Executive Summary

The Executive Summary covers major steps and milestones of the ORIS project for the Rio 2016 Olympic Games.

1 Introduction to the ORIS Project

Information management is a key component in the efficient operation of sporting events. Accurately documented requirements are essential to ensure reliable, cost efficient results management, and facilitate the transfer of knowledge from one Games to the next.

In 1993, recognising the high costs and risks incurred in the continual redefinition of requirements, the IOC initiated a pilot project "INFOTECH" whose aim was the definition of minimum requirements for Information Technology support at the Olympic Games. Rowing was chosen for this pilot project.

Information requirements were analysed in detail by the International Rowing Federation (FISA) together with representatives of the major World News Press Agencies (WNPA), several large sports newspapers and representatives from the IOC. In the course of this process, the needs of the written press and news press agencies and potential areas for improvement were highlighted. At the same time, information users gained a better understanding of the procedures involved in running a major sporting event. This collaboration brought about a greater mutual understanding and commitment to working together for the benefit of athletes, sports officials, viewers, readers and subscribers and therefore, ultimately, the sport.

Experience gained during this pilot project encouraged the IOC, the International Federations, and participating media representatives to extend the process to all other sports in the Olympic Programme for future Games, starting with the Nagano 1998 Olympic Winter Games.

The experience gained from the pilot project helped to set the objectives for all subsequent versions of the project. These project objectives are to:

- Form a Working Group for each discipline made up of experts from the various fields related to information technology and information usage for the sport
- Establish and consolidate the IT requirements that an Organising Committee (OC) will be required to fulfil in order to meet the needs of the International Federations (IFs) and media during the Games through a process of consultation among the Working Group
- Set consistency in the level of IT support across the different disciplines at the Games, whilst respecting each sport's traditions
- Analyse and propose changes to current working practices in order to ensure that information delivery is up to date
- Document procedures in a readable and user friendly format, focusing on a description of the required information from a user's perspective
- Ensure that the experience gained at each Game's edition is transferred forward to subsequent Games

During the winter of 1995-1996, the International Olympic Committee (IOC), the Organising Committee for the XVIII Olympic Winter Games, Nagano 1998 (NAOC), 35 representatives of the International Winter Sports Federations and 42 media personnel from 16 countries completed the requirements documents for the 14 Winter Olympic sports.

In February 1997, while the Winter Games documents were being finalised for Nagano, the IOC launched the Summer Games project in parallel. The project was renamed ORIS (Olympic Results and Information Services). Over the next two years, documents for the 37 disciplines on the Sydney programme were completed by the ORIS team, working with sports, media and technology personnel from the Sydney Organising Committee for the XXVII Olympic Games (SOCOG). More than 130 representatives of the 28 International Summer Sports Federations and over 120 journalists from 31 countries were involved in the project.

As a result of the success of the Nagano and Sydney Games, the ORIS project has been leading the results delivery at every Summer and Winter Games organised since.

In parallel, requirements for a data feed to serve the press agencies were defined and documented together with the main news agencies in the so called World News Press Agencies working group (WNPA). The first version of the "Requirements for the Results Data Feed" for summer sports was released in 1995. Subsequent documents were improved, extended to the winter and implemented from the Nagano Winter Games onwards. These requirements have been replaced by a new universal data feed named the Olympic Data Feed (ODF) which was first implemented at the Vancouver 2010 Games.

The development of the ORIS document has combined the expertise and experience of many diverse users who together have thousands of hours of first-hand experience at Olympic Games and other major competitions. The legacy of the lessons learned and the experience gained has been brought to the present version, and the experience gained at the Sochi 2014 Games will be used to further improve future versions.

The ORIS development process (ORIS document production, Change Management, Test Event, Homologation Test, TAO observation, Questionnaires) ensures that the ORIS document remains stable during the development cycle. This also ensures that the document continues to be developed to include valuable feedback received from the Games, and from actual end users of the outputs and feeds produced.

2 ORIS Document Summary

2.1 Terminology

Some terminology used in this document is generic and each OC may use its own terminology. For example, the "Venue Press Centre" may be called "Venue Media Centre", "Sport Presentation" may be called "Sport Production", a "Competition Manager" may be called a "Sport Manager", "ONS" may be called "OPNS", etc.

In this document, the masculine gender used in relation to any physical person (for example, names such as Technical Delegate, official, athlete, judge, referee, score verifier, member of a jury or pronouns such as he, they or them) shall, unless there is a specific provision to the contrary, be understood as including the feminine gender.

2.2 Document Structure

The ORIS document is laid out as follows:

2.2.1 Executive Summary

This part of the document provides an overview of the ORIS project and the ORIS document for Judo. It includes information on the following topics: introduction, document content, cycle and participants.

2.2.2 Judo References

This part of the document describes the references on which the ORIS document is based. It includes the list of events, competition format, competition phases, participation references and source documents.

2.2.3 Procedures

This part of the document describes procedures to be followed by the OC and its partners, the IJF and the IOC. It covers procedures for results services and news services, for both the preparation period and the Games.

2.2.3.1 Results Service and Competition Management Support

The roles and responsibilities of the IJF, the OC Competition Management and OC Technology during all stages of the results delivery process for the competition are defined here. This includes "end to end" information technology support beginning with the athlete entry process up until the completion of the event, including the handling of exceptional situations. Special attention is given to the results verification process and the initiation of results distribution. Procedures are designed to ensure maximum data accuracy in the most efficient manner.

2.2.3.2 News Service and Background Information

Procedures regarding the collection, acquisition and transfer of historical data, biographies and similar background information prepared before the Games are defined here. The roles and responsibilities of the IJF, the IOC and the OC in this process and the data exchanged between these parties before and after the Games are also outlined.

Procedures on the preparation of news (e.g. previews, reviews, flash quotes, press conference highlights, etc.) by the Olympic News Service (ONS) are defined. The expected responsibilities of the IJF and the OC Competition Management in order to support these processes are outlined. The role of OC Technology in the collection and distribution of this information is described.

2.2.4 Section 1: Printable Outputs

All outputs which should be produced are listed in section 1. In addition to technical information linked to the outputs (description of the data items, sorting rules, legend definition, etc.), samples are provided in order to help the organisers and users understand the type of information required. The

format and content of some outputs have become traditional and standard in some sports. ORIS support the policy that such standards should be followed. Details of information content are shown independently of the delivery method, which defines whether information presented in the sample of each output will be printed or be available in INFO.

The "Look" of printed outputs is defined by the OC while ORIS defines the content and structure of information to be displayed or printed in the output body. Printed outputs must include the same data in the same order as defined in ORIS. While text should be formatted as described in ORIS, minor layout adjustments are acceptable (e.g. a column position, height of a cell...). In sport specific outputs, column headings may also be adjusted to display the full title where an abbreviation is presented in the ORIS document, if space allows (e.g. "Rank" could be shown instead of "Rk"). For outputs that are common across all sports (e.g. tables in medal outputs) column headings should be shown as presented in the ORIS document for consistency across sports. For INFO, developers should include the ORIS proposal for the content, though the layout may need to be adjusted because of technical constraints, subject to approval by the ORIS Judo Working Group.

This document does not impose any particular technical solution and therefore many different possible solutions could be used to achieve the production and distribution of the outputs defined in ORIS (e.g. outputs related to news, training schedules, etc. could be produced by using a standard word processor).

2.2.5 Section 2: Distribution Rules

This section defines the distribution of all outputs produced, whether printed or published in INFO. It is divided into three chapters:

- Event related requirements
 - Process description and distribution rules for event related printed outputs and INFO grouped by type of event in chronological order (e.g. results of a competition phase)
- Other outputs
 - Process description and distribution rules of non-event related printed outputs and INFO grouped in chronological order (e.g. competition schedule, three (3) months before the Games)
 - Process description and distribution rules of event related printed outputs and INFO that have no defined production time (e.g. Official Communications)
- Distribution rules and availability of all outputs
 - These outputs are ordered by ORIS output code, and all delivery time variations are grouped under the same output code. These rules are documented in tabular format, showing which outputs the users require, when and where the outputs are needed.

The checking/approval process during output production and distribution is essential. Underestimation of this critical area could result in outputs not being delivered at the right place at the right time.

2.2.6 Section 3: Real Time Information

This section defines the requirements for the presentation of real time information for scoreboards, Real Time Display System (RTDS) and sport specific real time data, as well as a reference to on screen results presentation.

2.2.6.1 Scoreboards

The provision of information to the public at the venues is an important part of the success of an event, keeping those who know the sport informed; and those who are new to the sport enlightened and entertained.

Public scoreboards are defined here. Sport specific scoreboards are also defined, when required by the IJF rules.

It is not the intention to describe all that can be done in this area, but to suggest what is possible, as well as to define what information is mandatory or minimally required. In all cases, the IJF should approve the proposed solution.

2.2.6.2 Real Time Display System (RTDS)

Requirements for real time information concerning the start order and/or current results to be displayed on monitors at the venue (supporting the competition and providing sport and media real time information), are defined in this part, including the content and timing of information.

2.2.6.3 Sport specific real time data

Requirements regarding collection of sport specific real time data, are defined in this part and made available for use by certain ODF subscribers (e.g. GPS tracking data used to produce 3D graphics).

2.2.6.4 On screen results presentation

This part contains references required for the development of on screen results presentation.

2.2.7 Appendix A: Glossary

Since some terminology may be used differently across sports, the glossary helps the reader to understand exactly the intended definition in the ORIS document (e.g. the term "event" as defined in the Olympic Charter may have a different meaning than commonly used in a sport specific context).

2.2.8 Appendix B: Abbreviations

Common abbreviations used in this document are defined in this appendix. Invalid results marks are described in Appendix C - Rules for Data Formats and Presentation.

2.2.9 Appendix C: Rules for Data Formats and Presentation

This appendix describes data formats as they should be used in all outputs, unless other formats are specified in the description table or data matrix.

2.2.10 Appendix D: Supporting Documents

This appendix includes templates for the output "Official Communication" (C67), information for results, medals and diplomas allocation as well as data to be captured. In addition, other supporting documents such as winning techniques and codes are included.

2.2.11 Document Control

This part describes all changes made in this document through its life cycle.

3 ORIS Project Cycle

Together with well-defined requirements, one of the key factors for success in the area of information delivery is proper expectation management. With the ORIS process, the key information users (representatives of International Federations and media) can communicate their information requirements for the Games. These requirements are assessed in the context of the available resources (time, budget, risks, etc.).

3.1 Production of the Updated Version of the ORIS Document

The process for updating the ORIS documentation will be as follows:

- The ORIS team will prepare the ORIS Judo draft document, based on:
 - The last version of the ORIS Judo document of the previous Games
 - International Federation sport rules, competition format and requirements for these Games
 - Previous Games experience (including Questionnaires and Homologation Test issues logged)
- A few weeks before the ORIS Judo meeting, the draft will be made available to the ORIS Judo Working Group, allowing them to prepare for the meeting
- During the ORIS meeting the draft will be analysed and ideas for improvements discussed and agreed upon through consensus of the ORIS Judo Working Group
- Based on agreements reached during the ORIS meeting, the ORIS Judo document version 1.0 will be produced and published on the IOC ORIS extranet for review. The ORIS Judo Working Group members can make comments directly on the IOC ORIS extranet regarding implementation of these agreements.
- The ORIS team will analyse the feedback and publish version 1.1 of the ORIS Judo document submitted for sign-off
- Once the document is signed-off (status approved), all modifications will be brought through a Change Management process
- After the last ORIS meeting for Rio 2016, a consolidation meeting may be held between the ORIS team and the OC (Sports, ONS, Results and partners)

Attending the ORIS meetings and working together on ORIS document updates will help all parties build and maintain good working relationships and improve understanding of their individual needs and responsibilities. The ORIS meeting is the best opportunity for all of the Working Group members to provide their input to the ORIS team and to help with the development of the ORIS document. It is emphasised that the development of the ORIS document is a collaborative effort and the goal is to develop a consensus among the Working Group members. The ORIS team will make every effort to facilitate this process.

As the process of updating the ORIS document is organised at an early stage in the Games preparations, OC Technology can issue early warnings whenever ORIS might request deliverables or availability of requirements which are difficult or impossible to satisfy with the resources available (budget, time, etc.). Because of this, some topics may remain highlighted in yellow, pending decisions by the International Federation, the IOC or the OC. Deadlines for resolution of these topics will be set during the ORIS meeting. Most of these deadlines will occur after sign-off of the ORIS document. Therefore any change regarding yellow highlighted text is automatically exempt from the Change Management process.

The procedure for updating the ORIS document also allows the OC's Technology providers to present the functionality and performance of existing solutions, in order to minimise changes and to raise any points for clarification required by their development teams.

The entire ORIS process (ORIS meeting, Test Event and Homologation Test) provides excellent opportunities for team building. The Test Event (if any) provides an opportunity to test production and distribution of outputs under high pressure and stressful conditions, similar to those experienced at the Games.

3.2 ORIS Document Sign-off

The IJF and the Organising Committee will sign-off the ORIS Judo document after all agreed changes have been implemented.

For the IJF, the sign-off will represent a commitment that requirements are well defined and consistent with current sport rules, that they will be adequate for the smooth running of the Judo competition and that the procedures as described in the document will be followed.

For the Organising Committee, the sign-off will represent its commitment to deliver the ORIS requirements. The sign-off letter will be signed by the representative of Sports, Media and Technology.

Some issues, such as anticipated rule changes, could remain open and will be highlighted in yellow in the document. Updates of these topics will be made under the Change Management Process, however, implementation of these changes is mandatory.

3.3 Change Management

A Change Request should be logged if the IJF or the OC requests any change which has an impact on the ORIS Judo document.

The most common reasons for International Federations requesting changes are changes to the competition format or to the implementation of new rules. For Organising Committees the most common reason for requesting changes is because commitments made in the ORIS document no longer match the organisation of the discipline at the Games.

It is also possible that experience from the OC's Test Event (or other event), or the findings of the Homologation Test, will show that some requirements or procedures are no longer valid or require further improvements.

Change Requests will be registered and reported as per the ORIS Change Management procedures as defined in a separate document, as agreed between the IOC and the OC.

Once a Change Request has been approved, the ORIS team will publish an updated version of the ORIS Judo document.

3.4 Test Event

The OC, in conjunction with the International Federation, will conduct a Test Event (sometimes also called Sport Event) which is the best (and only) chance for OC Technology to test its systems and operational procedures in real conditions. A successful Test Event should preferably be run under conditions which are as close as possible to the competition format that will be used at the Games.

3.4.1 ORIS Team Participation

IOC Technology will appoint ORIS observer(s) for each Test Event. The main tasks of these observers are:

- To help OC Technology evaluate the performance of the implemented systems
- To monitor if procedures described in ORIS are followed and applicable
- To collect feedback from all users (the IJF, media, teams, etc.)
- To prepare required changes to the ORIS Judo document
- To provide support to key users and act as moderators

3.4.2 Test Event Review Meeting

A Test Event review meeting will be held before the end of the Test Event with the ORIS Judo Working Group in order to evaluate the findings and discuss solutions and improvements for the Games.

It is recommended that the Venue Results Manager organises and chairs this meeting and takes the meeting minutes.

Following the Test Event, the ORIS Sport Analyst will prepare the Change Request if required.

3.5 Homologation Test

The Homologation Test will be carried out in the OC lab, led by the IJF and supported by OC Technology and partners. The lab set-up must simulate all the major functions of the Games (venues, central system and their interfaces).

It must be organised early enough (six to nine (6-9) months before the Games) to allow sufficient time for the OC's Technology providers to solve any issue detected.

The Homologation Test covers the complete "end to end" process for the system's functions defined in the ORIS Judo document. The test begins with entry data for athletes and officials, continues through the draws and with start lists creation, followed by results activities and production of the results outputs and medals. The test also evaluates the ability of the system to fulfil the key ORIS requirements including (but not limited to):

- Outputs produced by On Venue Results system (OVR)
- Olympic Data Feed (ODF) messages
- INFO presentation of competition and news outputs, direct print from INFO, live screens, medals, etc.
- Scoreboards
- RTDS

The IJF, with the help of the ORIS team, will prepare all possible test cases and scenarios (from normal progression to exceptional situations) at a reasonable time before the Homologation Test. All the important variations of results should be tested and all the affected outputs should be checked with such test cases.

All issues identified during a Homologation Test are immediately entered into the OC's issue tracker. The issues are discussed and agreed upon, and action plans are proposed by the participants during the daily issue management meetings. If a consensus is not reached, the issue will be escalated to the IOC and the OC Technology management.

All parties affected by any of the issues identified should be kept fully updated of the progress.

The results of the Homologation Test are summarised in the IJF and WNPA reports. Those documents are then sent to the OC, the IJF, the IOC, and the news press agencies. Any problem areas identified will be the subject of future testing.

The success of the Homologation Test largely depends on the level of preparation of the OC Technology team, and on the quality of the testing software. This process has been used at every Games since Nagano 1998. It was one of the key factors which contributed to the success of these Games.

3.6 IOC Technology Assistance and Observation

For each Olympic Games the IOC Technology department will establish an IOC Technology Assistance and Observation programme (TAO).

The principal tasks of the TAO team during the Games are to help OC Technology ensure the success of the Games through efficient and accurate Information Technology support to the key users, as well as to evaluate lessons learned in order to contribute to improving the processes and deliverables for future Games (outputs and procedures).

The ORIS team will attend as many of the key phases as possible (draw, change of competition phase, etc.).

All problems will be reported using the regular OC Technology reporting lines. The ORIS team will be a part of the problems escalation process and, if required, be a link with the International Federation representatives.

The ORIS team should also report any feedback to the OC concerning the IT services that they have received from International Federations and Media.

3.7 Transfer of Knowledge

In order to contribute to the process of technology transfer to future organisers and to prepare the basis for the ORIS document update for the next Games, the ORIS TAO team will use the Games

Questionnaires to document the IJF, OC and media findings, comments and suggestions for improvement.

3.8 Support

The IOC ORIS extranet is the platform used to share all documents related to ORIS (current version of the ORIS Judo document, Homologation Test documentation, ORIS meeting documentation and reports, etc.). The IOC ORIS extranet is also used to record and share feedback within the ORIS Judo Working Group.

Access to the IOC ORIS extranet will be granted by the IOC ORIS extranet Manager.

4 Rio 2016 ORIS Project Participants

The ORIS Judo project is managed and supervised by different committees and groups. It is coordinated by the IOC and composed of representatives of the IJF, the OC (Sports, Media, Technology) and its IT partners.

The ORIS Steering Committee:

- Initiates and oversees the ORIS project for Rio 2016
- Resolves exceptional issues that cannot be managed by the ORIS Project Management and the OC Technology team
- Meets at the official project launch and subsequently if required
- Is informed by regular reporting (deliverables, finances...)

