 2-3        | 1 ranking point                   |
| Match lost 0-3 or 1-3 | 0 ranking points                  |
| Match forfeited       | 0 ranking points (25-0;25-0;25-0) |

#### **Ranking in Pools**

Ranking in pools will be determined by the total number of ranking points. If a tie occurs during the team ranking process, the tie will be broken as follows:

1. If two or more teams are tied by ranking points, ties will be broken by the number of matches won in the pool
2. If they remain tied, ties will be broken by set ratio (sets won divided by sets lost in the pool matches)
3. If they remain tied, ties will be broken by points ratio (points scored divided by points lost during all sets of the pool matches)

4. If they remain tied, the team which won the last match between them will be ranked higher

When the tie in the points ratio is between three or more teams, a new classification of these teams will be made taking into consideration only the between the tied teams.

During the preliminary round (before the last match of the pool), only the first three pool ranking criteria will be used to establish the temporary rank.

### **Penalties / Disqualification Rules**

A player may be sanctioned for misconduct during a match. A referee may issue a warning, yellow card (penalty e.g. team loses a rally), red card (expulsion for the rest of the set), red and yellow card (disqualification for the rest of the match). A player may be disqualified for one or more matches (decision of the Control Committee).

In the case of major violation of the FIVB rules or a positive drug test, a player will be suspended for the rest of the tournament with no replacement.

### **Protests / Appeals**

Disputes will be resolved under FIVB regulations. The jury will decide on matters submitted to it, in accordance with the FIVB regulations. All protests and appeals must be lodged with the jury in writing no later than 60 minutes after the end of the match. Protests based on the rules of the game will be heard by the refereeing sub-committee and passed on to the jury, accompanied by its decision, no later than six hours after the protest is submitted. A final verdict will be given by the jury no later than 12 hours after the protest is submitted. Jury members of the same nationality as the team making a protest will be excluded from the deliberations when the protest is being studied.

### **Control Committee**

The judges and jury for Volleyball are chosen in accordance with FIVB regulations. The FIVB Board of Administration will appoint 18 control committee members and two technical delegates, who will also perform the duties of Jury of Appeal for Volleyball.

### **Appointment of Referees**

The FIVB will be responsible for appointing all referees and competition officials for Volleyball, 20 international referees from the FIVB pool and two referees from the host international pool. There will be a total of 22 referees for Volleyball.

### **Game Description**

Volleyball is a sport played by two teams on a playing court divided by a net. There are several different versions of the game which make it accessible to everyone.

The object of the game is to send the ball over the net in order to ground it on the opponent's court, and to prevent the opponent from doing the same. Each team has three hits to return the ball (in addition to the block contact).

The ball is put in play with a service hit by the server over the net to the opponents. The rally continues until the ball is grounded on the playing court, goes "out" or a team fails to return it properly.

In Volleyball, the team winning a rally scores a point (Rally Point System). When the receiving team wins a rally, it gains a point and the right to serve, and its players rotate one position clockwise.

### **Volleyball Rules**

The Volleyball competition at the Rio 2016 Olympic Games will be held in accordance with the FIVB Official Volleyball Rules, Edition 2013-2016 and the Olympic Charter in force at that time. Pursuant to Rule 30 of the Olympic Charter, the FIVB assumes the responsibility for technical control and direction of its sport at the Olympic Games. In case of disagreement on the interpretation of these rules or regulations, the English version shall prevail.

The Official Volleyball Rules are available from the FIVB and may be found on the FIVB website <http://www.fivb.org>.

The structure and content of this output is recommended as a baseline for creation of the actual output for Games time.

### General Interest

Netherlands comes to the Sydney 2000 Olympic Games as defending Olympic champions, ironically also being the last team to qualify. The team booked its passage to the Sydney 2000 Olympic Games at the final Olympic qualifying tournament in France. They are currently ranked seventh in the world.

The Netherlands team has suffered through some turmoil in the years since their golden triumph, and the unsettled composition of the team has had an adverse effect on their performances.

Master setter Peter BLANGE only returned to the team at last year's Olympic Test Event, while injuries have also disrupted the team.

Several individual players had strong World League campaigns this year, with Guido GORTZEN winning the award for best spiker, while Martin VAN DER HORST was recognised as the best blocker.

Team captain Bas VAN DE GOOR is a dominant middle blocker who has been one of the world's best players at this position over a number of years. Reinder NUMMERDOR will be asked to help keep the Dutch ship afloat with his passing, outside hitting and aggressive serving.

This is not the same Dutch team that won gold in 1996 and silver in 1992, but it is still packed with plenty of talent.

The Dutch would have to significantly improve on their recent performances to threaten the top teams in this tournament, yet the potential for big performances is still lurking. Until they are knocked out of the tournament they remain Olympic champions.

## HISTORY VOLLEYBALL

### Origin of Volleyball

Volleyball is a ball game which began as a hybrid of tennis and basketball. It was invented in 1895 by William Morgan, a YMCA fitness instructor in Massachusetts, USA, to help middle-aged men who found basketball too strenuous. Originally it involved teams of nine, but in 1918 the current six-a-side game was established, as was the clockwise rotation at service.

Exported overseas by American servicemen, volleyball became popular throughout the world by the end of World War Two. Responding to the increasing awareness of the sport worldwide, the Fédération Internationale de Volleyball (FIVB) was established in 1948.

### Volleyball Today

The FIVB has 217 member countries and it is estimated that there are over five billion volleyball players worldwide. The leading male volleyball countries are Italy, Cuba, Brazil, Russian Fed. and the Netherlands. In the women, Cuba, China, Russian Fed. and Brazil are world leaders.

Volleyball has always been a sport prepared to change with the times. The FIVB has regularly altered and updated the rules to encourage exciting play. Most national teams include in their starting line-ups a setter, two centre blockers, two receive hitters and a universal spiker. Only certain players are involved with service reception and there are specialist positions for attack and defence.