The members of the Rio 2016 ORIS Steering Committee are:

- **Mr Jean-Benoît GAUTHIER**, IOC Technology and Information, Director (Chair)
- **Mr Kit McCONNELL**, IOC Sports, Director
- **Mr Anthony EDGAR**, IOC Games, Head of Olympic Games Media
- **Mr Rodrigo GARCIA**, Rio 2016 Sport Director
- **Ms Lucia MONTANARELLA**, Rio 2016 Head of Press Operations
- **Mr Elly RESENDE**, Rio 2016 Technology Director
- **Ms Françoise PERROUD**, Rio 2016 Technology Results Manager
- **Mr Nicolas HUREL**, IOC Technology and Information, Head of Olympic Results and Information Services (ORIS)

The ORIS Management Team:

- Follows the Rio 2016 ORIS project sport by sport and step by step
- Receives reports after each of the ORIS meetings, Homologation Tests and Test Events
- Each member communicates potential issues to his/her functional areas when they are affected

The members of the Rio 2016 ORIS Management Team are:

- **Mr Jean-Benoît GAUTHIER**, IOC Technology and Information, Director
- **Mr John GIANCARLO**, IOC Technology and Information, Head of Olympic Games Technology
- **Mr Anthony EDGAR**, IOC Games, Head of Olympic Games Media
- **Ms Isabella BURCZAK**, IOC Sports, Head of Sport Projects
- **Mr Pierre FRATTER-BARDY**, IOC Sports, Head of Summer Sports and IF Relations
- **Mr Nicolas HUREL**, IOC Technology and Information, Head of Olympic Results and Information Services (ORIS)
- **Mr Namik DJUMISIC**, IOC ORIS Project Manager and Sport Coordinator
- **Ms Françoise PERROUD**, Rio 2016 Technology Results Manager, Rio 2016 ORIS Liaison

The ORIS Judo Working Group:

- Attends the ORIS meeting to discuss and agree on the Judo results information requirements for the Rio 2016 Olympic Games, based on the documents used and experience gained at previous Games as well as taking potential rule changes into consideration
- Follows the ORIS document evolution
- Participates in the Judo Homologation Test in the OC lab
- Receives reports after the ORIS meeting, Homologation Test and Test Event
- Participates in the ORIS Change Management process, including document review and feedback

The members of the ORIS Judo Working Group are:

- **Ms Lisa ALLAN**, IJF Competition Manager
- **Mr Matthias FISCHER**, IJF IT Director
- **Mr Natanael Kenji SAITO**, Rio 2016 Judo Sport Manager
- **Mr Eusebio GALVAO**, Rio 2016 Press Services Manager
- **Mr Tassos KOUTSOGIANNIS**, Rio 2016 Cluster Venue Results Manager
- **Mr Peter HAMILTON**, Atos, ODF Project Manager
- **Mr Adib TARABEN**, OMEGA Venue Manager
- **Mr Tomas BIHARY**, OMEGA Results Manager
- **Mr Nicolas HUREL**, IOC Technology and Information, Head of Olympic Results and Information Services (ORIS)
- **Mr Ketil PETTERSEN**, IOC ORIS Sport Analyst for Judo

The ORIS project is supported by:

- **Ms Marlène DROZ**, IOC Technology and Information, ORIS Project Technical Editor, IOC ORIS extranet support
- **Ms Natasa DUMIC**, IOC Technology and Information, ORIS Project Secretary
- **Mr Charlie GROVES**, IOC ORIS Project Language Support
- **Ms Nadine SAAGER**, IOC ORIS Project Technical Editor
- **Ms Renée SEWJEE**, IOC ORIS Project Technical Editor

		Qualification	Bracket with direct elimination, repechage and finals

- The events are presented in traditional IJF order
- The bracket is divided into four pools: A, B, C and D
- Total number of events: 14
- A full overview of Progression and Competition Format types is included in Appendix A - Glossary

2 Competition

- Competition format

- All weight categories
 - Olympic Judo events are based on a direct elimination system
 - Repechage contests allow the losers of the quarterfinals a chance to compete for the bronze medals
 - The competitors will be divided into two tables by means of a "draw", and an elimination system will be used to produce two finalists, who will compete for the gold medal
 - The competitors defeated in the quarterfinals will compete in the two repechage contests. The winners of each of these two repechage contests will compete in a bronze medal contest against the loser of the semifinal contest of the opposite table.
 - The winners of the bronze medal contests are awarded the bronze medals, and the losers are placed equal fifth
 - The losers of the repechage contests are placed equal seventh
 - The top eight judoka per weight category from the World Ranking List, updated at the end of the qualification period, will be seeded. All other judoka will be randomly drawn.

- **Tie Break Rules within a contest**
 - When the time allotted for the contest ends (five (5) minutes for men and four (4) minutes for women) and there is no score/penalties, or scores/penalties for both contestants are equal, a Golden Score will take place (no time limit)
 - The Referee calls "Soremade" and the time clock will be reset
 - Any scores or penalties shown in all real time outputs (scoreboards, TV captions, RTDS, etc.) will remain
 - There will be no rest period between the end of the original contest and the start of the Golden Score contest
 - The first score or penalty awarded will decide the contest, and the contest is stopped
- **Venue type**
 - Indoor
 - Single venue
- **Participation references**

The following information is an indication of the estimated participation at these Games for the purposes of software development only. Actual numbers are defined in the Qualification System document approved by the IOC.

- Athletes: 386 in total (conditions maximum 1 per NOC per weight category, a total of 14 per NOC)
- Expected number of athletes: around 60% male and 40% female
- Wild cards: 20

3 Documents

- Olympic Charter in force
- IOC Rio 2016 Host City Contract
- IJF Sports and Organisation Rules - April 2013
- International Judo Federation Olympic Games Medal Reallocation in the case of Disqualification

Procedures

1 Introduction

The aim is to document the procedures to be followed to ensure an efficient results delivery and to determine who should act (when, where and how) in order to satisfy user information expectations.

The proposed procedures are based on the experience gained at previous Games and other large Judo events and, in some cases, include proposals on how to improve existing practices.

The responsibilities of each party involved in the production and delivery of specified outputs are precisely defined including the time frame or deadlines in which the parties have to fulfil them.

2 Results Service and Competition Management Support

Roles and responsibilities of the key participants are documented in chronological order, starting a few months before the Games and ending with the production and distribution of the Results Book.

2.1 Pre-Games Activities

Some competition-related information must be available as soon as INFO goes live.

The final few weeks before the Games can be hectic and the OC should anticipate the workload as much as possible.

2.1.1 Schedules

Schedules are available from a number of different sources prior to the Games (OC communications, official website, ticketing, etc.).

OC Technology must develop appropriate procedures to ensure that any schedule updates are promptly and accurately published and distributed to the users.

The Games competition schedule will be developed between the OC Competition Management and the IJF Technical Delegate well in advance of the Games. This process must be initiated sufficiently early so that there is adequate time to ensure that data are complete and accurate. This schedule data should be used to build the integrated Games schedule navigation page and the schedule screens for each discipline in INFO.

Four (4) weeks before the Opening Ceremony, the Venue Results Manager should produce the output:

- Competition Schedule (C08)

for verification and approval by OC Competition Management

OC Technology (Venue Results Manager and Technical Operations Centre) will then upload this file in INFO. This output will be available in PDF format on the day INFO goes live. Once the IJF and OC Competition Management arrive at the venue, the output should be distributed according to the ORIS distribution rules.

The output "Competition Schedule" (C08) will normally be produced only once for the entire Judo competition. However if changes to the schedule do occur, the output "Competition Schedule" (C08) will be updated by OVR once they become owner of the data. It will be redistributed (at the end of the day) and marked as "REVISED".

OC Technology will, based on information provided by the OC Competition Management, also produce the output:

- Activity List (C06)

This output will become available on the day that INFO goes live, and will be distributed according to the ORIS distribution rules.

Training schedules will be managed by OC Competition Management and the IJF internally. Those training sessions should be updated on INFO, several times a day, after each NOC requests a slot.

2.1.2 Entries and Participant Data

The entry process is managed by the Sport Entries sub-function within the OC Sport Department. In order to fulfil the ORIS requirements, special attention should be paid to the information to be collected through the entry forms (data to be captured are included in Appendix D - Supporting Documents).

2.1.2.1 After the Sport Entry Deadline

All eligible athletes for the Games must have been entered by their NOCs by the Sport Entry Deadline, in accordance with the Qualification System.

After the Sport Entry Deadline, OC Technology will produce and update the outputs:

- Entries (C31A)
- Entries by Weight Category (C31C)
- Facts and Figures - Birthdays during the Games (N86F)

and make them available in INFO.

These outputs will be updated after each Delegation Registration Meeting (DRM) in case of replacement or data correction.

2.1.2.2 Participant data verification

Emphasis should be placed on data accuracy and correct spelling and/or transcription of athlete names.

Information users, in particular the media, are used to seeing names spelt in a certain manner at other IJF events, and the Games should be no different. At Games time, the space available to display a name (e.g. in an output or on a scoreboard screen) may vary considerably. It is therefore extremely important that all different name lengths (the maximum number of character spaces available) are verified before any entry lists are produced.

As soon as OVR becomes the owner of the participant data, the output:

- Entry Data Checklist (C38)

will be produced with all name lengths to be used during the Games and given to the IJF Technical Delegate for checking and approval.

The IJF will review and approve the forms internally. The approved/corrected outputs should be returned to OC Technology no later than three (3) days before the draw meeting.

In addition, the output:

- Entry Data Checklist - Competition Officials (C39)

will be given to the IJF Technical Delegate for checking and approval. The IJF Technical Delegate will return the approved/corrected outputs to OC Technology no later than three (3) days before the draw meeting.

It is essential that only a single copy of the checklists circulates at any time in order to avoid errors.

Upon completion of the participant data process, OC Technology should print the first copy of the output:

- Entry List by Weight Category (C32C)

for the IJF Technical Delegate to check.

2.1.2.3 Competition officials

No later than one (1) month before the Opening Ceremony, the OC Competition Management will provide the Venue Results Manager with the names and functions of all persons who may be included in the outputs "Competition Officials" (C35) and "Referees and Judges" (C35B).

Four (4) days before INFO goes live, the Venue Results Manager should produce the output:

- Competition Officials (C35)

for verification and approval by the OC Competition Management. Once approved, this output will be available in PDF format on the day INFO goes live. Once the IJF and OC Competition Management arrive at the venue, the output should be distributed according to the ORIS distribution rules.

2.1.2.4 Replacement of an athlete

2.1.2.4.1 Late athlete replacement

Only those athletes who are eligible can be used as replacements and should be included in the initial data transfer to OVR.

Once the Late Athlete Replacement (LAR) procedure has been completed and Sport Entries has confirmed the change to the Venue Results Manager, the replacement athlete should be activated and the relevant output "Entry Data Checklist" (C38) should be produced for validation as defined in the

participant data verification process. At the same time, the replaced athlete should be removed from the entries and the entry output(s) updated accordingly.

This procedure must be completed no later than two (2) hours before the draw.

If any output including the replaced athlete name has been released it should be reissued, marked as "REVISED", with a free text note explaining the replacement.

2.1.2.5 IJF unique athlete identification

The IJF has its own unique athlete identification.

2.2 Pre-Competition Activities

After the IJF officials arrive in the host city, they will work with the OC Competition Management on the final preparations for the Games. During the period before the draw, a lot of time will be spent on final checking of the participant data and the preparation, checking and correction of other information if necessary.

2.2.1 Presenters at Victory Ceremonies

No later than ten (10) days before the first day of competition the IOC and the IJF will provide OC Technology and ONS with the list of potential presenters and persons accompanying them, that will include all data necessary for presenting this information for the Victory Ceremonies (Title, long and short versions of names, NOC, short biography).

2.2.2 The Draw

The draw process is managed and operated by the IJF in co-operation with the OC Competition Management using IJF software. The draw will take place two (2) days before the first day of competition.

The draw is a very important session leading up to the Judo competition. Many NOC representatives will attend, together with media and other members of the Olympic Family.

It is anticipated that there may be up to 500 people present at the draw session. Some of these attendees may require a day pass if the draw is taking place in an accredited venue.

Each person will require a stapled set of the draw sheet for the 14 weight categories.

During the draw, the audience should be able to follow the draw as it proceeds, on large screens or by other means such as projectors.

OC Technology must fully prepare for this process and provide adequate resources (connectivity, computer, local printer, etc.) as well as trained personnel to support the Draw.

As large numbers of these outputs will be required it is extremely important that the OC fully prepare for this process and provide adequate resources and trained personnel to meet the distribution time (printing, copying, collation and stapling equipment, distribution personnel).

It is the responsibility of the OC to ensure that the Sports and Technology departments communicate with each other and define their respective responsibilities for organising the Draw. The Draw procedure should be tested at the Test Event.

A rehearsal **must** be organised on the day before the Draw at the Olympic Games.

2.2.2.1 Before the draw

No later than forty-eight (48) hours before the draw, OC Technology will provide the IJF Technical Delegate, in his office at the judo venue, with the first version of the following outputs:

- Number of Entries by NOC (C30)
- Entry List by Weight Category (C32C)
- Entry Data Checklist (C38) - for judoka who were added recently

2.2.2.2 During the draw

No later than two (2) minutes after the draw for each weight category, the IJF Technical Delegate or the designated person will provide OC Technology with the output:

- Draw Form (C47)

Within the following two (2) minutes, OC Technology should print a first copy of the output:

- Draw Sheet (C75) - without contest numbers

for that weight category, and deliver it to the IJF Technical Delegate or the designated person, for verification.

The IJF Technical Delegate or the designated person should check and approve this output for that weight category within the following five (5) minutes.

No later than thirty (30) minutes after the draw is completed for the last weight category, the output

- Draw Sheet (C75) - without contest numbers

should be distributed according to the ORIS distribution rules for each weight category.

The OC should take into consideration the media and sport users request to receive a stapled set of all of the outputs "Draw Sheet" (C75).

No later than thirty (30) minutes after the draw sheets have been distributed, OC Technology should update (if needed) the outputs:

- Number of Entries by NOC (C30)
- Entry List by NOC (C32A)
- Entry List by Weight Category (C32C)

for distribution according to the ORIS distribution rules.

The IJF Technical Delegate should provide OC Technology with the referees and judges numbers after the Referee Commission meeting which will take place after the Draw.

No later than thirty (30) minutes after receiving the referees and judges numbers, OC Technology will produce the output:

- Referees and Judges (C35B) - with Referees/Judges numbers

for verification by the IJF Technical Delegate. Once approved, the output will be distributed according to the ORIS distribution rules.

2.2.2.3 After the draw

Contest order numbers are unique per day per mat, regardless of the weight category.

The IJF Technical Delegate will provide the contest order numbers to OC Technology no later than four (4) hours after the draw, weight category by weight category.

No later than two (2) hours after receiving this data, OC Technology should produce the first copy of the outputs:

- Draw Sheet (C75) - with contest numbers
- Weigh-in Form (C45) - for all weight categories
- Contest Order (without Referee/Judges numbers) (C58A) - preliminary rounds

for verification and approval by the IJF Technical Delegate.

This verification process by the IJF Technical Delegate should be done in parallel as OC Technology is producing these outputs for each weight category for each day.

Once the last weight category has been approved, these outputs will be distributed according to the ORIS distribution rules.

2.3 Results Processing

2.3.1 Weigh-in

The weigh-in is usually held at the Olympic Village. This should be conducted for men and women simultaneously, in separate rooms, for the weight categories competing on the next day.

No later than five (5) minutes after the weigh-in, the IJF Technical Delegate or the designated person should inform OC Technology that the weigh-in has been completed and report any judoka marked as DNS or DSQ.

Immediately after the weigh-in has been completed, the IJF Technical Delegate or the designated person will bring the completed "Weigh-in Form" (C45) to OC Technology at the competition venue.

No later than one (1) hour after receiving these forms, or after competition is finished for that day, OC Technology should produce the first copy of the output:

- Weigh-in List (C56)

which should be checked by the IJF Technical Delegate or the designated person, within the following five (5) minutes.

At the same time, the IJF Technical Delegate or the designated person will inform OC Technology of any changes to the "Draw Sheet" (C75) for the first round of each weight category (DNS judoka).

No later than two (2) minutes after approval of the output "Weigh-in List" (C56), OC Technology should produce the outputs:

- Weigh-in List (C56)
- Draw Sheet (C75) - with contest numbers, if any changes were made

for verification by the IJF Technical Delegate or the designated person. Once approved, the output will be distributed according to the ORIS distribution rules.

OC Technology should then produce the output:

- Contest Order (without Referee/Judges numbers) (C58A) - preliminary rounds, if any changes were made

for verification by the IJF Technical Delegate or the designated person. Once approved, the output will be distributed according to the ORIS distribution rules.

2.3.2 Referee and judges allocation

No later than ninety (90) minutes before the competition, the IJF Technical Delegate or the designated person will provide information about the referee and judges for the first round contests of each weight category to OC Technology.

Within two (2) minutes after receiving the allocation of the referee and judges, OC Technology will produce one copy of the output:

- Contest Order (with Referee/Judges) (C58B)

for verification by the IJF Technical Delegate. This output will not be distributed to any other client.

2.3.3 Competition - sessions (morning and afternoon)

2.3.3.1 Before each contest

The information about the referee and judges for each contest should remain strictly internal until the contest status changes to "Getting Ready", which should be when judoka enter the field of play.

2.3.3.2 During and after each contest

Scores will be entered onto the IJF "Contest Sheet" forms during each contest by the Technical Officials.

The OC Competition Management should prepare adequate quantities of these forms (20% more than the expected number of contests in all weight categories).

The Technical Officials operate the OC Technology scoring system keyboards at each mat, enter scores and operate the clock and complete the IJF "Contest Sheet" (scores, techniques and times).

Once a contest is finished, the IJF "Contest Sheet" will be signed by the IJF Sport Commission member officiating on that mat and brought to OC Technology at the technical table to be entered in the system.

Within the following two (2) minutes, OC Technology will produce the output:

- Contest Results (C73)

for verification by the IJF Technical Delegate or the designated person. Once approved, the output will be distributed according to the ORIS distribution rules.

2.3.3.3 After a round is completed on a mat

The IJF Technical Delegate or the designated person will communicate to OC Technology the information necessary to update the outputs "Contest Order" (C58A and C58B) as they become available. Within two (2) minutes after a round is completed for a weight category on a mat, OC Technology will produce one copy of the outputs:

- Contest Order (without Referee/Judges) (C58A) - subsequent round
- Contest Order (with Referee/Judges) (C58B) - subsequent round
- Draw Sheet (C75) - with results

for verification by the IJF Technical Delegate or the designated person.

Once approved, these outputs will be distributed according to the ORIS distribution rules.

2.3.3.4 Before the first final of that day

No later than sixty (60) minutes before the first final the OC Protocol should provide ONS with the names of the medal presenter(s) and the accompanying person(s).

As soon as the presenters are known by OC Protocol, the output:

- Medal Presenters (N91B)

if the Victory Ceremony is organised at the venue immediately after the finals, should be produced and distributed according to the ORIS distribution rules.

Late changes frequently occur shortly before the Victory Ceremonies. Any such changes should be communicated immediately by the OC Venue Protocol Manager to OC Technology, Sport Production and ONS.

2.3.3.5 After the final contest of a weight category

Immediately after the final contest, OC Technology will produce the outputs:

- Medallists (Individual) (C92A)
- Medallists by Weight Category (C93)
- Medal Standings (C95)
- Results Summary (C74A)
- Results Summary by NOC (C74B) - INFO only
- Competition Statistics (C83)

and distribute them exactly in that order, according to the ORIS distribution rules. These outputs are ready for distribution without further validation.

2.3.3.6 After the last weight category

In addition to previously mentioned outputs, but only after the last weight category, OC Technology will produce the output:

- Results Summary by NOC (C74B)
and distribute it according to the ORIS distribution rules.

2.4 Common Sport Functions

2.4.1 Official Communications

The Technical Delegate or the designated person may issue the output:

- Official Communication (C67)

to inform all clients about key decisions (e.g. schedule and results changes) or to communicate significant information that media and broadcasters should know.

If any such decision is made, the IJF Technical Delegate or the designated person will, within the following five (5) minutes, complete the text of the decisions made on the appropriate form. The following information should be included:

- Who made the decision
- The event and/or judoka affected
- The date and time of the decision
- The text of the decision
- The affected area (results, schedule or other)

OC Technology will receive the form, enter it into the OC computer system and print a copy of the output "Official Communication" (C67) within two (2) minutes.

As soon as the IJF Technical Delegate or the designated person has authorised the copy, it will be distributed immediately according to the ORIS distribution rules. All affected outputs should be updated and republished as "REVISED" as soon as possible. If the Results Book has already been produced, an updated version should be published.