Competition at the international level now includes the FIVB-supported World League (for men), which began in 1990. The Women's World Grand Prix and the World League involve ten teams and millions of dollars in prize money.

### Volleyball at the Olympic Games

Volleyball made its Olympic Games debut in Tokyo in 1964, with the Soviet Union winning the men's gold medal and the Japanese women being crowned as champions in front of their home crowd. Since then, volleyball has continued to witness the rise and fall of the great international teams, with countries as diverse as Cuba, Brazil, the Soviet Union, China, the United States, the Netherlands, Poland and Japan collecting gold medals.

**OGUIENKO Valentina (RUS) - Assistant coach**

***On the loss:***

"We won the first two sets easily. We seemed to lose our will to win in the third set. The team had plenty of opportunities to win but they didn't. The team lacked confidence in the fourth and fifth set. We are very sad after today's loss."

***On the head coach, Nikolai KARPOL (RUS), possibly retiring:***

"No he won't."

## SPORT PREVIEW

### VOLLEYBALL

**News Item: 25**

#### **Men's Tournament:**

- One of the strongest fields assembled for men's volleyball will contest the Sydney 2000 Olympic Games and predicting a winner is extremely difficult.
- The Italians must start favourite. In the past decade they have dominated international men's volleyball and they are in good form after winning the World League for a record eighth time.
- The only thing missing is the elusive Olympic gold, but there are plenty of other teams ready to pounce if the Italians should stumble.
- The Russian Federation recently established itself as second favourite. The Russian Federation has a long former history of success at the Olympic Games and are striving to return to their glory years. Much depends on one of their young stars, Roman IAKOVLEV. If he steps up to another level at the Olympic Games, the Russian Federation will be hard to beat.
- Netherlands, the reigning Olympic champion, is the dark horse of the games. Peter BLANGE has returned to the team and with him the confidence of 1996. After a slow start to their World League campaign, they finished with solid victories over Italy and the USA. Netherlands' biggest advantage is that it knows how to win at the Olympic Games.
- Serbia, Cuba, Brazil and the USA are capable of winning the gold medal. Serbia, in particular, looks to be primed to achieve Olympic Games glory. Nikola GRBIC leads a well -balanced side that has great ball control.
- Spain, Argentina and Korea do not look capable of winning a medal, but they could decide who does. Korea lifts its rating at the Olympic Games and could provide a few upsets. Spain had one of the best players in the world in Rafael PASCUAL and he will control the Spaniards' destiny.
- Australia is a newcomer to this level of international play led by Dan HOWARD, Ben HARDY and captain David BEARD. Anything is possible in front of a home crowd, but don't expect miracles.
- The new rally point scoring system has added a new dimension to international competition, increasing the likelihood of upsets. The Sydney 2000 Olympic Games will be no exception.

#### **Women's Tournament:**

- The mighty Cuban women's volleyball team comes to Sydney in quest of an unprecedented third consecutive Olympic gold medal - but facing a stern challenge from the Russian Federation and Brazilian squads. These three teams appear set to dominate the two-week competition, with the Chinese also being capable of joining the top bracket of teams.
- Just below this top echelon is a very evenly matched group of teams who will showcase different strengths and styles of game. The technically precise Koreans will exploit any weaknesses in their opposition, but probably lack the firepower to upset the very elite teams.
- Croatia boasts one of the world's most dominant hitters in Barbara JELIC, but lacks the depth to capitalise on her prodigious talents. Germany comes to Sydney with an excellent blend of youth and experience, with Angelina GRUEN complementing Susanne LAHME and Christina SCHULTZ, but limited preparation may take its toll on coach LEE Hee Wan's unit.
- The United States arrives with a young and talented team who may be still one or two years away from joining the very top bracket of international teams, while Peru come with sound credentials but remain something of an unknown quantity.
- Italy has developed an athletic, well skilled team, but still has not quite reached the level of Cuba, the Russian Federation or Brazil.
- Olympic debutantes Australia and Kenya will view these games as a stepping stone toward developing their volleyball programs of the future. The very young Australian team has improved dramatically over the last twelve months and may cause headaches for some teams, particularly with their strong blocking. The Kenyan team

contains some excellent athletes who hit the ball hard, but problems with ball control and a lack of height will be hard to overcome at this level.

- The battle for the gold medal should provide some fascinating volleyball. The advent of rally point scoring and the increasing parity among the top teams introduces greater unpredictability and makes it extremely likely that many games will feature very tight results.
- Cuba returns the same unit that dominated last year's World Cup and this year's Grand Prix tournament. The emergence of Yumilka RUIZ as the heir apparent to Mireya LUIS at outside hitter position means that the team is as complete as ever.
- Cuba will still be the only team to play a two-setter system, with World Cup Most Valued Player Taimaris AGUERO and Marlenis COSTA running the show. The awesome centre-blocking tandem of Ana FÉRNANDEZ and Regla TORRES will still intimidate opposing hitters. The all round talents of Regla BELL, combined with the depth provided by talents such as Mirka FRANCIA and the incomparable LUIS coming off the bench, make anything less than a gold medal seem a stretch. Beneath all the athleticism and skill it has been the competitive nature of the Cubans, their refusal to lose, that has been the hallmark of their dynasty. They have consistently found a way to win the big points and the big games when the pressure is at its greatest.
- Master Russian Federation coach Nikolai KARPOL has assembled a worthy challenger to the Cubans with this edition of the Russian Federation team. The tall Russian Federation will dominate teams with their blocking power, and will be hoping to nullify the Cuban offence through their height at the net. The outstanding individual play of Lioubov CHACHKOVA drives this unit, which has played close games with the Cubans in recent competitions, but has fallen just short when it matters. A more varied Russian Federation offence should improve their attacking efficiency.
- The team that could really light up this tournament is the sparkling Brazilian outfit. They possess the dynamic athleticism and the fighting spirit to challenge both the Cuban and Russian Federation juggernauts. Consistently finishing just short of major finals, the Brazilians arrive in Sydney hungry for success and recognition. Veteran setter Helia SOUZA will feed an offence rejuvenated by young guns Erika COIMBRA, Elisangela OLIVEIRA and Walewska OLIVEIRA. The return of Virna DIAS, who missed the Grand Prix through injury will strengthen this team. Veterans Janina CONCEICAO and Leila BARROS round out a team that is capable of blowing all others off the court.
- The Chinese team have to be included in the list of possible champions on the strength of their impeccable pedigree and the talent in their squad, but they have not produced their best play too often recently. If SUN Yue, LI Yan and newcomer CHEN Jing all produce their best in the spotlight of the Olympics China could still make it to the medal podium.
- A great two weeks of volleyball can be expected, but the indications are that the girls from Brazil are capable of upstaging the more fancied Cuban and Russian Federation teams and will leave Sydney with the gold medal and the glory of Olympic champions.