An appropriate form is included in Appendix D of this document.

Note: If an "Official Communication" (C67) affects a Games stakeholder or partner, they should be consulted before releasing the output for distribution.

2.4.2 Sport Communications

The output:

- Sport Communication (C68)

should be used to inform a sport specific audience about information or decisions from the IJF, the IOC and/or the OC Competition Management (e.g. reminders, sport information, etc.).

The principles for the production of this output are similar to those described for the output "Official Communication" (C67). Paper distribution is limited to the venue, the Sport Information Desk at the athletes' village and in INFO.

2.5 Exceptional Situations Handling

For any of the following exceptional situations, the Technical Delegate or the designated person may request production of the output:

- Official Communication (C67)

and will provide the appropriate text to be used.

2.5.1 Schedule Changes

The following schedule status options are applicable to an event or event unit (session, weight category, phase or contest):

2.5.1.1 Delayed

A delay may occur if a session does not start as scheduled, but should start within the current ticketing session.

The new start time is unknown. If the delay exceeds the current ticketing session, the status will be changed to postponed, rescheduled or cancelled.

2.5.1.2 Postponed

A session did not start as scheduled and has been postponed to a later ticketing session. The new date and start time is unknown. The status will subsequently be changed to rescheduled or cancelled. If an interrupted session cannot be resumed within the current ticketing session and the new date and start time is unknown, the status will be changed to postponed. The status will subsequently be changed to rescheduled or cancelled.

2.5.1.3 Interrupted

A session may be subject to an unplanned interruption after it has started.

The time of resumption is unknown. If the session cannot be completed within the current ticketing session, the status will be changed to postponed, rescheduled or cancelled.

The results of completed contests will be carried forward to the new date and start time. An uncompleted contest may be restarted from the beginning or continue from the point of interruption.

2.5.1.4 Rescheduled

A session may be rescheduled if it cannot be held at the originally scheduled start date/time.

The new date and start time are known. If it is impossible to reschedule a session or phase of competition within a certain time frame, the status may be changed to cancelled.

2.5.1.5 Cancelled

A weight category which cannot be rescheduled prior to the Closing Ceremony of the Olympic Games is cancelled.

In such a case the IOC and the IJF will decide what effect the situation would have on the competition and what actions should be taken.

If one or more event(s) is cancelled, all affected outputs (e.g. medal outputs, events summary, etc.) must be adjusted and a free text note listing the cancelled event(s) should be added. For outputs with the indication "after x of y events", the number of events (y) will remain unchanged.

2.5.2 Competition Related

2.5.2.1 During Weigh-in

If a judoka fails to attend the weigh-in control during the official weigh-in period, or fails to weigh-in within the limits prescribed for the category in which he is entered, the IJF Technical Delegate will inform the OC Technology representative within five (5) minutes after the weigh-in is completed. Judoka who do not meet the weight category entered will be marked as DSQ. Judoka who do not appear will be marked as DNS.

Based on this information, within the following fifteen (15) minutes, OC Technology will produce revised versions of the outputs:

- Draw Sheet (C75)
- Contest Order (without Referee and Judges) (C58A) - preliminary rounds

and an "Official Communication" (C67) will be produced listing all judoka who failed the weigh-in.

The contest numbers that were provided to OC Technology by the IJF Technical Delegate after the draw will remain unchanged following a DNS/DSQ at the weigh-in.

2.5.2.2 Cancelled contest

The output "Contest Results" (C73) will be produced including the IJF decision for a cancelled contest.

2.5.2.3 Hansoku-make

There are several possibilities for Hansoku-make within the sport of Judo.

1. In the case of Hansoku-make resulting from "progressive" penalties, the contestant penalised with four Shidos is allowed to continue competition in repechage, including the bronze medal contest (if applicable). The outputs "Contest Results" (C71) and "Draw sheet" (C75) must be produced with a "4" included in the contest score of the disqualified judoka (i.e. 100 / 0S4).
2. In the case of direct Hansoku-make for "protection" of the judoka (diving head first onto the mat), the judoka is allowed to continue competition in repechage, including the bronze medal contest (if applicable). The outputs "Contest Results" (C71) and "Draw sheet" (C75) must be produced with an "H" included in the contest score of the directly disqualified judoka (i.e. 100 / 0H).
3. In the case of direct Hansoku-make for acts against the Judo spirit the judoka cannot continue in the competition. In this case, a sanction may be added and IJF officials will decide his classification. The outputs "Contest Results" (C71) and "Draw sheet" (C75) must be produced with an "X" included in the contest score when a disqualified judoka is excluded from the competition (i.e. 100 / 0X).

In these three cases, the opponent wins the contest by IPPON.

2.5.2.4 Double Hansoku-make

In the case of double Hansoku-make as a consequence of a fourth Shido, the result is considered equal and the Golden Score rule will be applied.

For direct Hansoku-make given to both contestants, the IJF Jury will decide.

2.5.2.5 Situations not covered by the rules

When any situations arise which are not covered by the IJF rules, they will be dealt with by the IJF Sports Commission and/or the IJF Jury and a decision will be made.

2.5.2.6 Contest interruption

Should a contest be interrupted by the Referee for any external reasons, the Referee will decide when to resume the contest.

If the interruption is due to timing and scoring equipment failure, the contest may be resumed using the OC manual timing and scoring systems, and affected outputs will be produced as normal.

2.5.3 Disqualifications

2.5.3.1 Disqualification after an event and up to three days after the Closing Ceremony

This three (3) day period corresponds to the time for which the Court of Arbitration for Sport remains in the host city after the Games, and is available to pronounce on a disqualification in case of appeal.

Up to this deadline, OC Technology will update all results as required. All updated outputs should be approved by the IJF Technical Delegate or the designated person before distribution.

2.5.3.1.1 Disqualification within the Top 8

Changes in placements are applicable only within the top 8. Judoka ranked after this position will not be re-ranked.

The placements will be reallocated as described in the document "International Judo Federation Olympic Games Medal Reallocation in the case of Disqualification".

2.5.3.1.2 Disqualification after the Top 8

The judoka ranked below the top 8 will not be re-ranked, therefore no diploma will be allocated.

2.5.3.2 Disqualification more than three days after the Closing Ceremony

Starting from the 4th day after the Games Closing Ceremony, the IJF will become responsible for updating the results if necessary. Disqualifications may come from either the IOC or the IJF. The IJF is responsible for providing the updated results to the IOC.

2.5.4 Communication in case of disqualification by the IOC Disciplinary Commission

If an athlete is disqualified by the IOC Disciplinary Commission after the results of an event have been made official and distributed and up to three (3) days (inclusive) after the Games Closing Ceremony, the IOC Disciplinary Commission will communicate its decision through the IOC official communication channels (press release and publication on www.olympic.org).

The athlete, the athlete's NOC, the IJF, OC Competition Management and OC Technology will be informed following the established IOC procedure.

The IJF Technical Delegate, or the designated person, should, together with OC Technology, produce an "Official Communication" (C67) explaining that results have been updated according to the IOC Disciplinary Commission decision.

The sample text to be used in this Official Communication (C67) is detailed in Appendix D (Subtitle: E, Summary: 8, Issued by: I, Further information: iv) of this document.

As soon as the decision for disqualification is made public by the IOC, the following procedures should be followed:

- ONS should copy the IOC press release and paste it without any modifications into the output "IOC News" (N90C) and publish it in INFO
- As soon as the IJF Technical Delegate, or the designated person, has authorised its release, the output "Official Communication" (C67) will be distributed according to the ORIS distribution rules
- OC Technology will update and republish all affected outputs with a "REVISED" stamp and a free text note explaining the disqualification

Since such a decision can occur at any time, and publication of accurate information is extremely time critical, it is vital that the IJF Technical Delegate or the designated person, is available and able to communicate with the OC Competition Management, OC Technology and the IOC Head of ORIS at all times. This includes the period before the Games start, the period after the Judo competition ends, and the period after the Games end (up to three (3) days after the Closing Ceremony). Travel by the IJF Technical Delegate during those periods before or after the Games may require that a designated person be available to cover this responsibility.

Note: Authors of this ORIS document do not imply that this is a complete list of exceptional situations that could occur before, during or after the competition. The OC and their technology suppliers are responsible for researching any missing information in the relevant IJF and/or IOC documents and for gaining and analysing experience from other competitions.

2.6 Reissuing Outputs

There are two conditions for reissuing an output:

- A new version of a previously distributed output is produced as a regular case: no stamp is required. This applies to the following outputs:
 - Contest Order (without Referee/Judges numbers) (C58A)
 - Contest Order (with Referee/Judges numbers) (C58B)
 - Draw Sheet (C75)
 - Medallists by Weight Category (C93)
 - Medal Standings (C95)
- A new version of a previously distributed output is produced due to a change of data: a "REVISED" stamp is required, including the date and time of output creation. The reason for the revision must be explained as a note (free text) at the bottom of the last page of the output.

For outputs which need to be reissued with a "REVISED" stamp and have an "at time" in the heading, the following rules will apply:

- If an error needs to be corrected (e.g. data entry error), the same "at time" should be kept as used in the originally released version of this output
- If an update needs to be made based on new information received (e.g. data change), the "at time" should be adjusted to the time at which this new information was provided

Note: The outputs "Official Communication" (C67) or "Sport Communication" (C68) will not be issued with a "REVISED" stamp. If a C67 or C68 needs to be corrected, a new output (with a new item number) should be produced.

2.7 Results Book

The Results Book should contain the documents below, in the following order:

- Judo cover page
- Version History (only if more than one version of the Results Book is produced)
- Competition Format and Rules (N02)
- Competition Officials (C35)
- Referees and Judges (C35B)
- Official Communication (C67) - if not weight category specific
- Number Entries by NOC (C30)
- Medallists by Weight Category (C93)
- Medal Standings (C95)
- Results Summary by NOC (C74B)

For each of the IJF weight categories (in traditional IJF order):

- Entry List by Weight Category (C32C)
- Weigh-in List (C56)
- Draw Sheet (C75)
- Results Summary (C74A)
- Competition Statistics (C83)
- Contest Results (C73) - as they occurred, under one bookmark
- Official Communication (C67) - if related to that weight category
- Sport Communication (C68) - if requested by the IJF

All outputs to be included in the Results Book will be the last version produced. If any included output has been reissued as revised it will show the "REVISED" stamp.

Navigation within the Results Book should be facilitated by the use of bookmarks.

Results Books must be clearly identified with version number and date and time of production. If more than one version of the Results Book is produced, the changes should be described in the Version History.

The OC will produce the Results Book electronically, in PDF format, and make it available for download no later than one (1) day after the Judo competition has finished.

This Results Book will be made available to at least the following parties:

- The IOC
- The IJF
- All NOCs
- Accredited media

3 News Service and Background Information

Data for all Biographies and Historical Results will be supplied by the IOC to the OC.

The IOC has contracted this data collection, integration and delivery to a third party provider. However, the IOC retains full responsibility for this process.

The schedule for delivery of these data is defined by contract. Together with the third party provider, the OC will be responsible for the testing of the transfer mechanism prior to the Test Event, and during the Homologation Test. Transfer mechanisms are subject to IOC approval.

The OC and the IOC, together or in parallel, will undertake data quality testing at certain key points in the build-up to the Games.

The IJF is currently not maintaining biographies but agrees to supply historical data as requested

The IJF cannot guarantee that all mandatory data items requested to produce the relevant outputs will be included in the data provided.

Checking and updating of data from the IJF and adding missing data shall remain the provider's sole responsibility.

The delivery schedules will be agreed between the IJF and the third party provider. Schedules may be different depending on the type of data.

The IJF wishes to validate part or all of the final data delivered by the provider. In that case, the IJF and the third party provider will agree on a schedule covering the validation process which will be finished before INFO goes live.

The provider will update data after final delivery as required (corrections, information updates, etc.). The IOC will act as a facilitator between the IJF, the OC and the provider.

Before the Games, and within three (3) months following the Closing Ceremony, the IOC will make this data available to the IJF and all NOCs, in an agreed format.

3.1 Historical Results

The following historical data outputs will be available in INFO when it goes live:

- Medallists from previous Olympic Games (N10)
- Medals by NOC (N11)
- Multi-Medallists (N15)
- Results in last Olympic Cycle (N17A)

3.2 Biographies and Profiles

The following biography and profile outputs will be available in INFO when it goes live:

- Athlete Biography (N20)
- Referee / Judge Biography (N23)
- NOC Profile (N24)

3.3 Facts and Figures

3.3.1 Judo Background Information

Data for the Judo background information will be developed by ONS, in cooperation with the OC Competition Management and the IJF Technical Delegate well in advance of the Games. This process must be initiated sufficiently early so that there is adequate time to ensure that data are complete and

accurate, and they will then be entered into the OC computer system. This procedure should be completed no later than one (1) month before the Games.

OC Technology will use these data to prepare the outputs:

- Facts and Figures - History (N86A)
- Facts and Figures - IJF - Federation Facts (N86B)
- Facts and Figures - Qualification Criteria (N86C)

These outputs will first become available on the day that INFO goes live and will be distributed according to the ORIS distribution rules.

Should any of the data change, the IJF Technical Delegate will immediately inform ONS who will update the information within one (1) working day.

3.3.2 Technical Background Information

Technical background information will be developed by ONS, in cooperation with the OC Competition Management and the IJF Technical Delegate well in advance of the Games. This process must be initiated sufficiently early so that there is adequate time to ensure that data are complete and accurate, and they will then be entered into the OC computer system. This procedure should be completed no later than one (1) month before the Games.

OC Technology will use these data to prepare the outputs:

- Competition Format and Rules (N02)
- Facts and Figures - Facility Description (N86D)
- Facts and Figures - Media Information (N86E)

and will send them to the IJF Technical Delegate for verification.

These outputs will first become available on the day that INFO goes live and will be distributed according to the ORIS distribution rules.

Should any of the data change, ONS in consultation with the IJF Technical Delegate will update the information within one (1) working day.

3.4 News

There are potentially many different types of information produced under the category of "News". News items are generated during the Games by the Olympic News Service (ONS) at each venue and from the Main Press Centre.

To guarantee continuity news items must be assigned a sequential number.

3.4.1 Pre-competition News

3.4.1.1 Previews

Since many journalists at the Games cover sports in which they may have limited experience, Sport Previews and Weight Category Previews can be extremely helpful for them.

No later than four (4) days before the first day of competition, the ORIS Judo Working Group recommends that ONS at the Judo venue produces the output:

- Sport Preview (N89)

and, where practical, no later than the evening before the start of a new weight category, the output:

- Weight Category Preview (N89)

The weight category previews should summarise the next day's activities for a discipline, focusing on the most newsworthy elements.

3.4.2 News During and After Competition

Media covering Judo events remotely will need to receive information supplementing the results. ORIS recommends that ONS prepare the outputs described below.

3.4.2.1 Flash quotes

Throughout the Games ONS should produce quotes from athletes, coaches, medallists and any surprise performances in the output:

- Flash Quotes (N87A)

This output must be produced and distributed within fifteen (15) minutes after the quotes are taken.

A selection of the best quotes of each day of the Games should be produced by ONS in the output:

- Quotes of the Day (N87B)

and distributed according to the ORIS distribution rules.

The English version of flash quotes needs to be distributed immediately, without waiting for translation into any other language.

Note: ONS should plan in advance to ensure easy access for interviewers and interpretation services, if required.

3.4.2.2 Press conference highlights

ONS should produce newsworthy press conference highlights in the output:

- Press Conference Highlights (N88)

This output must be produced and distributed no later than thirty (30) minutes after the press conference.

3.4.2.3 Reviews

ONS should produce competition highlights in the outputs:

- Weight Category Review (N89)
- Sport Review (N89)

3.5 Media Communications

Useful information (concerning press conferences, announcements, changes in opening or closing times of the Venue Press Centre, etc.) should be communicated to the media in the output:

- Media Communication (N90A)

General information considered by ONS to be newsworthy (e.g. visitors to the venue, dignitaries, detailed description of equipment used, interesting statistics such as the number and names of world champions competing and missing, etc.) should be communicated to the media in the output:

- News Article (N90B)

ONS should use the output:

- IOC News (N90C)

to publish statements made by the IOC.

Section 1 - Printable Outputs

1 Introduction

This section of the document presents samples for all printable outputs.

There are two groups of outputs:

- Competition related (C outputs)
- News and Background related (N outputs)

ORIS defined outputs are available as PDFs and/or in screen format.

Every output that is printed from a PDF or screen format should be formatted so that it meets the ORIS requirements, including the Look and Feel defined by the OC.

The basic objective has been to make user friendly samples which show the required information and how it should be presented in each output. Emphasis is placed on using data which is as realistic as possible. However, athletes' data may be modified to focus on the necessary types of data (e.g. actual results changed to show ties, IRMs, etc.), venue names used in the samples may differ from the actual Games venues, etc.

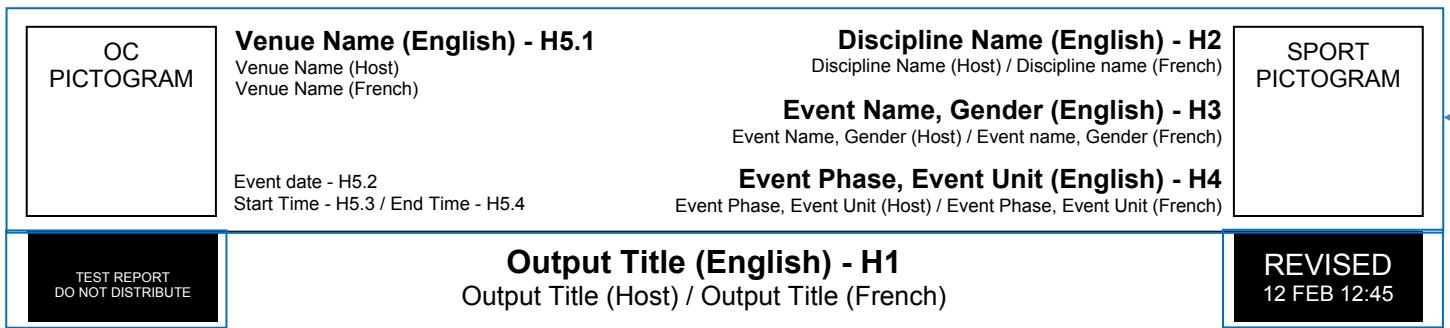

As it is impossible to find samples where all variations of data are used in the same output, in a number of samples some fields or data elements are missing. It should be **particularly noted** that schedule and quota data used in this document do **not** accurately reflect actual schedules and quotas.

Bearing this in mind, **samples should not be used as a reference for complete output definition**, including all possible data variations. All possible data elements and values are included in the data matrix. In all cases the **IF rules should be considered as the primary source** for data processing.

A detailed explanation of the structure of the output samples, description table and data matrix can be found in the "Look & Structure" output.

Rules for Data Formats and Presentation are described in the Appendix C.

This page intentionally left blank.

As of dd MMM yyyy at HH:MM - H6

This is a standard sample to illustrate possible positions of the output header data, stamps and footer.
It is the responsibility of the OC to define the actual look of the printed outputs (separate document).

Output body

Content information:

The content for this part of the output is defined in each appropriate ORIS output.
The requirements set in ORIS need to be met.

Technical information:

All possible values for this part of the output are defined in the data matrix of each output.

Depending on the ORIS requirements for each output, an appropriate Note and/or a Legend may be included

The two free text lines are reserved for content related information e.g. explanations of IRMs, reason for a revised output, etc.

L&S - Look and Structure of Outputs

Description table

The description table gives an overview of output specific requirements and offers space for additional explanations.