**DAILY PREVIEW**  
**VOLLEYBALL**  
**MEN**  
**PRELIMINARY ROUND**  
**SUN 7 AUG**

News Item: 524

### **Spain vs Egypt**

- The men's volleyball competition opens on Sunday with African champions Egypt taking on the strong Spanish team, one of Europe's toughest combinations.
- Egypt are an athletic, hard hitting team, but they may find themselves a bit out of their depth against the Spanish, one of Europe's toughest combinations.
- Spain's offence will be led by Rafael PASCUAL, a dominant outside hitter set to be a tournament star.

### **Korea vs Italy**

- The second match at Pavilion four in Sydney Olympic Park sees the World Champion Italian team, who have dominated men's volleyball for the last decade, take on the emerging Korean team.
- The Italians have adopted a very low profile in the build up to this tournament, preferring to train away from official venues. Coach Andrea ANASTASI must feel confident that his very experienced squad will be ready for action, and they will need to be.
- The Koreans have looked particularly strong in training, and have super libero LEE Ho to blunt the aggressive jump serving of the Italians, led by Andrea SARTORETTI's thunderbolts.
- The Italians will enjoy a significant advantage in size and experience, but expect the Korean team to make them work very hard for an opening victory. This should be a great game.

### **Russian Federation vs Serbia**

- Action at the Sydney Entertainment Centre opens with a classic match-up which may possibly even be a preview of the gold medal match.
- The Russian Federation team, victorious at last year's World Cup, clash with Atlanta bronze medallists Serbia. This game features two teams who complement great skills with height and enormous power.
- Both teams will serve very aggressively, with Serbia's Goran VUJEVIC and the Russian Federation's Roman IAKOVLEV possessing two of the world's toughest jump serves.
- In the cut throat Pool B there is very little room for error, and the loser of this match will find themselves under enormous pressure for the rest of the preliminary rounds.
- Serbian setter Nikola GRBIC will need to solve the riddle of the Russian Federation's huge block through a varied and intelligent distribution of sets. Fortunately he has no shortage of hitters to utilise. Expect superb volleyball and a titanic struggle.

### **Cuba vs Netherlands**

- Defending Olympic champions the Netherlands begin their defence against a Cuban team which comes to Sydney expecting a medal. This is another game with enormous ramifications for pool placings.
- The Netherlands have struggled to recapture their form of the last few years, but any team with Peter BLANGE, Bas van de GOOR and Guido GORTZEN in their starting line-up has to be respected.
- The well established Cuban nucleus features emerging star Angel DENIS alongside veteran setter Raul DIAGO and middles Pavel PIMENTA and Ihosvany HERNANDEZ. If the service reception of the Cuban team holds up they should have too many offensive options for the Dutch to handle, and they should open this Olympic campaign with a win over the defending champions.

### **United States vs Argentina**

- The US take on Argentina in a game which coach Doug BEAL has labelled as very dangerous for his team. The experience of the Argentineans and their well balanced attack are obstacles for BEAL and his team to overcome.
- Argentina will look to standout hitter Marcos MILINKOVIC to lead their assault.

- The US has looked very potent in training, with George ROUMAIN set to stamp his mark on the tournament. The only question hanging over the US is their service reception, so the pressure will be on libero Erik SULLIVAN and the team's other receivers to produce quality passing for setter Lloy BALL. The US should have too many guns for the South Americans.

### Australia vs Brazil

- The final game of the day's action sees first-timers Australia meet the powerful and experienced Brazilian team.
- Brazil is another team with real claims to gold medal aspirations, and the Australians can expect a torrid time.
- Brazil are arguably the most explosive jump serving team in world volleyball, and the Australian reception, which has looked shaky in training, will be under immense pressure. Poor passing eliminates the Australian team's most potent offensive weapon, in middle hitter Dan HOWARD, and could make it a tough baptism for Australia in the Olympic arena.
- If the passing holds up, Australian will be confident of producing a very competitive performance.

**GOLD MEDAL MATCH**

**News Item: 1223**

**Serbia (SRB)-Russian Federation (RUS) 3-0 (25-22, 25-22, 25-20)**

- Serbia won the Sydney 2000 Olympic Games volleyball gold medal by resoundingly crushing the Russian Federation 25-22, 25-22, 25-20 to end a frustrating run of near misses in major competitions, having won bronze at Atlanta and silver at the 1998 World Championships.
- Both sides began nervously and unleashed very aggressive serving, which although producing several service aces provoked a large number of faults. Neither side was able to establish a clear lead, and the scores were locked at 21-21. But a service ace from young star Ivan MILJKOVIC (SRB), followed by a Russian Federation hitting error, saw the Serbs snatch the decisive break they needed. Another hitting error from the Russian Federation gave the set to Serbia.
- Serbia began to take control in the second set and they raced to an 8-3 lead. The jump serving of MILJKOVIC and Goran VUJEVIC (SRB) was causing enormous problems for the Russian Federation, and they could not find any offensive rhythm. The Russian Federation coaches desperately sought answers, substituting freely in a bid to find a combination that could attack efficiently.
- It looked like the substitutions would pay off, with the gap closing to 16-14. Igor CHOULEPOV and Alexei KOULECHOV stabilised the Russian Federation, and two Serb errors saw the scores level at 17. Runs of points had characterised the set though, and three successive points saw the Serbs within sight of a two set lead. The Russian Federation's big gun, Roman IAKOVLEV, had another inconsistent game, and was substituted with the score 20-17.
- The Serbs again won the critical points, this time with great defence giving them transition points, and a key block when the scores were locked at 22 all.
- The third set began with the Russian Federation starting another combination of players, still unable to find the key to playing effectively. Their passing was just not working, and intermittent blocks were keeping them in touch without giving them an edge. IAKOVLEV and Ilia SAVELIEV had error-ridden performances.
- A string of blocks and some more Russian Federation errors saw the Serbs establish a clear ascendancy. An inspirational defensive save and recovery to block for a point by Vladimir GRBIC (SRB) only added to the Serbian momentum. The Russian Federation team, so strong all week, unravelled, and the Serbs had realised their gold medal dream.
- Serbia was superbly balanced, with key contributions from all starters. MILJKOVIC confirmed himself as the future of Serbian volleyball with another pivotal performance, while master setter Nikola GRBIC orchestrated the Serb game plan perfectly. Vladimir GRBIC, the heart and soul of this team, supplied the leadership needed at decisive moments.
- The Russian Federation did not produce their best volleyball when it was most needed.

**Spain vs Egypt 3-0**

- In the first match of the day Spain took on Egypt.
- The Egyptian team struggled to find any consistency and, despite showing glimpses of excellent play, went down in straight sets, 25-20, 25-10, 25-21.
- Spain, with stars Rafael PASCUAL and Enrique de la FUENTE, was too steady for the African champions.
- Star spiker PASCUAL dominated the Egyptians, hitting winners from most positions on the court.

**Korea vs Italy 0-3**

- Italy began its journey towards an elusive Olympic Games gold medal with a hard-fought victory over Korea 27-25, 25-23, 25-18.
- The game saw Italy's powerful spiking pitted against the fast, precise Korean offence. Korea, led by KIM Se-Jin's spiking, immediately put the Italians under pressure. Italian Andrea SARTORETTI created headaches for the Korean line-up. One of his serves was clocked at 114 kph.
- SARTORETTI was assisted by Luigi MASTRANGELO's outside hitting and Alessandro FEI's dominance in the middle.
- Korea dazzled the crowd with its defensive play, LEE Ho, in particular, made several spectacular saves but, in the end, the Koreans were outclassed by the current world champions.

**Russian Federation vs Serbia 3-1**

- At the Sydney Entertainment Centre, the Russian Federation was too powerful and too consistent for Serbia, winning in four sets 19-25, 25-23, 25-23, 25-20.
- The Russian Federation combined outstanding service, most notably from Roman IAKOVLEV, with intimidating defence to emerge victorious.
- Serbian setter Nikola GRBIC was forced to set outside too often and the Serbian spikers struggled to put the ball away for winners against the well-formed Russian Federation blocks and back court defence.
- Serbia lost its way in the fourth set, committing several critical unforced errors.
- The closeness of the second and third sets emphasised the fine line between victory and defeat under the rally point scoring system.

**Cuba vs Netherlands 0-3**

- The Netherlands showed that it has no intention of quietly relinquishing its Olympic crown when it dispatched the highly-fancied Cuba in three sets 25-22, 25-20, 25-23.
- The match featured spectacular play at the net from both teams, with Dutch captain Bas van de GOOR producing a vintage display to set the standard for his team.
- The Cubans were guilty of too many careless errors; serving out too often and committing net faults at crucial moments. The high quality of much of their play was wasted by these undisciplined errors.

**United States vs Argentina 1-3**

- USA coach Doug BEAL's pre-match fears were well-founded as Argentina upset the United States in four sets, 24-26, 25-23, 25-21, 25-18, in their Olympic preliminary match on Sunday.
- Argentinean captain Marcos MILINKOVIC was the driving force behind the victory, leaving America without an answer to his powerful spikes and serving.
- Raul SPAJIC helped MILINKOVIC dominate the opposition at the net.

- Ryan MILLAR was outstanding for the Americans, while key hitter George ROUMAIN contributed strongly, without ever finding a dominating rhythm.
- The USA now faces a huge task to get its medal campaign back on track when it takes on the formidable Russian Federation team.

#### Australia vs Brazil

- Brazil proved much too strong for Australia in the final match of the day, winning comfortably 25-13, 25-14, 25-21.
- The Australians started nervously in front of a large and vocal crowd, but settled down by the end of the match, with Dan HOWARD and Hidde (Shane) van BEEST attacking strongly.
- The powerful Brazilians were masterfully guided by setter Mauricio LIMA, with Giba GODOY FILHO and Douglas CHIAROTTI too powerful for the Australians. If the passing holds up, Australia will be confident of producing a very competitive performance.