Description	A brief description of the purpose of this output
Source	Defines the source of the information for this output. Possible sources are: OC Competition Management , OC Technology, International Federation, etc.
Sort by	Defines the sort criteria by which the content of the output is sorted. The list of criteria will be as long as required to accurately define the sort order. The sort criteria are presented as follows: 1 - Criterion 1 2 - Criterion 2 3 - Criterion 3, etc.
Page break	Defines page breaks into logical groups (if the output does not fit onto a single page)
Notes	Note with static text: if a static Note is required for this output
	Note with predefined text: if a Note with predefined text is required for this output. All possible texts and conditions of predefined Notes will be listed here.
	Free text: refers to "Appendix C - Rules for Data Formats and Presentation"
Legend	Shows all possible abbreviations which could occur in this output. It also indicates if the Legend needs to be positioned on each page of the output or only on the last page of the output. Sports with a large number of possible results codes may state "See Appendix C - Rules for Data Formats and Presentation" rather than listing all results codes here.
IRM rules	In most cases a reference to "See Appendix C - Rules for Data Formats and Presentation" is made here. If there are specific IRM rules for this output, they may be mentioned here.
Comments	Space for further explanations which cannot be included in the samples, in other rows of the description table above, or in the data matrix. These comments should support the users by giving extra information and explanations.

Data matrix

The data matrix defines the required data items, and all possible values, needed in order to create the output. The data matrix follows the structure of the output in a logical order from the top to bottom and from the left to the right, wherever possible.

Columns

The column "Level" can be compared to the headings used for sections and subsections in a technical document:

"Levels" are ordered as follows:

- Whole integer levels (1, 2, 3, 4, etc.) represent a section heading. Each time a new section heading is required the next whole integer is used.
- Levels with two or more digits (1.1, 1.2.1, etc.) represent a subsection heading, or third level heading, etc., of the appropriate higher level heading (like a subsection heading in a technical document)
- The "(n)" in brackets after the level number indicates a "loop" for the values listed under that level or sublevel. Typically, data elements which are defined as "for each" have a level number containing an "(n)".

The column "Data Item" could be compared to the "section heading" (whole integer level numbers) with subsection headings (level numbers with decimal places).

The column "M/D" defines in general if that level is mandatory, desirable or not applicable/explanation only. The following main codes are used:

M Mandatory

Ma Mandatory - if applicable

Mc Mandatory - required under conditions which are explained in the column for comments

D Desirable - users found this information useful for their work and if an organiser can provide it, it would be appreciated but is not compulsory

Da Desirable, but only if such data is available

Dc Desirable under conditions which are explained in the column for comments

-- Not applicable / level explanation only

The column "Comments" includes all possible values of that level, additional conditions, explanations, etc.

Organisation

The data matrix is basically divided into three parts:

- Header data
- Output body data
- Legend, Note and free text data

Note: some static elements (e.g. spelling "Start Time" in header or column titles) are not specifically listed in the data matrix. The data matrix only includes variable data fields.

Header data levels

The header data elements are always defined in levels 1 to 6. These levels are always listed in each data matrix, regardless of the output requirements.

Output header example:

The corresponding data matrix levels are:

Level	Data Item	M/D	Comments
1	Output title (H1)	M	Text
2	Sport discipline (H2)	M	Text
3	Event/Gender (H3)	M	Standard FIS event name
4	Phase & event unit (H4)	Mc	Text - "Run 1" or "N Training" (N="1st, 2nd, 3rd", etc.). (Applicable for DH only if split in 2 runs. N/A for SG).
5	Venue - date - start time - end time (H5)	--	
5.1	Venue name (H5.1)	M	Text
5.2	Event date (H5.2)	M	Date - in the format defined in the OC Look and Feel standard
5.3	Event start time (H5.3)	M	Time - in the format defined in the OC Look and Feel standard
5.4	Event end time (H5.4)	--	NOT APPLICABLE
6	As of date (H6)	--	NOT APPLICABLE

Note: the levels 5.1, 5.2, 5.3 and 5.4 are sublevels of the main level 5 "Venue - date - start time - end time (H5)" since they define values which belong to the same main level (same "topic").

Output body data levels

The output body data elements are defined in levels 7 and higher. In these levels only output specific requirements are listed.

Output body data example (extract 1):

Jury		Technical Data		
TD FIS	KROGOLL Peter	GER		
Referee	SKAARDAL Atle	FIS		
Chief of Race	HOLLIDAY Bruce	CAN		
Start Referee	KLAMMER Herbert	ITA		
Finish Referee	PALOVICOVA Jana	SVK		

The corresponding data matrix levels are:

7 (n)	For each jury member	--	
7.1	Function	M	Text - Assistant referee is only applicable for DH and SG
7.2	Family name	M	Text
7.3	Given name	M	Text
7.4	NOC code	M	Standard IOC NOC code or "FIS"
8	Technical data	--	
8.1	Course name	M	Text
8.2	Start altitude	M	Numeric
8.3	Finish altitude	M	Numeric
8.4	Vertical drop	M	Numeric
8.5	Course length	Mc	Numeric (N/A for GS and SL).
8.6	Homologation number	M	Text

Note: the levels 7.1, 7.2, 7.3 and 7.4 are sublevels of the main level 7 "For each Jury member" since they define values which belong to the same main level (topic). The "(n)" indicates that the following levels are a "loop", i.e. that levels 7.1 to 7.4 need to be repeated for each jury member. Level 8 represents a new topic and therefore is numbered as the next main level (8). Levels 8.1 to 8.6 are then sublevels of the main level 8. For level 8, no "(n)" is required since each data only appears once.

Output body data example (extract 2):

Number of Competitors: 86, Number of NOCs: 47

Bib	FIS Code	Name	YB	NOC Code	Time
1	205993	HOELZL Kathrin	1984	GER	
2	205218	REBENSBURG Viktoria	1989	GER	
3	185140	POUTAINEN Tanja	1980	FIN	
4	55838	ZETTEL Kathrin	1986	AUT	

The corresponding data matrix levels are:

10	Number of competitors	M	Numeric
11	Number of NOCs	M	Numeric
12 (n)	For each competitor	--	
12.1	Bib number	M	Numeric
12.2	FIS code	M	Numeric
12.3	Family name	M	Text
12.4	Given name	M	Text
12.5	Year of birth	M	Year - in the format defined in the OC Look and Feel standard
12.6	NOC code	M	Standard IOC NOC code
12.7	Time	M	Space

Note: level 10 is a separate main level, only related to the "Number of competitors". Level 11 is the next main level, only related to the "Number of NOCs". Level 12 (n) is another main level, with the "(n)" indicating that the following levels 12.1 to 12.7 are a loop (data required for each competitor).

Note, Legend, free text

The Note, Legend and free text elements are defined at the end of the data matrix. All these levels are always listed, regardless the output requirements.

Example:

Note:	FIS points are from "Special OWG List". FIS WCSL points include all the FIS World Cup races before the Olympic Games.					
Legend:						
DH	Downhill	GS	Giant Slalom	SC	Super Combined	SG
SL	Slalom	WCSL	Overall points	YB	Year of Birth	Super-G
The corresponding data matrix levels are:						
8	Note with static text		M	Text		
9 (n)	Note for each predefined text		--			
9.1	Predefined text		--	NOT APPLICABLE		
10 (n)	Legend		--			
10.1	Abbreviation	Mc	Code			
10.2	Description of abbreviation	Mc	Text			
11	Free text	Ma	Text			

Note: level 8 is a separate main level, only related to the "Note with static text". Level 10 (n) is the main level for the Legend information. The "(n)" is used to indicate a loop since each abbreviation (10.1) and the appropriate description (10.2) need to appear.

Note 2: usually the level "Note with static text" starts as a main level (full number). In special cases, where the Note and Legend should be presented after each output body data, this could be numbered as a sublevel, as part of a level with a loop "(n)".

Stamps

There are two types of stamps. The exact position of these stamps is defined in the separate OC document.

- "Test Report" stamp: this stamp should ensure that no test data is mistaken for real Games data
- "Revised" stamp: if a new version of a previously distributed output is produced (excluding those outputs which are regularly updated and reissued, e.g. outputs containing brackets, statistics, ranking, etc.), it must be stamped "REVISED" including the date and time of output creation. The reason for the revision must be explained as a free text note at the bottom of the last page of the output.

The revised date and time in the stamp is the same date and time as in the output footer data ("Report Creation").

For initial releases stamps are not required.

Output footer data

Each output produced at the Games has clear and unique information in the footer data. These requirements are not listed in the ORIS data matrix, but defined and explained in a separate OC document. In order to have the full overview of an output layout, these data are briefly explained here:

- The "Report Identifier" consists of a nine characters Results System Code (RSC), the ORIS output number (without leading "C" or "N") and the version number
- The "Report Creation" shows the date and time and when the output was created
- The "Page x/y" indicates the current page number (x), and the total number of pages (y), of the output

This page intentionally left blank.

Scoreboard name lengths (max. characters) should be adjusted by OVR according to the technical scoreboard specifications. Be aware that all scoreboard name lengths in use must be included in this output and verified before the start of competition.

Note:

Truncated names are indicated with an * and must be checked carefully.

C38 - Entry Data Checklist

Description	Detailed list of all judoka. The purpose of this list is to facilitate the checking of entry data, spelling and name abbreviations for official use on outputs, scoreboards, TV, etc. This output is an internal quality control list.
Source	OC Technology
Sort by	1 - NOC code 2 - Gender (female first) 3 - Family name 4 - Given name
Page break	Break at "Condition = NOC code" on a new page with repeated output headings and column headings. Within "NOC code" break at "Group = Accreditation number" on a new page with repeated output headings and column headings.
Notes	Note with static text: See sample Note with predefined text: None Free text: See Appendix C - Rules for Data Formats and Presentation
Legend	Use the following description for abbreviations which appear in the output: "-" - Information not available To be displayed at the bottom of the last page of each NOC.
IRM rules	None
Comments	All name items must initially conform to the IJF/OC names policy for the competition. However, names may be changed, as required, to allow for personal preferences and other considerations. Truncated names should be indicated with an * for manual checking. This output should show every name type and the maximum number of characters which may be used (maximum number of characters defined by OC Technology depending on the solution used). For TV names please refer to the OBS requirements document "TV Name Formats". For scoreboard names: The technical characteristics of the scoreboard may require that scoreboard names of several different maximum lengths be defined. The fields "Family name (25)" and "Given name (25)" should be used as the WNPA names (please refer to the "ODF General Messages Interface Document"). Need ability to print the output for a single NOC. Only list those team officials who appear on at least one output or in an interface message. The layout of this output may be either in portrait or landscape, as required.

**OFFICIAL COMMUNICATION
JUDO
WOMEN -52 kg**

Item: 35

Schedule change

The Women - 52 kg has been rescheduled

Summary:

Due to the weather forecast (high probability of thunderstorms), access to the venue may be affected. The competition has consequently been rescheduled to 9:00 tomorrow.

Details:

Thunderstorms with wind speeds of over 120 km/h are forecast for this afternoon, with associated heavy rain and lightning. Due to the increased risk to spectators travelling to the venue and the potential impact on transportation, the Judo Women -52 kg has been rescheduled to 9:00 tomorrow.

Issued by: IJF Technical Delegate
Time: 11:00
Date: 7 AUG 2016

This decision affects: Results
Schedule

Item: 35

IOC Rule 50 (Reminder)

Manufacturer identification on clothing and equipment

Summary:

The National clothing must fully comply with IOC rule 50, in all aspects.
This applies to all competition at the Rio 2016 Olympic Games.

Details:

All competition at the Rio 2016 Olympic Games will be held in accordance with the Olympic Charter and the IJF Constitution and Rules which are in force at the time of the Rio 2016 Olympic Games.

Pursuant to the Olympic Charter, the IJF assumes the responsibility for the technical control and direction of its sport at the Olympic Games.

Regarding brand identification on socks, all teams are reminded that the **Rule 50 states: One Identification per accessory item will be permitted, to a maximum.**

Issued by: IJF Technical Delegate
Time: 21:10
Date: 4 AUG 2016

0:10	Yuko	JPN	OGO - O-soto-gari
1:05	Shido	CHN	PPA - Penalty passive
2:25	Yuko	CHN	SNG - Seoi-Nage
0:33 (GS)	Ippon	JPN	UCH - Uchi-Mata

Referee/Judges

Referee:	4	HAULSER Manfred (AUT)
Judge:	6	HUANG Yu-San (TPE)
Judge:	11	BLANCHET Gerard (CAN)

Outcome

TAMURA Ryoko (JPN) will continue competition in quarterfinal
ZHAO Shunxin (CHN) is out of competition, ranked 9th

Note:

World rank as of 31 May 2016, end of qualification period.

The winning score is defined as the winner's highest score, which makes the difference from the opponent's scores.

The winning technique is the technique/penalty of the winning score. If there are more than one equal winning scores, no winning technique is shown.

Legend:

GS Golden Score

S Shido (1, 2, 3, 4)

COMPETITION FORMAT AND RULES

JUDO

As of 23 JUN 2016

Olympic Competition Format

The 14 Olympic Judo events consist of seven men's and seven women's events:

Women	Men
Women -48 kg: Up to and including 48 kg	Men -60 kg: Up to and including 60 kg
Women -52 kg: Over 48 kg up to and including 52 kg	Men -66 kg: Over 60 kg up to and including 66 kg
Women -57 kg: Over 52 kg up to and including 57 kg	Men -73 kg: Over 66 kg up to and including 73 kg
Women -63 kg: Over 57 kg up to and including 63 kg	Men -81 kg: Over 73 kg up to and including 81 kg
Women -70 kg: Over 63 kg up to and including 70 kg	Men -90 kg: Over 81 kg up to and including 90 kg
Women -78 kg: Over 70 kg up to and including 78 kg	Men -100 kg: Over 90 kg up to and including 100 kg
Women +78 kg: Over 78 kg	Men +100 kg: Over 100 kg

Olympic Judo events are based on a direct elimination system. Repechage contests allow the losers of the quarterfinals a chance to compete for the bronze medals. The competitors will be divided into two tables by means of a "draw", and an elimination system will be used to produce two finalists, who will compete for the gold medal. The competitors defeated in the quarterfinals will compete in the two repechage contests. The winners of each of these two repechage contests will compete in a bronze medal contest against the loser of the semifinal contest of the opposite table.

The winners of the bronze medal contests are awarded the bronze medals, and the losers are placed equal fifth. The losers of the repechage contests are placed equal seventh.

The top eight judoka per weight category from the World Ranking List, updated at the end of the qualification period, will be seeded. All other judoka will be randomly drawn.

Contest Duration

The duration of the contests will be five minutes (actual time) for men and four minutes (actual time) for women in accordance with the IJF Sport & Organisation Rules (SOR) and Refereeing Rules.

Weigh-in

The weigh-in for the competition will be conducted at the Olympic Village under the supervision of officials appointed by the IJF. The official weigh-in for each weight category will take place from 19:00 to 19:30 on the evening before the respective competitions. Each competitor will be allowed only one weight control during the official weigh-in.

Competitors must weigh within the limits of the appropriate category and no tolerance will be allowed either above or below the weight category.

Differences between the IJF World Championships and the Olympic Games

The IJF World Championships are open for participation (to a maximum of nine male and nine female athletes per country), which means that no qualification is required. There are also open categories for both men and women, as well as team events. There are no open categories or team events at the Olympic Games.

Changes since the London 2012 Olympic Games

The method of scoring has been changed. A penalty does not result in a score for the opponent.

The duration of the Golden Score is no longer limited.

The contest time for women has been changed from five to four minutes.

Sport Rules and Procedures

Tie Break Rules within a contest (Hantei) and Procedures

When the time allotted for the contest ends (five minutes for men and four minutes for women) and there is no score/penalty, or scores/penalties for both contestants are equal, a Golden Score will take place (with no time limit).

The Referee calls "Soremade" and the time clock will be reset.

Any scores, penalties shown in all real time outputs (scoreboards, TV captions, RTDS, etc.) will remain.

There will be no rest period between the end of the original contest and the start of the Golden Score contest.

The first score or penalty awarded will decide the contest, and the contest is stopped.

Penalties / Disqualification Rules

All penalties are divided into "Slight" infringement - Shido (a type of warning) and "Grave" infringement - Hansoku-make (direct disqualification).

All of the prohibited acts or tactical actions that do not affect the integrity of the contestants nor are against the spirit of Judo, are treated as Slight infringements and are considered as technical and tactical faults and the contestant will receive a "Shido" penalty.

The repetitions of prohibited acts that are penalized with Shido are cumulative. In the contest score, repeating a Shido would become: 2nd Shido = Yuko for the opponent, 3rd Shido = Waza-Ari for the opponent, and 4th Shido = Ippon. That means that after a 4th Shido, the contest will be stopped and the opponent will be declared winner.

There are several possibilities for disqualification (Hansoku-make) within the sport of Judo.

1. In the case of Hansoku-make resulting from "progressive" penalties, the contestant penalised with four Shidos is allowed to continue competition in repechage, including the bronze medal contest (if applicable)
2. In the case of direct Hansoku-make for "protection" of the athlete (diving head first onto the mat), the competitor is allowed to continue competition in repechage, including the bronze medal contest (if applicable)
3. In the case of direct Hansoku-make for acts against the Judo spirit and/or application of dangerous techniques the competitor is excluded from the competition. If it is Hansoku-make for acts against the Judo spirit a sanction can be added. For details please refer to the IJF Sport and Organisation Rules (SOR) and Refereeing Rules.

Remark Regarding Award Ceremony

If Hansoku-make has been given for "protection" of the athlete (diving head first onto the mat), or for four Shidos, medals and places should be awarded; if it is for acts against the Judo spirit, the IJF Jury will make a decision.

Winning Technique

In order to provide information on which technique was used while winning the contest, the IJF uses various codes (140 of them) that are listed together with the contest score in the Contest Result reports and Contest List. These codes are mostly used by statisticians. The full list of codes is available on the IJF website.

Protests / Appeals

No protests against the Referees' decision will be accepted.

The structure and content of this output is recommended as a baseline for creation of the actual output for Games time.

Note:

For further information please consult: www.ijf.org

Highlights

- Switzerland competed at the Athens 1896 Olympic Games and have been ever present since then
- Their first Olympic champion was gymnast Louis ZUTTER in the pommel horse in 1896
- In dressage, Hans MOSER won gold in 1948, Henri CHARMARTIN did likewise in 1964 and Christine STUECKELBERGER was the first Swiss woman to win an Olympic gold medal when she won the dressage in 1976. She competed in six Olympic Games and collected a further three silver medals and a bronze medal.
- Roger FEDERER won gold in the Tennis Men's Doubles with Stanislas WAWRINKA at the Beijing 2008 Olympic Games. He carried his country's flag in both 2004 and 2008.

HISTORY JUDO

Origin of Judo

Judo was established as a method of physical, intellectual and moral education in 1882. Professor Jigoro KANO selected and refined various techniques used by jujitsu schools, which had evolved over hundreds of years as Japanese combative arts. Professor KANO devoted his life to the education and popularisation of judo and laid the foundations of the sport as we know it today.

Judo is the first Olympic Sport to have originated in Asia. From 1909, Professor KANO, as first IOC Member from Asia, contributed 30 years to the Olympic movement, collaborating with Baron Pierre de Coubertin, founder of the modern Olympic Games.

The basis of an international judo organisation existed in the 1930s but it was not finalised until 1951, when the Congress of European Judo Union established the International Judo Federation (IJF). There were 13 foundation member federations from European countries only. Countries from Oceania, America and Asia affiliated with the IJF the following year, taking the membership to 19 countries from four continents.

Judo Today

Today the IJF comprises of about 200 member federations affiliated through the five continental unions.