### VOLLEYBALL

#### **Men's Tournament:**

- Australia and Great Britain were eliminated from pool A in the preliminary stages. Great Britain never really found their feet in their volleyball debut at an Olympic Games and did not win a set. The Volleyroos of Australia, however, played superbly in patches, and beat Poland in one of the tournament's big surprise results. Bulgaria topped the pool, with Tsvetan SOKOLOV (BUL) standing out. Poland, Italy and Argentina edged through at the expense of Australia.
- Pool B was tough, containing world No.1 Brazil, No.2 Russia and Beijing 2008 Olympic Games champions USA, who were ranked No.5, as well as Germany, Serbia and Tunisia. USA finished first in the pool with some style, with Clayton STANLEY (USA) and Matthew ANDERSON (USA) in starring roles. Russia, Brazil and Germany also progressed to the knockout stages.
- In the quarterfinals, Bulgaria thrashed Germany 3-0, with some strong spikes from SOKOLOV (BUL). Russia easily dispatched Poland, as Maxim MIKHAYLOV (RUS) showed his class. Brazil beat Argentina 3-0 in a South American clash thanks to a true team performance, and Italy pulled off a genuine surprise, effortlessly eliminating USA 3-0.
- The first semifinal saw MIKHAYLOV (RUS) outmuscle SOKOLOV (BUL), with Russia beating Bulgaria 3-1 in a battle of sheer power. In the second semifinal, Brazil's numerous spikers performed at their best as they outclassed Italy, with Murilo ENDRES (BRA) leading the way.
- The bronze medal match was a tense, tight affair, as Italy took the first set and Bulgaria battled back in the second. But led by captain Cristian SAVANI (ITA), and with Michal LASKO (ITA) and Ivan ZAYTSEV (ITA) chipping in when needed, Italy won the bronze medal 3-1, leaving Bulgaria to finish fourth.
- In the final, Brazil started the match superbly and won the first two sets with ease. ENDRES (BRA) set the tone for Brazil, playing a great first set in attack and defence and Wallace DE SOUZA (BRA) seemed to relish playing an Olympic final. Russia fought hard in the third set on the back of Dmitriy MUSERSKIY's (RUS) finest match of the tournament and after saving two gold medal points, Russia found a way to win the third set 29-27.
- Russia continued their resurgence in the fourth set, winning 25-22. MUSERSKIY was in control as Russia refused to allow Brazil back into the match. They won the fifth set 15-9 and the match 3-2 (19-25, 20-25, 29-27, 25-22, 15-9) to take the gold medal. It was heartbreak for Brazil, who had also lost in the final in Beijing.

#### **Women's Tournament:**

- The Brazilians came back from a set down to win 3-1 (11-25, 25-17, 25-20, 25-17) at Earls Court on Saturday 11 August to repeat their Beijing 2008 victory over USA.
- USA started strongly and looked like maintaining an unbeaten run in the tournament as they powered to a first-set win. But Brazil came back momentously as captain Sheilla CASTRO, Thaisa MENEZES, Fabiana CLAUDINO and Jaqueline CARVALHO all scored heavily for the champions.
- Algeria and Great Britain were eliminated from pool A after the preliminary matches. Algeria were poor, losing every match, while the Britons will view the tournament as a success after beating Algeria to record a win at their first Olympic Games. Russia topped pool A, winning all five matches as Ekaterina GAMOVA and Nataliya GONCHAROVA spiked brilliantly. Japan, Italy and Dominican Republic also reached the quarterfinals.
- In pool B, world No.1 USA were unstoppable, winning all five matches. Captain and setter Lindsey BERG was inspirational, and Destinee HOOKER scored well. Korea, who had the standout player of the tournament in KIM Yeon-Koung, and China also qualified. Brazil looked erratic, but scraped through in fourth place. Turkey and a poor Serbia side were eliminated.
- The quarterfinals were extremely exciting. Brazil knocked out Russia 3-2 after saving six match points in the deciding set. Japan recorded a rare 3-2 victory over China, also saving a match point in a thriller of a final set. Korea beat Italy 3-1 after KIM Yeon- Koung (KOR) put on one of the most outstanding individual performances of the tournament, and an efficient USA crushed the Dominican Republic 3-0.

- In the semifinals, favourites USA eased past Korea 3-0, with Destinee HOOKER (USA) outstanding, and Brazil proved too strong against a brave Japan, winning 3-0, with Sheilla CASTRO (BRA) playing impeccably.
- In the bronze medal match, Japan beat Korea in straight sets (25-22, 26-24, 25-21). Saori KIMURA (JPN) and Saori SAKODA (JPN) spiked with aggression to help win the match. KIM Yeon-Koung, was on form, but could not do enough to get her team a medal. SAKODA was top scorer with 23 points.

### **Volleyball: IOC disqualifies FAMILYNAME Givenname (NOC) for doping violation**

The International Olympic Committee (IOC) on Monday announced that it has disqualified FAMILYNAME Givenname (NOC) from the Volleyball Men's tournament of the Rio 2016 Olympic Games.

Immediately after his participation in the event on 10 August, FAMILYNAME, 23, provided a urine sample that tested positive for the prohibited substance 11-nor-delta-9-tetrahydrocannabinol-9-carboxylic acid.

The IOC Disciplinary Commission, composed for this case of Mr Givenname FAMILYNAME (Chairman), Mr Givenname FAMILYNAME and Mr Givenname FAMILYNAME, decided:

- I. The athlete, Mr Givenname FAMILYNAME, NOC name, Volleyball:
  - (i) is disqualified from the Men's tournament of the Rio 2016 Olympic Games where he placed 7<sup>th</sup>;
  - (ii) shall have his diploma in the above-mentioned event withdrawn; and
  - (iii) shall have his Olympic identity and accreditation card cancelled and withdrawn immediately.
- II. The FIVB is requested to modify the results of the above-mentioned event accordingly and to consider any further action within its own competence.
- III. The NOC of the member country is ordered to return to the IOC, as soon as possible, the diploma awarded to the athlete in relation to the above-mentioned event.
- IV. This decision shall enter into force immediately.

Under the IOC Anti-Doping Rules applicable to the Rio 2016 Olympic Games, testing takes place under the IOC's auspices from the opening of the Olympic Village to the Closing Ceremony. Within that period, the IOC systematically performs tests before and after events. After each event, the IOC systematically carries out tests on the top five finishers plus two at random. The IOC also performs out-of-competition unannounced tests. Over the course of the Rio 2016 Olympic Games, the IOC is expected to carry out some 5,000 tests - 3,800 urine and 1,200 blood. For more information, please consult the IOC factsheet on anti-doping.

# Section 2 - Distribution Rules

## 1 Introduction

This section explains what Volleyball information is required, the function producing the outputs and when the OC should supply it to the different users or user groups according to the ORIS standards. The information is presented in tabular format to allow a well structured overview of affected outputs, the appropriate work flow and the production time.

This section is divided into three chapters:

- "Event Related Requirements" (chapter 2) gives a detailed description of events processes for outputs preparation, production, checking/approval, and final distribution rules of printed outputs and INFO. The chapter is organised in such a way that the requirements of each user or user group are listed separately and grouped chronologically by the time condition that triggers production and/or delivery.
- "Other Outputs" (chapter 3) describes the process for preparation and production of all outputs that are identical for all events (Schedule, Entries, Background Information, etc.) together with those outputs (event related and non-event related) that could be produced at any time before, during or after competition. It also includes the final distribution rules for both printed outputs and INFO grouped in chronological order.
- "Distribution Rules and availability of all outputs grouped by ORIS output code" (chapter 4) gives an overview of all outputs produced for Volleyball. The outputs are sorted by output code and listed together with their production time and distribution rules. The table following describes the time abbreviations used to define the availability of the outputs. All delivery times are understood to imply that distribution will occur "no later than" the defined time, unless otherwise stated (e.g. protest times).

It is the responsibility of the FIVB and the OC Competition Management to carry out data and output verification processes efficiently.

Installing adequate equipment at appropriate locations and providing sufficient well trained people to manage the technology and distribution processes are key factors to meet the requirements of output delivery within the defined time frame.

The main producers of outputs are:

- IDS - Information Diffusion System (e.g. provisional entries, scheduling, etc.)
- ONS - Olympic News Service (e.g. production of new articles, press conference highlights, etc.)
- OVR - On Venue Results system (e.g. results and timing feeds)
- VRM - Venue Results Manager (creation of other outputs, e.g. competition officials, IF schedules, course maps updated during Games, etc.)

The creation of outputs may be carried out by one or a combination of the producers listed above.

Printed outputs may be delivered to clients by several different means, for example:

- Display on Bulletin Board (media area, athletes' area, Olympic Village, etc.)
- Personal delivery to individual clients (Technical Delegate, FIVB office, etc.)
- Place in pigeonholes (Venue Press Centre, Competition Management, Sport Information Desk, etc.)
- Single copy delivery (Sport Presentation, Competition Management, etc.)

It is the responsibility of OC Technology, in collaboration with each client, to determine the number of copies to be delivered to each distribution point. Once competition has started, the initial distribution requirements should be adjusted to optimise the number of copies required at every distribution point, and at different times of day and stages of the competition. OC Technology should remain flexible to ensure that the number of copies supplied adequately meets (but does not exceed) demand. It is

essential that sufficient well trained personnel, with the appropriate accreditation to access all distribution points, are available to ensure consistent delivery within the defined time frame, and monitor the actual demand at each distribution point.

If a new version of a previously issued output is produced for any reason (e.g. a revised output) the existing version in INFO must always be replaced with the new version. In this way the latest version of each output will be maintained in INFO even though there is no new distribution time defined in this section.

All outputs to be included in the Results Book will be the last version produced, even if stamped "REVISED".

## 2 Event Related Requirements with Predefined Production Time

This chapter describes the process of production and delivery for all outputs generated during the lifecycle of an event either by On Venue Results system (OVR), or by any other function such as Olympic News Service (ONS), or OC Competition Management with the exception of those event related outputs that do not have a defined production time and which are listed in the chapter "Other Outputs".

The process is described in tabular format, in which each step is described in a row listing the deliverable, with columns that define a time reference (When), the user or user group (Who) responsible for delivering which output (What) and for/to whom (Whom). Processes and outputs are listed in chronological order, covering the period starting with preparation for the draw, followed by the draw itself with start lists production and their distribution, previews, production and distribution of outputs during the event, up to the completion of the event with flash quotes, reviews, medal outputs, etc. Specifications include both "C" and "N" type outputs that are produced during the period described above.

After the table describing the process, there is another table that sets out the distribution rules for each of the outputs previously described, with instructions to which user or user group and at which locations each of these outputs should be distributed. Those outputs, which only need to be published in INFO are clearly indicated.

When the competition formats of different events have different processes (even in details), both sets of tables are prepared for each event (or group of events) **that have a unique format**.

The **unique format** means that ONLY events sharing absolutely identical procedures from beginning to end, and producing identical outputs, will be listed together.

## 3.2 Event Related Outputs without Defined Production Time

This table lists all outputs (both event related and non-event related) that could be produced at any time before, during or after competition. These outputs may also be produced at defined times within an event (e.g. Flash Quotes, Press Conference Highlights after finals) in which case they would also be included in the appropriate process in chapter "Event Related Requirements".

## 4 Distribution Rules for Printable Outputs Grouped by ORIS Output Code

This chapter gives an overview of all outputs produced for Volleyball sorted by ORIS output code.

All availability codes are "Point in Time" (PiT) codes, indicating a defined time trigger for the production of an output.

C-outputs shown with a "Y" in the INFO Screen format column will be available in real time format.

Please refer to the document "On Screen Results Presentation" for further details.

Every output available in screen format should be formatted in a printable version according to the ORIS requirements, including the Look and Feel defined by the OC.