The first Judo World Championships were held in 1956 in Tokyo, with 31 participants from 21 countries. The introduction of weight categories has influenced the development of judo, and today, seven weight categories are contested in both men's and women's competitions (and in addition, open categories for the Senior World Championships for men and women). Since the first Women's World Judo Championships in New York in 1980, women's judo has developed rapidly.

Judo at the Olympic Games

Judo first appeared in the Olympic arena at the Tokyo 1964 Olympic Games. Since then, Judo has been part of the Games except in Mexico 1968.

Women's judo was added to the Olympics at the Barcelona 1992 Olympic Games, having been a demonstration sport at the Seoul 1988 Olympic Games.

In Olympic competition, as well as in Senior World Championship competitions, the duration of contests is five minutes for men and women. The athletes compete under the control of a referee, assisted by two judges. During a contest the aim is to throw the opponent on to their back with force, speed, and control. Other methods for an immediate win are immobilising the opponent for 25 seconds or gaining a submission through a strangle or armlock technique. There are three levels of scores, Koka, Yuko and Waza ari, which do not result in an immediate win. A win by superiority is achieved where at the end of time, one competitor has been awarded a higher score than the other, or a greater number of equivalent scores.

The "Ippon" results either from throwing the opponent on to his back with force, speed, or immobilising the opponent for 25 seconds, or gaining a submission through a strangle or armlock technique. The announcement of Ippon ends the contest but there are lower advantages which are noted on the picture (table) of scores. They are, in the increasing order, the "koka", the "yuko" and the "waza-ari". By agreement, two "waza-ari" give an "ippon".

MEDIA INFORMATION JUDO

Facilities

There are 150 tabled and 84 non-tabled seats in the Beijing Science and Technology University Gymnasium (USTB Gymnasium/STG). The mixed zone for competitors and journalists is located in the corridor adjacent to the Field of Play. Special tickets are not expected to be required for admission to this venue.

Interviews

Journalists may meet competitors in the mixed zone as the competitors exit the competition area. Formal interviews will be held after the medals are awarded. Additional sport conferences might be held based on media requests and the willingness of the interviewees.

Photographer positions

Photographers may shoot from designated positions listed in the Olympic Games Media Guide. In addition, photographers may stop briefly to take pictures from any public area so long as they are not blocking the view of any spectator. Special positions may be arranged in co-operation with the deputy venue manager for media.

Venue Media Centre

The full-service venue media centre supporting journalists covering judo and taekwondo has complete results and information services, television monitors, working positions, telephones and food service. A total of 180 work positions are offered, with 30 pay telephones available. The help desk numbers are: 86 10 66672037/2038 (for press), 86 10 66672039 (for photo).

Opening hours for judo are 09:00 to around 22:30 daily from 9 August to 15 August.

Transportation to the venue media centre will be provided according to the schedule in the Olympic Games Media Guide.

Venue Manager Manager

The deputy venue manager for media is ZHANG Erchun, assisted by HU Xin (press), LIAO Qi (photographers), and GUO Yanlin (Olympic News Service).

IJF Media Officer

RENAULT Jean François

FLASH QUOTES
JUDO
MEN +100 kg

News Item: 117

Medallists

ISHII Satoshi (JPN) - Gold medallist

On winning:

"I was able to win the Gold because of the many people that supported me. I really appreciate their support."

"In the final I showed my Judo, my style. Except for the quarterfinal it was always my Judo."

"My strengths are guts and elusiveness."

On beating Tamerlan TMENOV (RUS) in the quarterfinal:

"He was my hero, I often watched videos of his fights. That helped me get to know him better when I fought him."

On the pressure of competing:

"I am the national champion of Japan. If I had lost, Japan would have lost."

"Until today, Japan had only one gold in the Men's, Masato UCHISHIBA's gold. So the worst possible result for the Japanese team would have been one Men's gold. This situation motivated me and I was very excited."

"The game is killing each other. Now I have survived and I can go back to Japan."

TANGRIEV Abdullo (UZB) - Silver medallist

On the gold medal match:

"It was very hard for me in the final. I had a difficult opponent. In the final, Satoshi ISHII (JPN) was a little bit more active and he took away the gold."

On taking the silver medal:

"The silver medal almost feels like gold to me although I wanted the gold."

"I won't stop with that. I will go on to achieve more."

RINER Teddy (FRA) - Bronze medallist

On winning bronze

"It's still a good medal, I had to fight for it. I am a little disappointed because I really wanted the gold."

On displaying a photograph on the podium:

"This is my best friend, Frederic ESCALANTE. He is sick with cancer. I promised him I would bring home a medal and I am glad that he was with me on the podium."

QUOTES OF THE DAY

News Item: 117

A selection of the best quotes from the Rio 2016 Games on Tuesday 16 August 2016

"You can meet a champion on every corner."

Givenname FAMILYNAME (NOC) on the sights in the Olympic Village

"Of course, it is an amazing feeling to represent your country and I hope there will be many more occasions to come, because I really love the sound of our national anthem."

Gold medallist Givenname FAMILYNAME (NOC) on her latest victory

"There are a lot of countries here. I don't even know where half of them are on the map."

The diversity of the Olympic Games amazes Givenname FAMILYNAME (NOC)

"It's our lucky talisman. In 2010 we won the World Championships wearing these bandanas. Have we washed them since? Yes."

Red bandanas with white palm tree motifs are more than a fashion statement for Givenname FAMILYNAME (NOC) and his partner Givenname FAMILYNAME (NOC)

"I did not yet have this colour. I only had three golds and five silvers, so my collection is complete now."

Givenname FAMILYNAME (NOC) completed the set by taking bronze at these Games

"I did not concentrate on my opponent. I only concentrated on my coach."

Givenname FAMILYNAME (NOC) admits taking his eye off opponent Givenname FAMILYNAME (NOC) and this may have been one reason that he lost

"I was tapped on the leg and then I felt myself landing on my shoulder. I cannot really remember what happened. My heart is broken into a thousand pieces."

Givenname FAMILYNAME (NOC) tells of his despair after the collision with Givenname FAMILYNAME (NOC)

PRESS CONFERENCE HIGHLIGHTS
JUDO
WOMEN -78 kg

News Item: 119

Medallists

YANG Xiuli (CHN) - Gold medallist

On her coach:

"I started training with Mr LIU in 1998. I couldn't call him master yet, because until now I didn't think my level was up to par. But up there on the podium today I felt that I could call him master from the bottom of my heart."

On her eye injury:

"The injury occurred in my last match. It was an accident. I think I did my best and I fought the way I normally fight."

On what she thought the referee's decision would be:

"I think the referees and judges were very fair. During the whole process I believed in myself and I didn't think there were any problems."

On easily winning her matches today:

"The first four matches went smoothly because of my training."

On her competitors:

"All the athletes that came to the Olympic Games are great athletes. I have competed in other places, so I kind of know them. They are all world-class athletes. I have to thank my opponents, because of them I can improve myself."

On whether going into Golden Score in the final impacted her strength:

"Yes, the final was quite long and adding time didn't worry me at all, as in training I practice six to eight-minute matches."

On whether her eye injury affected her performance:

"Yes it did cause some kind of blur to my eye, I couldn't see well. I had pain opening my eyes, so yes the injury did affect me."

CASTILLO Yalennis (CUB) - Silver medallist

On her initial reaction to the referee's decision:

"It's unjust. If it was not a Chinese athlete it would not have happened."

On going to the 2012 London Olympic Games:

"In the next Olympics I will win Gold."

On the next World Championships:

"I will also win the Gold medal."

SPORT PREVIEW

JUDO

News Item: 1

Japan is expected to continue its Olympic dominance

- 386 judoka from 92 nations compete for the 14 gold medals on offer at the Beijing 2008 Olympic Games.
- At the 2004 Olympics in Athens, Japan won eight of a possible 56 Judo medals and the tally is likely to be equally impressive here.
- Among those expected to figure prominently at the USTB Gymnasium are Japan's reigning Olympic champions Masato UCHISHIBA, Ryoko TANI, Ayumi TANIMOTO, Masaue UENO and Maki TSUKADA.
- TANI, formerly known as Ryoko TAMURA, will set out to win her third consecutive gold medal when she takes part in the Under 48 kg category.
- The seven-times world champion will be competing at her fifth Olympics, having made her first appearance at the Barcelona Games in 1992.
- Other reigning gold medallists competing in Beijing include China's XIAN Dongmei in the Women's 48-52 kg category and Yvonne BOHNISCH (GER) in the Women's 52-57 kg division.
- XIAN (CHN) will attempt to become her country's 15th Judo women's medallist. The five gold, two silver and seven bronze medals in previous Olympic Games all came from members of the women's team. China has never won an Olympic men's Judo medal.
- Another country with high hopes is Korea, which won five medals at the Sydney 2000 Olympics Games and three at Athens.
- Korea joins Cuba, Japan and China as the only nations to boast a full team of 14 athletes in Beijing.
- France is the most successful European nation in Olympic Judo history and will be expected to improve on its performance in Athens, when it produced just one medallist, Frederique JOSSINET, in the Women's Under 48 kg division.
- The Netherlands, with 15 medals at previous Games, is also expected to perform strongly.
- The absence of Tadahiro NOMURA (JPN), who has dominated the Under 60 kg category by taking gold in three consecutive Olympic Games - no other athlete has achieved the feat - ensures a new face will be seen at the top of the podium.
- The contenders to take NOMURA'S spot include Ludwig PAISCHER (AUT), European champion in 2008 and 2004, and Craig FALLON (GBR), European champion in 2006 and world champion in 2005, but the draw has made it impossible that they will fight for the gold medal. If they both win their first-round bouts they will meet each other in the second round.
- ...

WEIGHT CATEGORY PREVIEW

JUDO

WOMEN +78 kg

News Item: 23

TSUKADA (JPN) ready to put out TONG (CHN)

The 21 Competitors in the Women's +78 kg will hit the mats in this heavyweight category at the University of Science and Technology Beijing (USTB) Gymnasium on 15 August. Preliminary sessions start at 12.00pm.

Favourite

- Maki TSUKADA (JPN) is the reigning gold medallist from the Athens 2004 Olympic Games. TSUKADA has struggled at recent events in this category and will need to be at her peak after twice finishing behind China's heavyweight hope, TONG Wen, coming second at the 2007 world championships in Rio de Janeiro, Brazil, and third at the 2005 world championships in Cairo, Egypt.

Challengers

- TONG has had two first placings in recent times. She defeated Lucija POLAVDER (SLO) at the 2008 World Cup, in Budapest, then won first place at the 2008 Super World Cup in Paris, by defeating Urszula SADKOWSKA (POL), both of whom are present in this category. It is her major ambition to win a gold medal at her home Olympic Games and will be the one to watch in this category.
- Tea DONGUZASHVILI (RUS) has already tasted Olympic victory by winning a bronze medal in Athens. Recently, DONGUZASHVILI won a silver at European championships in Lisbon, going down to Anne-Sophie MONDIERE (FRA). A consistently top class performer, DONGUZASHVILI is a big threat.
- Samah RAMADAN (EGY) is at the lighter end of this weight category. At 78 kg and drawn against the likes of TONG and Sandra KOEPPEN-ZUCKSCHWERDT (GER) in her pool, will definitely have her hands full. RAMADAN has won first place in seven African continental championships.
- MONDIERE has twice defeated DONGUZASHVILI at the European championships, Lisbon, Portugal in April this year and in the repechage for bronze at the super world cup, Hamburg, Germany in February. MONDIERE's form means she will be a medal contender.

Also...

- TONG and KOEPPEN-ZUCKSCHWERDT are the heaviest competitors in this category, weighing in at 130kg.

WEIGHT CATEGORY REVIEW
JUDO
MEN -81 kg

News Item: 75

Outsider BISCHOF (GER) strikes Gold

- Little known German judoka Ole BISCHOF took his competitors by surprise Tuesday, snatching the gold medal in the Men's -81 kg at the USTB Gymnasium.
- BISCHOF, 28, earned a yuko for a ko-uchi-gari (small inner reap) with 1 min 25 sec to go in the gold medal bout and held on to the final buzzer. His opponent in the medal match, KIM Jaebum (KOR), who had gone through a nearly 10-minute bout in the semifinal, offered resistance although he looked exhausted.
- BISCHOF's win comes as a surprise as the German had finished well out of the rankings at the 2007 world championships and his last major title dates back to 2005 when he won the European championships.
- The bronze medals went to 2007 world champion Tiago CAMILO (BRA) and defending 2004 Olympic silver medallist Roman GONTIUK (UKR).
- In the quarterfinal, BISCHOF upset 2007 world champion CAMILO and relegated him to the Repechage. He then went on to defeat GONTIUK in the last 20 seconds of the semifinal by yuko.
- KIM survived an exhausting semifinal against Guillaume ELMONT (NED). The match went over the five minutes and KIM scored the decisive point only when he locked ELMONT in the final seconds of the following five-minute Golden Score bout.
- CAMILO advanced to the bronze medal match through the Repechage and beat ELMONT for the bronze in what was a match of two world champions.
- GONTIUK clinched the other bronze in a tight match against Nyamkhuu DAMDINSUREN (MGL).
- 2000 Olympic champion Giuseppe MADDALONI's (ITA) hopes for a comeback on the Olympic podium were destroyed following losses against ELMONT in the third round and against DAMDINSUREN in the Repechage.

SPORT REVIEW

JUDO

News Item: 15

Expect the unexpected is the legacy of Judo competitions

- Surprises, upsets and historic medal wins have marked the Judo competitions at the USTB Gymnasium. There have been stumbling favourites, the emergence of new stars and veterans holding their own.
- Japan were the most successful team with four gold, one silver and two bronze medals and defended its position as the sports' leading nation. Cuba continued its ascent with six medals - three silver and three bronze, while China claimed four medals, three of them gold and all of them in the Women's competition.
- The Netherlands took home five medals, one silver and four bronze, and five countries captured their first ever medals in Olympic Judo. Overall, the 56 Judo medals went to 19 countries. Four Judoka retained their Olympic title from 2004.
- XIAN Dongmei (CHN), Masato UCHISHIBA (JPN) and Ayumi TANIMOTO (JPN) all celebrated a comeback to win back-to-back gold medals. XIAN clearly dominated her -52 kg category and it was hard to believe that the 32-year-old took a time-out from the sport for two years and had a baby girl in January 2007.
- UCHISHIBA hadn't seen much success since his win in Athens four years ago but regained his form to take the victory in the Men's -66 kg in Beijing. TANIMOTO (-63 kg) came back from injuries that prevented her from competing much at the international level since Athens. The fourth Judoka to win back-to-back gold medals was Masaue UENO (JPN) in the Women's -70 kg.
- Giulia QUINTAVALLE upset the top contenders in the Women's -57 kg to claim the first Women's Judo gold medal at the Olympic Games for Italy. To the delight of the home crowd, YANG Xiliu (CHN) came out of nowhere to snatch the title in the Women's -78 kg.
- Unheralded German Ole BISCHOF and little known Tuvshinbayar NAIDAN (MGL) were surprises as well, when they took the gold in the Men's -81 kg and -100 kg. NAIDAN secured the first Olympic gold medal in any sport for Mongolia.
- CHOI Minho (KOR) in the Men's -60 kg, Alina Alexandra DUMITRU (ROU) in the Women's -48 kg, Irakli TSIREKIDZE (GEO) in the Men's -90 kg, Satoshi ISHII (JPN) in the Men's +100 kg and TONG Wen (CHN) in the Women's +78 kg were the other gold medallists.
- Japan's superstar Ryoko TANI failed to win her third consecutive gold medal in the Women's -48 kg, but still set a record in her sport by taking the fifth medal in her fifth Olympic Games all-be-it bronze this time. TANI is now one of only six female athletes to have won a medal in at least five different Olympic Games.
- Elnur MAMMADLI earned Azerbaijan's first Olympic medal in Judo in the Men's -73 kg, and it was a gold. Azerbai Nayim HUSEINOV (EUN) was Olympic champion in 1992 in the Men's -60 kg, however, Azerbaijan competed alongside Russia and other former Soviet republics as the Unified Team (EUN) in those Games.

10 useful facts about Judo

1. Judo is a traditional Japanese martial art that developed from the various martial arts used in Japan over hundreds of years, mainly jiujitsu. The name consists of two Japanese characters, 'ju' (gentle) and 'do' (way, path). The base of modern judo was developed by Dr. Jigoro Kano in 1882.
2. Men's judo was introduced as an Olympic sport at Tokyo 1964. It was the first, and for a long time the only, martial arts discipline at the Olympic Games. Women's judo became an Olympic sport at Barcelona 1992.
3. Judo is one of the most popular sports worldwide. The International Judo Federation has 200 member nations, and 134 have entered athletes for the London 2012 Olympic judo event. This ranks judo among the top five events in terms of the number of competing NOCs at London 2012.
4. The competition area is divided into two zones: the contest area (8x8m) on which the judoka compete, and the safety area (at least 3m wide). The two zones are distinguished by different colours.
5. One referee and two judges supervise the contest.
6. Contestants wear a blue or a white judogi.
7. Judo consists of 14 weight categories. The categories for men are -60 kg, -66 kg, -73 kg, -81 kg, -90 kg, -100 kg and +100 kg. The categories for women are -48 kg, -52 kg, -57 kg, -63 kg, -70 kg, -78 kg and +78 kg.
8. A judo contest lasts five minutes. In the case of a tie, an extra round of three minutes is added, in which the first score, the "Golden Score" decides the bout. If no competitor scores, the refereeing officials decide the winner by judging their superiority (known as hantei).
9. Competitors score points for actions such as throws and holds: yuko (the smallest point), waza-ari (half point) and ippon (full point). There are three ways to gain ippon, and each way forces the end of the bout. Ippon is awarded for a powerful throw, or for holding the immobilised opponent for 25 seconds, or if the opponent gives up ('taps out'), usually while in an armlock or choke hold. Two waza-ari add up to ippon (waza-ari-awasete ippon), but numerous yuko do not add up to another points value.
10. A penalty, known as shido, can be given by refereeing officials. Shido is mostly given for inactivity or evasion. The first shido is "free". Two shido add up to a yuko for the opponent. Three shido are a waza-ari for the opponent. Four shido lead to disqualification (known as hansoku make).

Judo: IOC disqualifies FAMILYNAME Givenname (NOC) for doping violation

The International Olympic Committee (IOC) on Monday announced that it has disqualified FAMILYNAME Givenname (NOC) from the Judo Men -90 kg of the Rio 2016 Olympic Games.

Immediately after his participation in the event on 10 August, FAMILYNAME, 23, provided a urine sample that tested positive for the prohibited substance 11-nor-delta-9-tetrahydrocannabinol-9-carboxylic acid.

The IOC Disciplinary Commission, composed for this case of Mr Givenname FAMILYNAME (Chairman), Mr Givenname FAMILYNAME and Mr Givenname FAMILYNAME, decided:

- I. The athlete, Mr Givenname FAMILYNAME, NOC name, Judo:
 - (i) is disqualified from the Men -90 kg of the Rio 2016 Olympic Games where he placed 7th;
 - (ii) shall have his diploma in the above-mentioned event withdrawn; and
 - (iii) shall have his Olympic identity and accreditation card cancelled and withdrawn immediately.
- II. The IJF is requested to modify the results of the above-mentioned event accordingly and to consider any further action within its own competence.
- III. The NOC of the member country is ordered to return to the IOC, as soon as possible, the diploma awarded to the athlete in relation to the above-mentioned event.
- IV. The IOC administration is requested to reallocate the diplomas to the athletes that finished behind Mr FAMILYNAME in the above-mentioned event, in which Mr FAMILYNAME placed 7th at the Rio 2016 Olympic Games.
- V. This decision shall enter into force immediately.