# **Section 3 - Real Time Information**

## **1 Introduction**

This section of the document defines scoreboard layouts and serves as a reference for on screen results presentation.

The basic objective has been to make user-friendly samples and emphasis is placed on using realistic data where possible. This is to ensure that the focus is on the type of data which must be included rather than on the accuracy of data shown in the sample.

All possible variations of the type of event and each stage of the competition are presented. The type of data required and the triggering conditions are defined.

While the data content and triggering conditions for each screen are mandatory (and therefore subject to the Change Management process), the presentation of the real time outputs will be based upon an agreement reached between the FIVB and the OC (and providers).

## **2 Scoreboards**

### **2.1 General Rules**

#### **2.1.1 NOC Names**

Whenever NOC names are used, they should be taken from the official IOC "NOC long and short names document", which is available on the IOC ORIS extranet (see "Public documents" in the navigation menu on the left). The same name length should consistently be used within similar screens.

#### **2.1.2 Athletes, Teams and Officials' Names**

All possible scoreboard name lengths which are required for scoreboard screens must be verified through the process described in the chapter "Entries and participant data" in Procedures.

### **2.2 Technical Specifications**

This section has been developed based on a standard matrix. More sophisticated solutions (e.g. video, plasma screens, font colour, font size, graphical characters, etc.) may be provided. The content of the scoreboard screens are defined in ORIS. The detailed layout of the scoreboard screens is the responsibility of OVR, and will be confirmed during the Homologation Test, subject to the FIVB's approval.

| Source                | Information identifying the source of data, i.e. which organisational part of which body is responsible for providing it, for example: IOC, FIVB, OC Press Operations, OC Competition Management, etc.   |
| Column data alignment | General: right for numeric and results, left for text.<br>IRMs are aligned as for results.<br>May be adjusted depending on the output layout.  |
| Column titles         | Column titles match the alignment of the data columns  |
| Date formats          | <ul style="list-style-type: none"> <li>• dd MMM yyyy (e.g. 6 APR 1896)           <ul style="list-style-type: none"> <li>• dd: date format, for example: 23 or 5 (presented without leading zero)</li> <li>• Ddd: day of week in abbreviation format - presented as three characters, for example: Mon for Monday (mixed case)</li> <li>• DDD: day of week in abbreviation format - presented as three characters, for example: MON for Monday (upper case)</li> <li>• Mmm: month in abbreviation format - mixed case, for example: Apr for April</li> <li>• MMM: month in abbreviation format - upper case, for example: APR for April</li> <li>• yyyy: year format, for example: 1896</li> </ul> </li> <li>• The "As of date" may reflect one of the following:           <ul style="list-style-type: none"> <li>• Date when data has been collected (e.g. world ranking)</li> <li>• Date and time when the actual output was updated (several editions of the same output, e.g. cumulative statistics)</li> <li>• Logical date if applicable</li> </ul> </li> <li>• Logical date: If a session continues past midnight (00:00), any outputs produced will be considered as having the logical date on which the session began (e.g. for a session which began at 21:00 on Apr 8 and ended at 1:20 on Apr 9, the output would be dated Apr 8)</li> </ul> <p>This date is according to the local time zone at the competition venue.</p> |
| Page break            | <p>Page break applies only for printed outputs.</p> <ul style="list-style-type: none"> <li>• When the complete output fits on a single page, "None, aim for a single page" is written</li> <li>• For multi-page outputs, there are three cases:           <ol style="list-style-type: none"> <li>1. Natural page break:<br/>This should be considered as printing without page break. When printing reaches the end of a page a page break will occur and the output will continue printing on the next page. There are three ways in which the headings on subsequent pages will be dealt with. The following texts are used to describe these options in the description table:               <ul style="list-style-type: none"> <li>• Not controlled with repeated output headings and column headings</li> <li>• Not controlled with repeated column headings only</li> <li>• Not controlled without repeated output headings and/or column headings</li> </ul> </li> </ol> </li> </ul>  |

|        | <p><b>2. Forced page break by "Group":</b></p> <p>This should be considered as printing with a page break. Before printing each group on a page the print software must decide if the complete group will fit on that page. If the group will not fit a page break will be forced. The group will then be printed on a new page. There are three ways in which the headings on subsequent pages will be dealt with. The following texts are used to describe these options in the description table:</p> <ul style="list-style-type: none"> <li>• Break at "Group" with repeated output headings and column headings</li> <li>• Break at "Group" with repeated column headings only</li> <li>• Break at "Group" without repeated output headings and/or column headings</li> </ul> <p>A "Group" is a logical group of data e.g. NOC/team/relay/rider/paragraph, etc. (e.g. a team with seven members. The result is that each page will contain as many complete teams as can fit on the page).</p> <p><b>3. Forced page break by "Condition":</b></p> <p>This should be considered as printing with a page break after a particular condition is reached. When the condition is reached a page break will be forced. The process will repeat when each of the condition(s) is reached. There are three ways in which the headings on subsequent pages will be dealt with. The following texts are used to describe these options in the description table:</p> <ul style="list-style-type: none"> <li>• Break at "Condition" with repeated output headings and column headings</li> <li>• Break at "Condition" with repeated column headings only</li> <li>• Break at "Condition" without repeated report output headings and/or column headings</li> </ul> <p>A "Condition" may be any trigger e.g. a new NOC/team/gender/athlete/class of officials, etc. (i.e. each time a new NOC is reached a page break is forced. The result is that each NOC is printed on a separate page).</p> <p>A combination of the above three cases is possible within a single output.</p> |
| Legend | <p>The description table defines if a legend is required on an output:</p> <ul style="list-style-type: none"> <li>• "None" is specified if no abbreviations are used in the output</li> <li>• If one or more abbreviations may be used in the output the legend will be used to describe them. The following rules apply: <ul style="list-style-type: none"> <li>• Only those abbreviations which appear in a version of the output are shown in the legend (dynamic legend)</li> <li>• If the sample shows all possible abbreviations, "See sample for all possible abbreviations" is specified in the description table</li> <li>• If there are more abbreviations possible than shown in the sample, "Use the following description for abbreviations which appear in the output" is specified in the description table and all possible abbreviations and descriptions are listed</li> <li>• The location of the legend is defined either as "To be displayed at the bottom/top of each page" or "To be displayed at the bottom/top of the last page only"</li> </ul> </li> </ul>   |
| Notes  | <p>Guidelines for any "Note" planned where users will find an explanation of data in the output, reasons for some action related to that output, etc.</p> <p>Each output could contain up to three different types of "Notes":</p> <ol style="list-style-type: none"> <li>1. Note with static text: <ul style="list-style-type: none"> <li>• If "Note with static text" is not planned, allowed or possible, "None" is written</li> <li>• If text of "Note with static text" is always the same and already presented in the sample, "See sample" is indicated</li> </ul> </li> </ol>   |