Under the IOC Anti-Doping Rules applicable to the Rio 2016 Olympic Games, testing takes place under the IOC's auspices from the opening of the Olympic Village to the Closing Ceremony. Within that period, the IOC systematically performs tests before and after events. After each event, the IOC systematically carries out tests on the top five finishers plus two at random. The IOC also performs out-of-competition unannounced tests. Over the course of the Rio 2016 Olympic Games, the IOC is expected to carry out some 5,000 tests - 3,800 urine and 1,200 blood. For more information, please consult the IOC factsheet on anti-doping.

Section 2 - Distribution Rules

1 Introduction

This section explains what Judo information is required, the function producing the outputs and when the OC should supply it to the different users or user groups according to the ORIS standards. The information is presented in tabular format to allow a well structured overview of affected outputs, the appropriate work flow and the production time.

This section is divided into three chapters:

- "Event Related Requirements" (chapter 2) gives a detailed description of events processes for outputs preparation, production, checking/approval, and final distribution rules of printed outputs and INFO. The chapter is organised in such a way that the requirements of each user or user group are listed separately and grouped chronologically by the time condition that triggers production and/or delivery.
- "Other Outputs" (chapter 3) describes the process for preparation and production of all outputs that are identical for all events (Schedule, Entries, Background Information, etc.) together with those outputs (event related and non-event related) that could be produced at any time before, during or after competition. It also includes the final distribution rules for both printed outputs and INFO grouped in chronological order.
- "Distribution Rules and availability of all outputs grouped by ORIS output code" (chapter 4) gives an overview of all outputs produced for Judo. The outputs are sorted by output code and listed together with their production time and distribution rules. The table following describes the time abbreviations used to define the availability of the outputs. All delivery times are understood to imply that distribution will occur "no later than" the defined time, unless otherwise stated (e.g. protest times).

It is the responsibility of the IJF and the OC Competition Management to carry out data and output verification processes efficiently.

Installing adequate equipment at appropriate locations and providing sufficient well trained people to manage the technology and distribution processes are key factors to meet the requirements of output delivery within the defined time frame.

The main producers of outputs are:

- IDS - Information Diffusion System (e.g. provisional entries, scheduling, etc.)
- ONS - Olympic News Service (e.g. production of new articles, press conference highlights, etc.)
- OVR - On Venue Results system (e.g. results and timing feeds)
- VRM - Venue Results Manager (creation of other outputs, e.g. competition officials, IF schedules, course maps updated during Games, etc.)

The creation of outputs may be carried out by one or a combination of the producers listed above.

Printed outputs may be delivered to clients by several different means, for example:

- Display on Bulletin Board (media area, athletes' area, Olympic Village, etc.)
- Personal delivery to individual clients (Technical Delegate, IJF office, etc.)
- Place in pigeonholes (Venue Press Centre, Competition Management, Sport Information Desk, etc.)
- Single copy delivery (Sport Presentation, Competition Management, etc.)

It is the responsibility of OC Technology, in collaboration with each client, to determine the number of copies to be delivered to each distribution point. Once competition has started, the initial distribution requirements should be adjusted to optimise the number of copies required at every distribution point, and at different times of day and stages of the competition. OC Technology should remain flexible to ensure that the number of copies supplied adequately meets (but does not exceed) demand. It is

essential that sufficient well trained personnel, with the appropriate accreditation to access all distribution points, are available to ensure consistent delivery within the defined time frame, and monitor the actual demand at each distribution point.

If a new version of a previously issued output is produced for any reason (e.g. a revised output) the existing version in INFO must always be replaced with the new version. In this way the latest version of each output will be maintained in INFO even though there is no new distribution time defined in this section.

All outputs to be included in the Results Book will be the last version produced, even if stamped "REVISED".

2 Event Related Requirements with Predefined Production Time

This chapter describes the process of production and delivery for all outputs generated during the lifecycle of an event either by On Venue Results system (OVR), or by any other function such as Olympic News Service (ONS), or OC Competition Management with the exception of those event related outputs that do not have a defined production time and which are listed in the chapter "Other Outputs".

The process is described in tabular format, in which each step is described in a row listing the deliverable, with columns that define a time reference (When), the user or user group (Who) responsible for delivering which output (What) and for/to whom (Whom). Processes and outputs are listed in chronological order, covering the period starting with preparation for the draw, followed by the draw itself with start lists production and their distribution, previews, production and distribution of outputs during the event, up to the completion of the event with flash quotes, reviews, medal outputs, etc. Specifications include both "C" and "N" type outputs that are produced during the period described above.

After the table describing the process, there is another table that sets out the distribution rules for each of the outputs previously described, with instructions to which user or user group and at which locations each of these outputs should be distributed. Those outputs, which only need to be published in INFO are clearly indicated.

When the competition formats of different events have different processes (even in details), both sets of tables are prepared for each event (or group of events) **that have a unique format**.

The **unique format** means that ONLY events sharing absolutely identical procedures from beginning to end, and producing identical outputs, will be listed together (e.g. all weight categories).

4 Distribution Rules for Printable Outputs Grouped by ORIS Output Code

This chapter gives an overview of all outputs produced for Judo sorted by ORIS output code.

All availability codes are "Point in Time" (PiT) codes, indicating a defined time trigger for the production of an output.

C-outputs shown with a "Y" in the INFO Screen format column will be available in real time format.

Please refer to the document "On Screen Results Presentation" for further details.

Every output available in screen format should be formatted in a printable version according to the ORIS requirements, including the Look and Feel defined by the OC.

IDS Information Diffusion System
 ONS Olympic News Service
 OVR On Venue Results system
 VRM Venue Results Manager

Officials: Judges, Jury of Appeal, Referees, Doping Control Officer
 IJF: IJF President, IJF Secretary General, Technical Delegate, IJF Office, IJF Media, etc.
 (The VRM should consult Protocol/Ceremonies and the Doping Control Officer regarding the specific outputs required)

5 Distribution Availability Codes

Code	Description of abbreviation
AEDRM	After each Delegation Registration Meeting
ASED	After both the Sport Entry Deadline has passed, and INFO operations have started (whichever is later)
DIFO	Day IJF and Competition Management operations start
DIO	Day INFO operations start
DPCO	Day press centre (main or venue whichever comes first) operations start
EOD	End of day
OVRO	On Venue Results becomes owner of data
WPC	When presenters are confirmed
xDBC	X (x) day(s) before the first day of competition
xEBCD	X (x) evening(s) before a competition day
xHARI	X (x) hour(s) after receiving the information
xMAC	X (x) minute(s) after the contest
xMAD	X (x) minute(s) after the draw
xMAE	X (x) minute(s) after the event
xMAFA	X (x) minute(s) after the results of the final are approved
xMAJ	X (x) minute(s) after each jury or other official body decision
xMALD	X (x) minute(s) after the last draw is completed
xMAMRA	X (x) minute(s) after medal results are approved
xMAPR	X (x) minute(s) after public release of a communication
xMAQ	X (x) minute(s) after quotes/a press conference
xMARI	X (x) minute(s) after receiving the information
xMARMC	X (x) minute(s) after a round is completed for a weight category on a mat
xMAS1	X (x) minute(s) after the first session
xRNA	X (x) minute(s) after the referee/judges numbers are allocated

This page intentionally left blank.

Section 3 - Real Time Information

1 Introduction

This section of the document defines scoreboard layouts, Real Time Display System (RTDS) screens, sport specific real time data available through ODF and serves as a reference for on screen results presentation.

The basic objective has been to make user-friendly samples and emphasis is placed on using realistic data where possible. This is to ensure that the focus is on the type of data which must be included rather than on the accuracy of data shown in the sample.

All possible variations of the type of event and each stage of the competition are presented. The type of data required and the triggering conditions are defined.

While the data content and triggering conditions for each screen are mandatory (and therefore subject to the Change Management process), the presentation of the real time outputs will be based upon an agreement reached between the IJF and the OC (and providers).

This page intentionally left blank.

2 Scoreboards

2.1 General Rules

2.1.1 NOC Names

Whenever NOC names are used, they should be taken from the official IOC "NOC long and short names document", which is available on the IOC ORIS extranet (see "Public documents" in the navigation menu on the left). The same name length should consistently be used within similar screens.

2.1.2 Athletes and Officials' Names

All possible scoreboard name lengths which are required for scoreboard screens must be verified through the process described in the chapter "Entries and participant data" in Procedures.

2.2 Technical Specifications

This section has been developed based on a standard matrix. More sophisticated solutions (e.g. video, plasma screens, font colour, font size, graphical characters, etc.) may be provided. The content of the scoreboard screens are defined in ORIS. The detailed layout of the scoreboard screens is the responsibility of OVR, and will be confirmed during the Homologation Test, subject to the IJF's approval.

2.3 Part A - Before the event

2.3.1 Schedule

- What: Screen shows the schedule of the day with screen title, for each weight category: standard IJF weight category name, for each session: standard IJF session name and start time
When: Prior to the session at the discretion of the producer
How: Static screen

2.3.2 Judo competition description

- What: Screen shows competition description with discipline name, screen title and text
When: Throughout the day at the discretion of the producer
How: Scroll through all pages

2.4 Part B - Before and during each contest

2.4.1 Contest list both mats, summary

- What: Screen shows contest presentation summary for both mats with, for each mat: mat number, for each weight category: standard IJF weight category name, for each contest: "NOW" or "NEXT", for each judoka (in colour white or blue): NOC code, current contest indicator ("<").
Note: contest with only one judoka will be presented with a blank in the opponent's place.
- When: Throughout the competition at the discretion of the producer
- How: Update the list of current and next contests

MAT 1	MAT 2
MEN -60 KG	MEN -60 KG
NOW NZL-AZE <	NOW ESP-ROU <
NEXT GBR-HUN	NEXT -KAZ
NEXT BRA-FRA	NEXT AUT-FIN

MAT 1	MAT 2
MEN -60 KG	MEN -60 KG
NOW GBR-HUN <	NOW AUT-FIN <
NEXT BRA-FRA	WOMEN -48 KG
NEXT UZB-GER	NEXT KOR-FRA

When changing to
another weight category:
Display the weight
category name

2.4.2 Contest list both mats, detailed

- What: Screen shows contest presentation for both mats with, for each mat: mat number, for each for contest: "NOW" or "NEXT" (first occurrence only), standard IJF weight category code, for each judoka (in colour white or blue): NOC code and current contest indicator ("<", for "NOW" contest only).
Note: contest with only one judoka will be presented with a blank in the opponent's place.
- When: Throughout the competition at the discretion of the producer
- How: Update the list of current and next contests

	MAT 1	MAT 2
NOW	-60 NZL-AZE<	-60 BLR-NZL<
NEXT	-60 GBR-HUN -60 KAZ-SEN -60 BUL- -60 TUN-TOG -48 ISL-POR	-60 RUS-FRA -60 BEL-NOR -48 FIN-MLI -48 VEN-POL -48 URU-KOR

2.4.3 Contest presentation

- What: Screen shows contest presentation of competitors, referee and judges with mat number, standard IJF weight category name, standard IJF phase name, for each judoka (in colour white or blue): NOC code and scoreboard name, for each referee/judge: function (referee or judge), scoreboard name and NOC code.
Note: contest with only one judoka will be presented with a blank in the opponent's place.
- When: Before a contest at the discretion of the producer
- How: Static screen

MAT 1: MEN -100 KG - ROUND OF 32
CAN GILL NICOLAS JPN INOUE KOSEI
REFEREE: MATTAR EMMANOEL BRA JUDGE: MHIRSI HEDI TUN JUDGE: TETER OLEG BLR

2.4.4 Judoka progress

- What: Screen shows judoka progress, with standard IJF weight category name, screen title, for judoka (in colour white or blue): scoreboard name and NOC code, for each opponent: standard IJF phase name, scoreboard name and NOC code.
- When: Before a contest at the discretion of the producer
- How: Static screen

MEN -100 KG JUDOKA PROGRESS
BLUE: GILL NICOLAS CAN
SEMIFINAL: GROL HENK NED
QUARTERFINAL: GASIMOV ELMAR AZE
ROUND OF 16: FABRE THIERRY FRA
ROUND OF 32: ANAI TAKEMASA JPN
ROUND OF 64: PETERS DIMITRI GER

2.4.5 Contest result - one active mat

- What: Screen shows results of one active mat with mat number, standard IJF weight category name, standard IJF phase name, for each judoka (in colour white or blue): NOC code, scoreboard name, scores, penalties indicator ("<P>", if any), Golden Score ("GS", if any) and winning code ("W", for contest winner only) and contest time
Note: indicator <P>: one yellow card for 1st Shido, two yellow cards for 2nd Shido, three yellow cards for 3rd Shido and one red card for 4th Shido.
Note: contest with only one judoka will be presented with a blank in the opponent's place.
- When: Before and during contests at the discretion of the producer
How: Dynamic screen

MAT 1: MEN -100 KG - ROUND OF 32	
CAN GILL NICOLAS	10 1<P>
JPN INOUE KOSEI	W
1:48	

Penalties:
Only displayed if any

2.4.6 Contest result - two active mats

- What: Screen shows results of two active mats with, for each mat: mat number, standard IJF weight category name, standard IJF phase name, for each judoka (in colour white or blue): NOC code, scoreboard name, scores, penalties indicator ("<P>", if any), Golden Score ("GS", if any) and winning code ("W", for contest winner only) and contest time
Note: indicator <P>: one yellow card for 1st Shido, two yellow cards for 2nd Shido, three yellow cards for 3rd Shido and one red card for 4th Shido.
Note: contest with only one judoka will be presented with a blank in the opponent's place.
- When: Before and during contests at the discretion of the producer
How: Dynamic screen

MAT 1: MEN -100 KG - ROUND OF 32	
CAN GILL NICOLAS	100<P>
JPN INOUE KOSEI	1
	2:03
MAT 2: WOMEN -48 KG - LAST 32	
JPN TAMARA RYOKO	10 GS W
RUS BROULETOVA L.	1
	1:09

Penalties and Golden
Score:
Only displayed if any

2.5 Part C - Brackets

2.5.1 Bracket of 64

- What: Screen shows bracket with up to 64 judoka with standard IJF weight category name, standard IJF bracket name, for each side of the bracket: current contest indicator (">" (left side) and "<" (right side)), for each judoka (in colour white or blue): NOC code, <BRACKET> (will be replaced by a graphical bracket in the production mode).
Note: only the NOC code of the contest winner is displayed after completion of a contest.
- When: Throughout the competition at the discretion of the producer
- How: Dynamic screen

2.5.2 Bracket of 32

- What: Screen shows bracket with up to 32 judoka with standard IJF weight category name, standard IJF bracket name, for each side of the bracket: current contest indicator (">" (left side) and "<" (right side)), for each judoka (in colour white or blue): NOC code, <BRACKET> (will be replaced by a graphical bracket in the production mode).
Note: only the NOC code of the contest winner is displayed after completion of a contest.
- When: Throughout the competition at the discretion of the producer
- How: Dynamic screen

MEN -100 KG – ROUND OF 32	
>NZL-AZE	SVK-ARG<
GBR-HUN	POL-MGL
KAZ-BLR	MAC-CHI
FRA-BEL	ITA-CUB
FIN-AUT	TUR-RSA
RUS-TPE	GER-CHN
KUW-MEX	GEO-KOR
JPN-BUL	COL-ISR

Current contest indicator:
Start with the first contest

MEN -100 KG – ROUND OF 32	
AZE	SVK
GBR	MGL
>KAZ-BLR	CHI
FRA-BEL	ITA-CUB<
FIN-AUT	TUR-RSA
RUS-TPE	GER-CHN
KUW-MEX	GEO-KOR
JPN-BUL	COL-ISR

Current contest indicator:
Move to the next contest when the current contest has been completed

2.5.3 Bracket of 16

- What: Screen shows bracket with up to 16 judoka with standard IJF weight category name, standard IJF bracket name, for each side of the bracket: current contest indicator (">" (left side) and "<" (right side)), for each judoka (in colour white or blue): NOC code, <BRACKET> (will be replaced by a graphical bracket in the production mode).
Note: only the NOC code of the contest winner is displayed after completion of a contest.
- When: Throughout the competition at the discretion of the producer
- How: Dynamic screen

2.5.4 Bracket for quarterfinals

- What: Screen shows bracket for quarterfinals with standard IJF weight category name, standard IJF phase name, for each side of the bracket: current contest indicator (">" (left side) and "<" (right side)), for each judoka (in colour white or blue): NOC code, <BRACKET> (will be replaced by a graphical bracket in the production mode).
Note: only the NOC code of the contest winner is displayed after completion of a contest.
Note: heading phase name should change to "SEMIFINALS" when the contests are completed.
- When: During the quarterfinal contests at the discretion of the producer
How: Dynamic screen

2.5.5 Bracket for semifinals

- What: Screen shows bracket for semifinals with standard IJF weight category name, standard IJF phase name, for bracket: current contest indicator (">"), for each judoka (in colour white or blue): scoreboard name and NOC code, <BRACKET> (will be replaced by graphical bracket in the production mode).
Note: the current contest indicator will be displayed between the two judoka in a contest.
Note: only the scoreboard name and NOC code of the contest winner is displayed after completion of a contest.
Note: heading phase name should change to "FINAL" when the contests are completed.
- When: During the semifinal contests at the discretion of the producer
How: Dynamic screen

2.5.6 Bracket for repechage

- What: Screen shows bracket for repechage with standard IJF weight category name, standard IJF phase name, for bracket: current contest indicator (">"), for each judoka (in colour white or blue): scoreboard name and NOC code, repechage progression explanation, <BRACKET> (will be replaced by graphical bracket in the production mode).
Note: the current contest indicator will be displayed between the two judoka in a contest.
Note: only the scoreboard name and NOC code of the contest winner is displayed after completion of a contest.
Note: heading phase name should change to "BRONZE MEDALS" when the contests are completed.
- When: During the repechage contests at the discretion of the producer
How: Dynamic screen

MEN -100 KG - REPECHAGE		
>ZEEVI ARIEL	ISR	
SABINO JR MARIO	BRA	
LOSER SEMIFINAL	POOL CD	
<BRACKET>		
GUIDO LUIGI	ITA	
JIKURAULI IVERI	GEO	
LOSER SEMIFINAL	POOL AB	

Current contest indicator:
Start with the first contest.
Move to the next contest when the current contest has been completed.

2.5.7 Bracket for bronze medals

- What: Screen shows bracket for bronze medals with standard IJF weight category name, standard IJF phase name, for bracket: current contest indicator (">"), for each judoka (in colour white or blue): scoreboard name and NOC code, result text ("3RD") and <BRACKET> (will be replaced by graphical bracket in the production mode).
Note: the current contest indicator and result text will be displayed between the two judoka in a contest.
Note: only the scoreboard name and NOC code of the contest winner is displayed after completion of a contest.
- When: During the bronze medal contests at the discretion of the producer
How: Dynamic screen

MEN -100 KG - BRONZE MEDALS		
>GUIDO LUIGI	ITA	3RD
STEPKINE IOURI	RUS	
<BRACKET>		
ZEEVI ARIEL	ISR	3RD
TRAINEAU STEPHANE	FRA	

Current contest indicator:
Start with the first contest.
Move to the next contest when the current contest has been completed.

2.6 Part D - After a weight category

2.6.1 Final results

What: Screen shows final results by weight category with screen title, standard IJF weight category name, for each judoka: rank, scoreboard name and NOC code.

Note: sort by rank and NOC code.