|          |   |
|----------|---|
|          | <p>2. Note with predefined, but changeable text:</p> <ul style="list-style-type: none"> <li>• If "Note with predefined text" is not planned, allowed or possible, "None" is written</li> <li>• If text of "Note with predefined text" can vary depending on certain conditions, they are listed here, together with text to be used for each condition</li> </ul> <p>3. Note with free text:</p> <ul style="list-style-type: none"> <li>• Up to two lines of free text will be reserved at the bottom of the last page of each output in order to provide explanations or other annotations concerning the content of the output</li> </ul> |
| Comments | This section is used for any further explanations and comments on the output, or suggestions to output provider(s). If no comments are needed, "None" is written.   |

# Appendix D - Supporting Documents

This appendix includes the following supporting documents:

- Templates for the output "Official Communication" (C67)
- Results, Medals and Diplomas
- Data to be Captured

## 1 Templates for Official Communication

In order to support OC Technology as much as possible and to guarantee a smooth process and appropriate wording, a collection of possible templates to be used during the Games is useful. The most common templates are included in this chapter and should be stored in the OC Technology system well before the Games.

The Official Communication template should include the following fields:

|                  |  |
|------------------|--|
| <b>Event</b>     | Affected event name (see "References" for list of events)  |
| <b>Gender</b>    | Event gender indication (men, women), if applicable  |
| <b>Phase</b>     | Affected stage of competition (e.g. semifinals, etc.), if applicable   |
| <b>Unit</b>      | Specification of the phase (e.g. match, etc.), if applicable   |
| <b>Subtitle</b>  | One line space for describing the reason for the Official Communication  |
| <b>Summary</b>   | Multiple lines for the body of the Official Communication. Only non-formatted text can be included here (no graphics, no tables, etc.)                       |
| <b>Details</b>   | Multiple lines for describing details. Here, formatted text (font size, style, colour, graphics, tables, etc.) can be included. This field is not mandatory. |
| <b>Issued by</b> | Initiator's (name and) function  |
| <b>Date</b>      | Date of decision as provided by the person issuing the Official Communication  |
| <b>Time</b>      | Time of decision as provided by the person issuing the Official Communication  |
| <b>Note</b>      | If needed, contact details for further information can be added here (as a Note)   |
| <b>Signature</b> | Signature of the initiator, needed in order to release the Official Communication  |

Please note for the row "Details": At the moment of creating the templates for the most common situations, it is almost impossible to add appropriate details. If needed, the details should be communicated to OC Technology at the same time as all other details for the Official Communication.

## 2 Results, Medals and Diplomas

### 2.1 General

The Olympic Charter states that International Federations have the responsibility "to establish the final results and ranking of Olympic competitions."

Medals and diplomas will be allocated based upon these final results. Should any changes occur affecting medallists and/or diploma recipients, the IOC will decide on the new medal and diploma allocation.

### 2.2 Expected Number of Medals and Diplomas

The information included in this chapter should serve as a support for the medal and diploma allocation in Volleyball.

Eligible athletes:

- Women's/Men's Tournament: Athletes listed on the roster

The following table indicates the regular medal and diploma allocation:

| Medal Type/<br>Diploma | Event Type |    |
|------------------------|------------|----|
|                        | Team       |    |
| Gold                   | •          | 12 |
| Silver                 | •          | 12 |
| Bronze                 | •          | 12 |
| Diploma                | •          | 96 |

### 2.3 New Classification after Disqualification

In case of disqualification among the medallists or diploma recipients in an event, the following rules will apply:

| Initial<br>Rank                              | New<br>Rank | Name        | NOC<br>Code |
|--|-------------|-------------|-------------|
| <b>If the gold medallist is disqualified</b> |             |             |             |
| 4  |             | NOC name 1  | NOC 1       |
| 2  | 1           | NOC name 2  | NOC 2       |
| 3  | 2           | NOC name 3  | NOC 3       |
| 4  | 3           | NOC name 4  | NOC 4       |
| 5  | 4           | NOC name 5  | NOC 5       |
| 5  | 4           | NOC name 6  | NOC 6       |
| 5  | 4           | NOC name 7  | NOC 7       |
| 5  | 4           | NOC name 8  | NOC 8       |
| 9  | 8           | NOC name 9  | NOC 9       |
| 9  | 8           | NOC name 10 | NOC 10      |
| 11   | 10          | NOC name 11 | NOC 11      |
| 11   | 10          | NOC name 12 | NOC 12      |

Note: All teams ranked after the disqualified team will be ranked one place higher.

ORIS reference output:

- Final Standings [P4] (C76C)

Note: The software must be flexible enough to handle medal allocations as decided by the FIVB and/or the IOC.