When: After finals at the discretion of the producer

How: Scroll through all judoka

FINAL RESULTS - MEN -100 KG	
1	INOUE KOSEI JPN
2	GILL NICOLAS CAN
3	TRAINEAU STEPHANE FRA
3	STEPKINE IOURI RUS
5	ZEEVI ARIEL ISR
5	GUIDO LUIGI ITA
7	SABINO JR MARIO BRA
7	JIKURAULI IVERI GEO

2.7 Part E - During the Victory Ceremony

2.7.1 Presenters

- What: Screen shows the presenters with discipline name, standard IJF weight category name, screen title and for each presenter or accompanying person: title, scoreboard name, NOC code and function.
Please note that there is a possibility that the screen title should be applied if required (e.g. "Victory Ceremony" could be "Flower Ceremony", etc.).
- When: As the dignitary is introduced before the ceremony
- How: Single screen

JUDO MEN -100 KG VICTORY CEREMONY
PRESENTER: MR GERHARD HEIBERG - NOR IOC MEMBER
ACCOMPANIED BY: MR MARIUS VIZER - AUT IJF PRESIDENT

2.7.2 Medallists

- What: Screen shows list of medallists with discipline name, standard IJF weight category name, screen title. For each medallist show medal type, scoreboard name, NOC code.
- When: During the ceremony
- How: Static screen if all medallists are presented at the same time, dynamic screen if the medallists are presented by medal type

If the medallists are presented at the same time:

JUDO MEN -100 KG VICTORY CEREMONY
GOLD INOUE KOSEI JPN
SILVER GILL NICOLAS CAN
BRONZE TRAINEAU STEPHANE FRA
BRONZE STEPKINE IOURI RUS

If the medallists are presented one by one, use the following order:

As the first bronze medallist is presented:

JUDO MEN -100 KG
VICTORY CEREMONY
BRONZE STEPKINE IOURI RUS

As the second bronze medallist is presented:

JUDO MEN -100 KG
VICTORY CEREMONY
BRONZE TRAINEAU STEPHANE FRA
BRONZE STEPKINE IOURI RUS

As the silver medallist is presented:

JUDO MEN -100 KG
VICTORY CEREMONY
SILVER GILL NICOLAS CAN
BRONZE TRAINEAU STEPHANE FRA
BRONZE STEPKINE IOURI RUS

As the gold medallist is presented:

JUDO MEN -100 KG
VICTORY CEREMONY
GOLD INOUE KOSEI JPN
SILVER GILL NICOLAS CAN
BRONZE TRAINEAU STEPHANE FRA
BRONZE STEPKINE IOURI RUS

2.7.3 Medallists standings

- What: Screen shows medals summary by NOC with screen title, for each NOC: rank, NOC code, number of gold, silver, bronze medals and total of medals by NOC
- When: At the end of each day at the discretion of the producer
- How: Scroll through all pages.

MEDAL STANDINGS				
	GOLD	SILVER	BRONZE	TOT
1 JPN	4	2	2	8
2 FRA	2	2	2	6
3 CUB	2	2	1	5
4 CHN	2	1	1	4
5 ESP	1	-	3	4
5 ITA	1	-	3	4
7 USA	-	1	-	1

3 Real Time Display System

3.1 Part A - Competition presentation

3.1.1 Mat activity

What: Screen shows presentation of mat activity, including current and subsequent contests.
For each mat: Mat number, for each contest: contest indicator (<CC> - current contest or <NC> - next contest), standard IJF weight category name, standard IJF phase name, contest order, for each judoka: Colour (white or blue), NOC code and scoreboard name
Note: Contest with only one judoka will be presented with a blank in the opponent's place

When: During competition
How: Scrolling screen

MAT 1	<CC> MEN -100 KG - ELIMINATION ROUND OF 32 - # 1	JPN INOUE KOSEI - CAN GILL NICOLAS
	<NC> MEN -100 KG - ELIMINATION ROUND OF 32 - # 2	
	RUS STEPKINE IOURI - FRA TRAINEAU STEPHANE	
	<NC> MEN -100 KG - ELIMINATION ROUND OF 32 - # 3	- ISR ZEEVI ARIEL
	<NC> MEN -100 KG - ELIMINATION ROUND OF 32 - # 4	
	GEO JIKURAULI IVERI - BRA CORREA LUCIANO	
MAT 2	<CC> WOMEN -78 KG - ELIMINATION ROUND OF 32 - # 1	TPE HSU YAN-LIN - ARG BRICENO LORENA
	<NC> WOMEN -78 KG - ELIMINATION ROUND OF 32 - # 2	
	GBR ROGER MICHELLE - ITA MORICO LUCIA	
	<CC> WOMEN -78 KG - ELIMINATION ROUND OF 32 - # 3	
	RUS MOSKALYUK VERA - UKR PRYSCEPA MARYNA	
	<NC> MEN -100 KG - ELIMINATION ROUND OF 32 - # 5	
	CMR MOUSSIMA FRANCK MARTIAL - MEX MARTINEZ ARTURO	

Rolling up when the current contest (<CC>) finishes:

When the current contest (<CC>) finishes it disappears, and the first of the next contests (<NC>) moves to the current position etc.

This page intentionally left blank.

4 Sport Specific Real Time Data

4.1 ORIS Data Availability Description

4.2 Examples

All data elements presented in this section are supplementary to the data elements defined in Section 1 - Printable Outputs and other sections of the ORIS Judo document. The data elements listed here may be useful for other sport specific real time data presentation (e.g. live screens on websites).

4.2.1 Clocks

An electronic timing clock with countdown mode of actual time in increments of one (1) second must be used.

- Contest: the timing clock starts a countdown of five (5) minutes for men and four (4) minutes for women
- Golden Score contest: the timing clock counts up to the end of the Golden Score

Frequency: after each score update

This page intentionally left blank.

5 On Screen Results Presentation

Some screens will be updated in real time whenever new information becomes available (e.g. score change). These screens are split into two major categories:

- Schedules (before, during and after competition)
- Results (including contest results, etc.)

Detailed descriptions of these screens are available in the document "On Screen Results Presentation".

This page intentionally left blank.

Appendix A - Glossary

1 Terms

The specific terms used in the ORIS Judo document are defined as follows:

Term	Definition
Athlete preferred name	When NOCs apply for accreditation, they should provide the preferred family and given name for all athletes. These names should be the names that the athletes normally use, and by which they are popularly known while participating in other international competitions.
Back identification	Affixed on the back of the judogi. Includes the judoka's name, NOC code and weight category.
Common Codes	The set of data that are considered Common Codes from the Technology perspective of the Games. Among others, Sports, Disciplines, Events, Event phases, Event units and Venue names are defined in the Common Codes.
Competition	The competition runs from the start of the first event of a sport to the completion of the last event of a sport, excluding the Opening and Closing Ceremonies.
Contest	Event unit. A contest between white and blue judoka, with one referee and two judges. A contest is run over regular time and may be extended by a Golden Score.
Contest order number	An incremental number for each mat within a day, regardless of the weight category.
Delegation Registration Meeting (DRM)	The Delegation Registration Meeting is the process for official registration of all athletes and team officials who will participate at the Olympic Games. All NOCs must attend a DRM with the OC prior to being permitted entry into the Olympic Village.
Discipline/Sport discipline	"A discipline is a branch of a sport comprising one or several events." (as per Olympic Charter)
Disqualification	A ruling by officials that a competitor or team has broken the rules of the sport and cannot be considered for placing in an event unit, a phase or an event.
Draw	This is a public random draw carried out by the IJF for all weight categories before competition starts.
Event	"An event is a competition in a sport or in one of its disciplines, resulting in a ranking and giving rise to the award of medals and diplomas." (as per Olympic Charter) See "Judo References" for the list of events.

Term	Definition
Fusen Gachi	<p>Default.</p> <p>The decision of Fusen Gachi will be given to any contestant whose opponent does not appear for a contest. In this case the IJF 30 seconds rule will be applied.</p>
Golden Score	<p>An extra period of unlimited time intended to break ties if scores or penalties are equal at the end of the contest period. The first score or penalty decides the winner.</p>
Hansoku-make	<p>See "Procedures - Exceptional situations Handling".</p>
INFO	<p>INFO is an intranet which allows access to results, news, biographies, background, schedules, medals, records, transport and weather information. During the Games, INFO will be accessible either through dedicated workstations (kiosks) or remotely for accredited users or organisations (rate card may apply).</p>
Information Diffusion System (IDS)	<p>IDS is the complete solution for the centralisation and distribution of information (e.g. schedules, results, news, etc.) through ODF to different clients such as International Federations, OC website, press agencies, etc.</p> <p>IDS also includes provision of INFO and CIS.</p>
Initial Download	<p>The process of transferring all participants' data from the SEQ database to On Venue Results. This step takes place a few days before competition starts for each sport discipline.</p>
Ippon	<p>Full point, ends the contest.</p>
Judge	<p>An assistant to the Referee who sits outside the mat in the corner opposite the second judge. He must show his score with gestures, if this is different from the Referee's score. He shows whether an action is performed inside or outside the contest area.</p>
Judogi	<p>Dress worn in judo competitions, either white or blue.</p>
Judoka	<p>Judo competitor.</p>
Jury	<p>The Jury will make a decision on any exceptional situation (unacceptable behaviour, etc.)</p>
Kiken Gachi	<p>Withdrawal.</p> <p>The decision of kiken-gachi will be given to any contestant whose opponent withdraws from the competition for any reason during the contest.</p>
Late Athlete Replacement (LAR)	<p>An IOC policy defining the conditions under which an athlete who is unable to compete can be replaced by another eligible athlete who was not confirmed for participation in the Games.</p>
Mat	<p>Competition area. There are two mats at the Olympic Games.</p>
Matte	<p>Command: Interrupt the contest.</p>
Ne-waza	<p>Ground work.</p>
Olympic Data Feed (ODF)	<p>The Olympic Data Feed (ODF) is the unique data feed used to transfer information from the venue to clients such as INFO, the official website, International Federations, National Olympic</p>

Term	Definition
	<p>Committees, World News Press Agencies, Rights Holding Broadcasters, etc.</p> <p>ODF provides data at point in time (e.g. start lists, results, medallists, etc.) or real time (e.g. instant results and ranking, instant speed, etc.).</p> <p>The ODF technical specifications are available at: http://odf.olympictech.org.</p>
Olympic Games	<p>"The Olympic Games are competitions between athletes in individual or team events and not between countries. They bring together the athletes selected by their respective NOCs, whose entries have been accepted by the IOC. They compete under the technical direction of the IFs concerned." (as per Olympic Charter)</p>
	<p>The Olympic Games include the Opening Ceremony, Closing Ceremony, official training, competition and other competition related activities.</p>
Olympic News Service (ONS)	<p>The Olympic News Service exists to provide the media with comprehensive coverage from every race, every match, every session, every day, across every sport at the Olympic Games. This coverage, along with background information including historical results and records, and biographies on every competitor, is published on a secure intranet system called INFO, enabling the media to report accurately and extensively from multiple venues at the same time.</p> <p>The news service is the official source for independent and balanced coverage of the Olympic Games.</p>
On Venue Results (OVR)	<p>The systems, services and technicians responsible for timing and scoring data. OVR produces start lists, results and other competition related rankings, statistics and analysis for the sport discipline. This includes distribution to clients and use by other services, e.g. scoreboards, TV Graphics, INFO, ODF, etc.</p>
Phase	<p>This is the progression system in competition.</p>
	<p>See "Judo References" for the list of competition phases.</p>
Pool	<p>The Judo competition will be run in an elimination format, with a last eight or Quarterfinal repechage. Judoka will be divided into four pools (A, B C, D) by means of a draw.</p>
Rank	<p>Placing in an event. Judoka are ranked according to the IJF rules.</p>
Referee	<p>The official responsible for the conduct of the contest, according to the IJF Referee Rules. The referee awards scores and penalties and is assisted by two judges.</p>
Referee Commission	<p>The members of the Referee Commission assist the Referee Director in the execution of his duties. In general formed from the continental referee directors. They control the work of the acting referees and judges.</p>
Referee Director	<p>The Referee Director coordinates the work of the Referee Commission. He overlooks new developments in Judo and formulates rules in coordination with the spirit of this sport. He is responsible, together with the IJF Sports Director, for the running of IJF controlled competitions.</p>

Term	Definition
Results System Code (RSC)	<p>The Result System Code is a nine character code structured as follows: DDGEEPUU, where:</p> <ul style="list-style-type: none"> • DD: Discipline code • G: Gender • EEE: Event Code • P: Phase • UU: Event Unit
Round	See "Phase".
Session	A stage of judo competition. The judo competition is divided into two daily sessions at the Games.
Shido 1	Free warning.
Shido 2	Penalty.
Shido 3	Penalty.
Shido 4	Disqualification for the contest. The opponent receives Ippon.
Sonomama	<p>Don't Move. In any case where the Referee wishes to temporarily stop the contest e.g. to address one or both contestants without causing a change in their positions, or to award a penalty so that the contestant who is not penalised does not lose his position of advantage, he will announce Sonomama. To recommence the contest he will announce Yoshi. Sonomama can only be applied in ne-waza.</p>
Soremade	Command: End of the contest (that is all).
Sport	A sport is administered by an International Federation and may be composed of one or more disciplines.
Sport Entries and Qualification (SEQ)	A service provided by the OC sports department responsible for processing and managing the entries received from the NOCs, according to the guidelines of the Olympic Charter and the qualification systems defined by the International Federations, which are approved by the IOC.
Sports Commission	Assists the IJF Head Sports Director, controls and participates in the proper running of the Judo events of the Olympic Games (Draw, Weigh-in, Competitions).
Sports Director	Directs the preparation and the course of all events related to the judo competition (Draw, Weigh-in, Competitions) in collaboration with the Referee Director, with the assistance of the Sports Commission members and the IJF statistician.
Tatami	Part constituting the Judo mat (competition area).
Technical Delegate (TD)	The Technical Delegate is appointed by the International Federation to "ensure that their rules are complied with and to review and validate all technical elements of the competitions including entries, venue standards, competition schedule, pre-Olympic events as well as the conditions regarding accommodation, food and transport provided for the Technical Officials and Judges." (as per Olympic Charter)

Term	Definition
Tripartite Commission	<p>The Tripartite commission is composed of:</p> <ul style="list-style-type: none"> • The IOC • The Association of National Olympic Committees (ANOC) • The Association of Summer Olympic International Federations (ASOIF) <p>The main objective of the Tripartite Commission is to allocate Invitation Places to a number of NOCs without or with few athletes qualified, allowing them to participate in the Olympic Games, in order to strengthen the principle of universal representation.</p>
Venue Results Manager (VRM)	<p>The Venue Results Manager coordinates all stages of On Venue Results in preparation for the Games as well as during the Games (e.g. coordination with other functional areas, software testing, interaction with the International Federation, etc.).</p>
Waza-ari	<p>Positive score. Score higher than Yuko and lower than Ippon.</p>
Waza-ari-awasete-ippon	<p>Two Waza-ari equal an Ippon and consequently end a contest. Should one contestant gain a second Waza-ari in the contest the referee will announce waza-ari-awasete-ippon. The score should be displayed as "100" (not "20").</p>
Weight Category	<p>See "Event".</p>
Winning score	<p>The winning score is defined as the winner's highest score, which makes the difference from the opponent's scores. Example: The white judoka scored waza-ari and yuko; the blue judoka scored waza-ari and two yuko: the yuko is defined as the winning score for the blue judoka.</p>
Winning technique	<p>The winning technique is the technique/penalty of the winning score. If there are more than one equal winning scores, no winning technique is shown. Example: The white judoka scored waza-ari and yuko; the blue judoka scored waza-ari and two yuko one with ippon-seoi-nage and one with o-soto-gari, but it is not clear which one of these two is the winning technique, so neither is shown.</p>
Yuko	<p>Positive score. Score lower than Waza-ari.</p>

2 Specifications

2.1 Participants

In the following table, several different participant types may apply to the same sport/discipline depending on the event competition format.

Participant Type	Defining Characteristics	Sports / Disciplines	Code
Individual	Individuals	<ul style="list-style-type: none">Cycling, Rowing (singles), Swimming (except relays), Triathlon, etc.	I
Group - Indivisible	Individual athlete results are not recognised as part of the group results (crew, teams, pairs, duets, etc.)	<ul style="list-style-type: none">Bobsleigh, Figure Skating (couples), Synchronised Swimming, Rowing (crew), Athletics (relays), etc.	IG
Group - Divisible	Individual athlete results are recognised as part of the group results (teams, doubles, etc.)	<ul style="list-style-type: none">Artistic Gymnastics (team), Equestrian (team), etc.	G
Team	Team competition (group of players forming one side in Team sports)	<ul style="list-style-type: none">Basketball, Curling, Football, Handball, Hockey, Volleyball, Water Polo, etc.	T

2.2 Progression Types

Progression	Definition	Disciplines / Events
Seeding or Qualification	All participants are ranked after an initial phase. All of the participants (Seeding), or a limited number of the participants (Qualification), advance to the next event phase/unit based on this ranking.	<ul style="list-style-type: none">Seeding: Archery, Cycling BMX, Snowboard (Snowboard-Cross), etc.Qualification: Athletics (Long Jump), Canoe Sprint, Rowing, etc.
Single phase	All participants compete for a ranking in one event phase/unit	<ul style="list-style-type: none">Cycling Mountain Bike, Cycling Road, Swimming Marathon, Triathlon, etc.
Combined	All participants compete in one or more event units, in a single phase, or in multiple phases	<ul style="list-style-type: none">Disciplines: Athletics (Decathlon), Equestrian, Modern Pentathlon, etc.Races: Alpine Skiing (for the 1+ run events), Bobsleigh, Cycling Track, Luge, Sailing, Skeleton, etc.

2.3 Competition Format Types

Type	Definition	Results Type
In-line	Participants compete under the same conditions to achieve a result which will lead to a ranking from 1 to n	<ul style="list-style-type: none"> Measurements (time, weight, distance, height, etc.) Scores Judges' decisions (points, etc.).
Pool	Group of several participants, competing against each other in a round robin	<ul style="list-style-type: none"> Points
Bracket	Competition in which participants compete in heats or head-to-head. Winner(s) progress in a bracket towards the gold medal, loser(s) are eliminated or redirected	<ul style="list-style-type: none"> Win/Loss
	<p>Bracket types:</p> <ul style="list-style-type: none"> Bracket with direct elimination (e.g. Boxing) Bracket with direct elimination, classification and finals (e.g. Water Polo) Bracket with direct elimination and finals (e.g. Tennis) Bracket with direct elimination, repechage and finals (e.g. Judo) 	<ul style="list-style-type: none"> •
Cumulative	Results achieved in different stages of competition, contributing to the participant's event results (e.g. Athletics combined events, Sailing fleet racing)	<ul style="list-style-type: none"> Addition of results (points, times)

This page intentionally left blank.

Appendix B - Abbreviations

The following abbreviations are used in the ORIS Judo document with the exception of:

- Results codes, see Appendix C - Rules for Data Formats and Presentation
- Distribution Availability Codes, see end of Section 2 - Distribution Rules

Code	Description
CIS	Commentator Information System
cm	centimetre
CM	Organising Committee Competition Management
CTL	Continental Qualification
D	Desirable - users found this information useful for their work and if an organiser can provide it, it would be appreciated but is not compulsory
Da	Desirable, but only if such data is available
Dc	Desirable under conditions which are explained in the column for comments
DIR	Direct Qualification
DRM	Delegation Registration Meeting
EC	Execution Committee
ft	feet
GS	Golden Score
H	Hansoku-make direct, excluded from the contest
Hsm	Hansoku-make resulting from 4 Shidos
HST	Host Country Place
IBC	International Broadcasting Centre
ID	Identification number
IDS	Information Diffusion System
IF	International Federation
IJF	International Judo Federation
in	inch
IOC	International Olympic Committee
IPP	Ippon
IRM	Invalid Result Mark
IT	Information Technology
JU	Judo
kg	kilogramme
lb	pound
m	metre
M	Mandatory
Ma	Mandatory - if applicable
Mc	Mandatory - required under conditions which are explained in the column for comments
MMC	Main Media Centre
MPC	Main Press Centre

Code	Description
N/A	Not Applicable
NF	National Federation
NOC	National Olympic Committee
OC	Organising Committee
ODF	Olympic Data Feed
OG	Olympic Games
ONS	Olympic News Service
ORIS	Olympic Results and Information Services
OVR	On Venue Results system
PO	Organising Committee Press Operations
S	Shido (1, 2, 3, 4)
SEQ	Sport Entries and Qualification
Sx	Shido - penalties: 1 Shido (S1), 2 Shidos (S2), 3 Shidos (S3), 4 Shidos (S4) = Hansoku-make
TAO	IOC Technology Assistance and Observation team
TBD	To be defined
TC	Technical Committee
TD	Technical Delegate
TPC	Tripartite Commission Place
VPC	Venue Press Centre
VRM	Venue Results Manager
Waz	Waza-ari points/score
WAZ	Waza-ari
WC	World Cup
WNPA	World News Press Agencies
X	Hansoku-make direct, excluded from the competition
Y	Yuko points/score
yd	yard
YUK	Yuko

Appendix C - Rules for Data Formats and Presentation

This appendix describes data formats as they should be used in all outputs, unless other formats are specified in the description table or data matrix.

1 Judo Specific Rules

Gender abbreviations	Event gender: M (men), W (women) Judoka gender: F (female), M (male)
Traditional Judo weight category presentation order	Please see "Judo References"
Schedule status options	The following schedule status options are applicable to an event or event unit: <ul style="list-style-type: none">• Unscheduled Not visible on the schedule, optional (e.g. tie-breaker if applicable)• Scheduled The start time is known• Getting_Ready At time x before start - "x" is defined by Olympic Broadcasting Services (OBS)• Running In progress• Scheduled_Break Planned break (e.g. end of period)• Finished All action on the field of play is complete• Delayed Did not start as scheduled, should start in the current ticketing session• Postponed Did not start as scheduled, or has been interrupted, and the expected postponement exceeds the current ticketing session, date and start time are unknown at present• Interrupted Unplanned interruption after the start, and is expected to resume in the current ticketing session• Rescheduled The new date and start time are known• Cancelled Will not take place at these Games
Results status options	<ul style="list-style-type: none">• Start List Start list has been created• Live In progress• Intermediate Updated results at scheduled points or breaks. Results and/or ranks are subject to change• Partial The results and ranking of the judoka who have completed their performance are not subject to change by the results of judoka still competing.• Unconfirmed Activity on the field of play is complete but there is no results status update yet. Not applicable for Judo.• Unofficial Results are available but not approved• Official Results are approved

	<ul style="list-style-type: none"> • Protested The competition is no longer in progress and a protest has been lodged. Not applicable for Judo.
Contests numbering	<p>Contests are given an identifying number based on the order in which they occur, without consideration of gender or weight category. Contests for each day and each mat are assigned a sequential number beginning at 1 for each day of competition and each mat.</p> <p>The IJF will assign these contest numbers.</p> <p>Contest numbers will not be changed in case of failure at the weigh-in (contest cancelled) or no show (opponent wins).</p>
Invalid Results Marks (IRM)	<ul style="list-style-type: none"> • DNS - Did Not Start • DSQ - Disqualified
IRM presentation order	<p>For output C56:</p> <ul style="list-style-type: none"> Possible IRM codes are DNS and DSQ. They will be displayed on the output as they occur. <p>For outputs C58A and C58B:</p> <ul style="list-style-type: none"> Possible IRM codes are DNS and DSQ. They will be displayed on the output as they occur and the name and NOC code of the judoka will be struck through. Contest status will be "Cancelled". <p>For output C74A:</p> <ul style="list-style-type: none"> Possible IRM codes are DNS and DSQ. DSQ are listed first. Within a group, judoka are listed by NOC code. <p>For output C74B:</p> <ul style="list-style-type: none"> Possible IRM codes are DNS and DSQ. They will be displayed on the output as they occur. <p>For output C75:</p> <ul style="list-style-type: none"> For judoka who did not start or disqualified before competition: Strike out the name and NOC code of the judoka For judoka who did not start or disqualified during competition: Strike out name of the judoka for the contest in which the IRM occurred
Final classification	<p>After completion of an event (weight category), judoka are ranked as follows:</p> <ol style="list-style-type: none"> 1. The winner of the final contest will be ranked 1st, and the loser will be ranked 2nd 2. Winners of the bronze medal contests will be ranked tied 3rd, losers will be ranked equal 5th 3. Losers of Repechage contests are ranked equal 7th 4. Losers of the round of 16 are ranked equal 9th 5. Losers of the round of 32 are ranked equal 17th 6. Remaining judoka who competed are ranked equal 33rd 7. Judoka who did not compete are listed with their IRM code <p>Tied judoka are listed by NOC code.</p>
Time format	M:SS MM:SS
General rules for formats	"#" Digit placeholder, suppression of leading zeros "#" should be replaced with the corresponding non-zero digit if one is present;

	<p>otherwise, no digit appears.</p> <p>"0" Zero placeholder</p> <p>"0" should be replaced with the corresponding digit if one is present; otherwise the leading zero remains.</p> <p>E.g. 004.23 in the format ##0.00 becomes 4.23</p> <p>E.g. 004.23 in the format 00.00 becomes 04.23</p>																								
Percentage	##0.00 ##0.0 #0.0 00.00 0 ...																								
Height/Weight formats	<p>Height (metric): Height (imperial): Weight (metric): Weight (imperial):</p> <table style="margin-left: 100px;"> <tr><td>0.00m</td><td>0ft #0in</td><td>##0.00kg</td><td>##0.00lbs</td></tr> <tr><td>#00cm</td><td>0'#0"</td><td>##0.0kg</td><td>##0.0lbs</td></tr> <tr><td>0.00</td><td></td><td>##0kg</td><td>##0lbs</td></tr> <tr><td>##0</td><td></td><td>##0.00</td><td>##0.00</td></tr> <tr><td></td><td></td><td>##0.0</td><td>##0</td></tr> <tr><td></td><td></td><td>##0</td><td></td></tr> </table> <p>If metric and imperial units are used in a single field, the rule is to separate them by a forward slash with a space before and after it " / ". If they are combined, they should be presented as "centred".</p> <p>When displaying judoka's weight, use one decimal only when showing the exact weight.</p>	0.00m	0ft #0in	##0.00kg	##0.00lbs	#00cm	0'#0"	##0.0kg	##0.0lbs	0.00		##0kg	##0lbs	##0		##0.00	##0.00			##0.0	##0			##0

		##0																							
Presentation of ties	<p>Medal presentation</p> <ul style="list-style-type: none"> All medals will be shown even if tied: <table style="margin-left: 100px;"> <tr><td>e.g. 1 GOLD</td><td>FAMILYNAME Givenname</td></tr> <tr><td>2 SILVER</td><td>FAMILYNAME Givenname</td></tr> <tr><td>3 BRONZE</td><td>FAMILYNAME Givenname</td></tr> <tr><td>3 BRONZE</td><td>FAMILYNAME Givenname</td></tr> </table> <p>Results</p> <ul style="list-style-type: none"> The primary rank (first column) must show a rank (if tied, repeat rank). Secondary rank(s), if any will be repeated, with an "=" sign if there is sufficient space. 	e.g. 1 GOLD	FAMILYNAME Givenname	2 SILVER	FAMILYNAME Givenname	3 BRONZE	FAMILYNAME Givenname	3 BRONZE	FAMILYNAME Givenname																
e.g. 1 GOLD	FAMILYNAME Givenname																								
2 SILVER	FAMILYNAME Givenname																								
3 BRONZE	FAMILYNAME Givenname																								
3 BRONZE	FAMILYNAME Givenname																								

2 General Rules

Output description	Gives a short explanation of the output, describing information that is provided
Source	Information identifying the source of data, i.e. which organisational part of which body is responsible for providing it, for example: IOC, IJF, OC Press Operations, OC Competition Management, etc.
Column data alignment	General: right for numeric and results, left for text. IRMs are aligned as for results. May be adjusted depending on the output layout.
Column titles	Column titles match the alignment of the data columns
Date formats	<ul style="list-style-type: none"> • dd MMM yyyy (e.g. 6 APR 1896) <ul style="list-style-type: none"> • dd: date format, for example: 23 or 5 (presented without leading zero) • Ddd: day of week in abbreviation format - presented as three characters, for example: Mon for Monday (mixed case) • DDD: day of week in abbreviation format - presented as three characters, for example: MON for Monday (upper case) • Mmm: month in abbreviation format - mixed case, for example: Apr for April • MMM: month in abbreviation format - upper case, for example: APR for April • yyyy: year format, for example: 1896 • The "As of date" may reflect one of the following: <ul style="list-style-type: none"> • Date when data has been collected (e.g. world ranking) • Date and time when the actual output was updated (several editions of the same output, e.g. cumulative statistics) • Logical date if applicable • Logical date: If a session continues past midnight (00:00), any outputs produced will be considered as having the logical date on which the session began (e.g. for a session which began at 21:00 on Apr 8 and ended at 1:20 on Apr 9, the output would be dated Apr 8) <p>This date is according to the local time zone at the competition venue.</p>
Page break	<p>Page break applies only for printed outputs.</p> <ul style="list-style-type: none"> • When the complete output fits on a single page, "None, aim for a single page" is written • For multi-page outputs, there are three cases: <ol style="list-style-type: none"> 1. Natural page break: This should be considered as printing without page break. When printing reaches the end of a page a page break will occur and the output will continue printing on the next page. There are three ways in which the headings on subsequent pages will be dealt with. The following texts are used to describe these options in the description table: <ul style="list-style-type: none"> • Not controlled with repeated output headings and column headings • Not controlled with repeated column headings only • Not controlled without repeated output headings and/or column headings

	<p>2. Forced page break by "Group":</p> <p>This should be considered as printing with a page break. Before printing each group on a page the print software must decide if the complete group will fit on that page. If the group will not fit a page break will be forced. The group will then be printed on a new page. There are three ways in which the headings on subsequent pages will be dealt with. The following texts are used to describe these options in the description table:</p> <ul style="list-style-type: none"> • Break at "Group" with repeated output headings and column headings • Break at "Group" with repeated column headings only • Break at "Group" without repeated output headings and/or column headings <p>A "Group" is a logical group of data e.g. NOC/team/relay/rider/paragraph, etc. (e.g. a team with seven members. The result is that each page will contain as many complete teams as can fit on the page).</p> <p>3. Forced page break by "Condition":</p> <p>This should be considered as printing with a page break after a particular condition is reached. When the condition is reached a page break will be forced. The process will repeat when each of the condition(s) is reached. There are three ways in which the headings on subsequent pages will be dealt with. The following texts are used to describe these options in the description table:</p> <ul style="list-style-type: none"> • Break at "Condition" with repeated output headings and column headings • Break at "Condition" with repeated column headings only • Break at "Condition" without repeated report output headings and/or column headings <p>A "Condition" may be any trigger e.g. a new NOC/team/gender/athlete/class of officials, etc. (i.e. each time a new NOC is reached a page break is forced. The result is that each NOC is printed on a separate page).</p> <p>A combination of the above three cases is possible within a single output.</p>
Legend	<p>The description table defines if a legend is required on an output:</p> <ul style="list-style-type: none"> • "None" is specified if no abbreviations are used in the output • If one or more abbreviations may be used in the output the legend will be used to describe them. The following rules apply: <ul style="list-style-type: none"> • Only those abbreviations which appear in a version of the output are shown in the legend (dynamic legend) • If the sample shows all possible abbreviations, "See sample for all possible abbreviations" is specified in the description table • If there are more abbreviations possible than shown in the sample, "Use the following description for abbreviations which appear in the output" is specified in the description table and all possible abbreviations and descriptions are listed • The location of the legend is defined either as "To be displayed at the bottom/top of each page" or "To be displayed at the bottom/top of the last page only"
Notes	<p>Guidelines for any "Note" planned where users will find an explanation of data in the output, reasons for some action related to that output, etc.</p> <p>Each output could contain up to three different types of "Notes":</p> <ol style="list-style-type: none"> 1. Note with static text: <ul style="list-style-type: none"> • If "Note with static text" is not planned, allowed or possible, "None" is written • If text of "Note with static text" is always the same and already presented in the sample, "See sample" is indicated

	<p>2. Note with predefined, but changeable text:</p> <ul style="list-style-type: none"> • If "Note with predefined text" is not planned, allowed or possible, "None" is written • If text of "Note with predefined text" can vary depending on certain conditions, they are listed here, together with text to be used for each condition <p>3. Note with free text:</p> <ul style="list-style-type: none"> • Up to two lines of free text will be reserved at the bottom of the last page of each output in order to provide explanations or other annotations concerning the content of the output
Comments	This section is used for any further explanations and comments on the output, or suggestions to output provider(s). If no comments are needed, "None" is written.

Appendix D - Supporting Documents

This appendix includes the following supporting documents:

- Templates for the output "Official Communication" (C67)
- Results, Medals and Diplomas
- Data to be Captured
- Winning Techniques and Codes

1 Templates for Official Communication

In order to support OC Technology as much as possible and to guarantee a smooth process and appropriate wording, a collection of possible templates to be used during the Games is useful. The most common templates are included in this chapter and should be stored in the OC Technology system well before the Games.

The Official Communication template should include the following fields:

Event	Affected event name (see "Judo References" for list of events)
Gender	Event gender indication (men, women), if applicable
Phase	Affected stage of competition (e.g. round of 16, quarterfinals, etc.), if applicable
Unit	Specification of the phase (e.g. contest, etc.), if applicable
Subtitle	One line space for describing the reason for the Official Communication
Summary	Multiple lines for the body of the Official Communication. Only non-formatted text can be included here (no graphics, no tables, etc.)
Details	Multiple lines for describing details. Here, formatted text (font size, style, colour, graphics, tables, etc.) can be included. This field is not mandatory.
Issued by	Initiator's (name and) function
Date	Date of decision as provided by the person issuing the Official Communication
Time	Time of decision as provided by the person issuing the Official Communication
Note	If needed, contact details for further information can be added here (as a Note)
Signature	Signature of the initiator, needed in order to release the Official Communication

Affects Results:

Affects Schedules:

Affects Others:

Please note for the row "Details": At the moment of creating the templates for the most common situations, it is almost impossible to add appropriate details. If needed, the details should be communicated to OC Technology at the same time as all other details for the Official Communication.

OFFICIAL COMMUNICATION (empty form)

Event			Gender

OFFICIAL COMMUNICATION (possible templates)

Subtitle	A	Jury decision
	B	IJF decision
	C	Bad weather conditions
	D	Accident of FAMILYNAME Givenname (NOC)
	E	Judo: IOC disqualifies FAMILYNAME Givenname (NOC) for <reason for disqualification>
	F	...

Heading	a	<Contest/Session/> has been delayed
	b	<Contest/Session/> has been postponed
	c	<Contest/Session/> has been interrupted
	d	<Contest/Session/> has been rescheduled
	e	<Contest/Session/> has been cancelled
	f	...

Summary	1	The <...> had to be delayed due to <...>. It is expected that the delay should not be longer than nn minutes.
	2	The <...> had to be postponed due to <...>. The new start time of the <...> is unknown at the moment. Further details will be communicated as soon as available.
	3	The <...> had to be interrupted due to <...>. Further details will be communicated by the IJF as soon as available.
	4	The <...> had to be rescheduled due to <...>. The new date and start time is dd MMM yyyy at HH:MM.
	5	The <...> had to be cancelled due to <...>. The <...> will not be held during these Games.
	6	FAMILYNAME Givenname (NOC) submitted a protest related to <...>
	7	FAMILYNAME Givenname (NOC) was disqualified for <...> (IJF rule <...>)
	8	The IOC Disciplinary Commission decided on dd?? Mmm?? yyyy??? to disqualify FAMILYNAME Givenname (NOC) who was ranked nn?? in the En??. Results have been amended accordingly. Further details regarding the IOC Disciplinary Commission decision can be found at: www.olympic.org <i>If the disqualified athlete is among medallists:</i> The IOC Disciplinary Commission decided on dd?? Mmm?? yyyy??? to disqualify FAMILYNAME Givenname (NOC) who was ranked n?? in the En??. Results have been amended accordingly. The medallists are now: FAMILYNAME Givenname (NOC), gold, FAMILYNAME Givenname (NOC), silver, and FAMILYNAME Givenname (NOC), bronze. Further details regarding the IOC Disciplinary Commission decision can be found at: www.olympic.org

Issued by	I	IJF Technical Delegate
	II	Judo Competition Manager

Further information	i	For more details contact the IJF Office
	ii	For more details contact the IJF Technical Delegate
	iii	For more details contact the OC Competition Manager
	iv	For more details consult www.olympic.org

Note: authors of this ORIS document do not imply that this is a complete list of Official Communications templates.

2 Results, Medals and Diplomas

2.1 General

The Olympic Charter states that International Federations have the responsibility "to establish the final results and ranking of Olympic competitions."

Medals and diplomas will be allocated based upon these final results. Should any changes occur affecting medallists and/or diploma recipients, the IOC will decide on the new medal and diploma allocation.

2.2 Expected Number of Medals and Diplomas

The information included in this chapter should serve as a support for the medal and diploma allocation in Judo.

Eligible athletes:

- Athletes who are classified

In the following table the first bullet indicates the regular medal allocation; the following bullet(s) indicate additional possibilities.

Medal Type/ Diploma	Event Type	
	Individual	
Gold	• 1	
Silver	• 1	
Bronze	• 2	
Diploma	• 8 • Less than 8, only athletes ranked within the top 8	

2.3 New Classification after Disqualification

In case of disqualification among the medallists or diploma recipients in an event, the following rules will apply:

Initial Rank	New Rank	Name	NOC Code
4		FAMILYNAME 1 Givenname 1	NOC 1
2	1	FAMILYNAME 2 Givenname 2	NOC 2
3	2	FAMILYNAME 3 Givenname 3	NOC 3
3	3	FAMILYNAME 4 Givenname 4	NOC 4
5	3	FAMILYNAME 5 Givenname 5	NOC 5
5	5	FAMILYNAME 6 Givenname 6	NOC 6
7	5	FAMILYNAME 7 Givenname 7	NOC 7
7	7	FAMILYNAME 8 Givenname 8	NOC 8

Note: The possible combinations for reallocation of placements are described in detail in the document "International Judo Federation Olympic Games Medal Reallocation in the case of Disqualification".

ORIS reference output:

- Draw Sheet (C75)

Note: The software has to be flexible enough to handle medal allocations as decided by the WTF and/or the IOC.

3 Data to be Captured

In addition to the information provided by Accreditation, the following data elements should be provided to OVR in order to fulfil the requirements listed in this document:

Data	Formats / Values	Captured by	Comments
IJF ID	Numeric	SEQ	
IJF World rank	Numeric	SEQ	
Type of Qualification	<ul style="list-style-type: none">• Continental Qualification (CTL)• Direct Qualification (DIR)• Host Country Place (HST)• Tripartite Commission Place (TPC)	SEQ	

4 Winning Techniques and Codes

The following techniques and codes should be used when relevant:

Group	Sub-group	Technique (English)	Code	French
Nage-waza	Ashi-waza	Ashi-guruma	AGU	Ashi-guruma
Nage-waza	Ashi-waza	De-ashi-barai	DAB	De-ashi-barai
Nage-waza	Ashi-waza	Hiza-guruma	HIZ	Hiza-guruma
Nage-waza	Ashi-waza	Hane-goshi-gaeshi	HNE	Hane-goshi-Gaeshi
Nage-waza	Ashi-waza	Harai-goshi-gaeshi	HRA	Harai-goshi-gaeshi
